Supplementary Plan of
Development, Platform 'C',
Dos Cuadras Field, OCS P-0241

Dear Mr. Schambeck:

Please find enclosed a revised Supplementary Plan of Development for the proposed drilling program from Platform "C", Dos Cuadras Field. This revised plan is to replace the one dated August 5, 1977. The following changes have been made.

- (1) C-30, a DQ producer, has been eliminated based on log data from C-41.
- (2) C-16 will be completed in the FQ interval only to preclude commingling of individual zones across the main thrust fault.
- (3) The drilling order was rearranged for the S1 wellroom.
- (4) C-46 (DQ) and C-14 (EQ) are listed as doubtful based on results obtained from initial wells.

If you have questions concerning this revised Supplementary Plan, I will be glad to meet with you to discuss the matter.

Sincerely,

GEB:smg
