SUPPLEMENTARY INFORMATION:

Authority

This notice is published pursuant to subsection 8(p) of the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1337(p)), added by section 388 of the Energy Policy Act of 2005, and the implementing regulations at 30 CFR 585.116. This regulatory provision states that the Director, "may . . . solicit information from industry and other relevant stakeholders (including State and local agencies), as necessary, to evaluate the state of the offshore renewable energy industry, including the identification of potential challenges or obstacles to its continued development. Such requests for information may relate to the identification of environmental, technical, regulatory, or economic matters that promote or detract from continued development of renewable energy technologies on the OCS. From the information received, the Director may evaluate certain refinements to the OCS Alternative Energy Program that promote development of the industry in a safe and environmentally responsible manner, and that ensure fair value for use of the Nation's OCS."

Purpose

Since BOEM promulgated its renewable energy regulations in 2009, BOEM has made substantial progress in planning and leasing for renewable energy development on the OCS. BOEM has issued nine commercial wind

energy leases, generated more than \$14.5 million in winning bids from offshore wind lease sales, and established 13 intergovernmental task forces with Federal, State, local, and tribal partners to assist in identifying areas for potential renewable energy development.

Now that BOEM's Renewable Energy Program has gained experience in implementing its regulations, it is appropriate to evaluate and assess our existing processes. BOEM believes stakeholder feedback is crucial to this effort. To that end, BOEM invites comments and feedback on any aspects of BOEM's Renewable Energy Program that our governmental partners, the offshore renewable energy industry, and other affected stakeholders have found to be particularly effective. At the same time, BOEM is also interested in constructive criticism and feedback. Therefore, BOEM requests recommendations for improving aspects of our program that stakeholders believe to be ineffective or unnecessarily burdensome, and requests descriptions of the benefits those program changes would create. BOEM will use the information submitted to inform our strategic planning efforts and in determining whether and how we should change our existing renewable energy processes, including, if warranted, our regulations.

For more information about BOEM's renewable energy efforts, please visit: <http://www.boem.gov/Renewable-Energy/>.

Protection of Privileged or Confidential Information

BOEM will protect privileged or confidential information that you submit as required by the Freedom of Information Act (FOIA). Exemption 4 of FOIA applies to trade secrets and commercial or financial information that you submit that is privileged or confidential. If you wish to protect the confidentiality of such information, clearly mark it and request that BOEM treat it as confidential. BOEM will not disclose such information, except as required by FOIA. Please label privileged or confidential information "Contains Confidential Information" and consider submitting such information as a separate attachment.

However, BOEM will not treat as confidential any aggregate summaries of such information or comments not containing such information. Additionally, BOEM may not treat as confidential the legal title of the commenting entity (e.g., the name of your company). Information that is not labeled as privileged or confidential will

be regarded by BOEM as suitable for public release.
