**BILLING CODE 4312–52–P**

**DEPARTMENT OF THE INTERIOR****Bureau of Ocean Energy Management**

[Docket No. BOEM–2018–0067]

**Commercial Renewable Energy  
Transmission on the Outer Continental  
Shelf Offshore New York and New  
Jersey; Notice of Proposed Grant Area  
and Request for Competitive Interest**

**AGENCY:** Bureau of Ocean Energy  
Management, Interior.

**ACTION:** Public notice.

**SUMMARY:** The purpose of this public  
notice is to: Describe the New York and  
New Jersey Ocean Grid proposed by  
Anbaric Development Partners, LLC  
(ADP); determine if there is competitive  
interest in a right-of-way (ROW) grant  
for renewable energy purposes in the  
area identified in this notice; and solicit  
public input regarding the proposal, its  
potential environmental consequences,  
and other uses of the area in which the  
proposal would be located.

**DATES:** If you are submitting an  
indication of interest in acquiring a  
ROW grant for the area ADP requested,  
your submission must be sent by mail,  
postmarked no later than July 19, 2019  
for your submission to be considered. If  
you are providing comments or other  
information, you may send them by  
mail, postmarked by this same date, or  
you may submit them through the  
Federal Rulemaking Portal at <http://www.regulations.gov>, also by this same date.

**ADDRESSES:** If you are submitting an  
indication of competitive interest for a  
ROW grant, please submit it by mail to  
the following address: Bureau of Ocean  
Energy Management, Office of  
Renewable Energy Programs, 45600  
Woodland Road, Mailstop: VAM–OREP,  
Sterling, VA 20166. Submissions must  
be postmarked by July 19, 2019 to be  
considered by BOEM in determining  
whether there is competitive interest. In  
addition to a paper copy of your  
submission, include an electronic copy  
on a compact disc or portable storage  
device. BOEM will list the parties that  
submit indications of competitive  
interest in the area ADP requested on  
the BOEM website after the 30-day  
comment period has closed.

If you are submitting comments and  
other information concerning the  
proposed grant area, you may use either  
of the following two methods:

1. *Federal eRulemaking Portal:* <http://www.regulations.gov>. In the entry  
entitled, “Enter Keyword or ID,” enter  
BOEM–2018–0067 and then click  
“search.” Follow the instructions to

submit public comments and view supporting and related materials available for this notice.

2. Alternatively, you may submit comments by mail to the following address: Bureau of Ocean Energy Management, Office of Renewable Energy Programs, 45600 Woodland Road, Mailstop: VAM-OREP, Sterling, VA 20166.

If you wish to protect the confidentiality of your submissions or comments, clearly mark the relevant sections and request that BOEM treat them as confidential. Please label privileged or confidential information "Contains Confidential Information" and consider submitting such information as a separate attachment. Treatment of confidential information is addressed in the section of this notice entitled, "Privileged or Confidential Information." BOEM will post all comments on *regulations.gov* unless labeled as confidential. Information that is not labeled as privileged or confidential will be regarded by BOEM as suitable for public release.

**FOR FURTHER INFORMATION CONTACT:**

Casey Reeves, Project Coordinator, BOEM, Office of Renewable Energy Programs, 45600 Woodland Road, Mailstop: VAM-OREP, Sterling, VA 20166, (703) 787-1671.

**SUPPLEMENTARY INFORMATION:** On April 30, 2018, the Bureau of Ocean Energy Management (BOEM) received an application from ADP, later revised on June 22, 2018, for a ROW grant on the Outer Continental Shelf (OCS) offshore New York and New Jersey. ADP's proposed project, the New York and New Jersey Ocean Grid (NY/NJ Ocean Grid), would entail the construction, installation, and operation of an offshore transmission system of approximately 185 nautical miles of submarine cable on the OCS and approximately 118 nautical miles of submarine cable on State submerged lands to deliver offshore wind energy generation to the onshore electric grid. The NY/NJ Ocean Grid also includes the siting of several offshore collector platforms (OCPs), each connected to one or more high voltage submarine cables to onshore points of interconnection. Each proposed OCP would be designed to handle 800 to 1,200 MW of offshore wind energy generation with the ability to connect multiple offshore wind projects and accommodate phased development within BOEM's designated Wind Energy Areas (WEAs).

BOEM is publishing this Request for Competitive Interest (RFCI) pursuant to subsection 8(p)(3) of the OCS Lands Act (43 U.S.C. 1337(p)(3)) and 30 CFR

585.306-307. Subsection 8(p)(3) of the OCS Lands Act requires that OCS renewable energy leases, easements, and ROWs be issued "on a competitive basis unless the Secretary determines after public notice of a lease, easement, or right-of-way that there is no competitive interest." The regulations at 30 CFR 585.306-307 set forth BOEM's procedures for making such determinations for ROW grants. This RFCI provides public notice of the proposed ROW grant area that ADP requested, and invites the submission of indications of competitive interest. BOEM will consider the responses to this public notice to determine whether competitive interest exists for the area ADP requested, as required by 43 U.S.C. 1337(p)(3). Parties wishing to obtain a grant for the area that ADP requested should submit detailed and specific information, as described in the section entitled, "Required Indication of Interest Information." This announcement also requests interested and affected parties to comment and provide information about site conditions and existing and future uses of the area identified in this notice that would be relevant to the proposed project or its impacts. BOEM has described the type of information that it is requesting in the section entitled, "Requested Information from Interested or Affected Parties."

**Purpose of the RFCI**

Responses to this public notice will allow BOEM to determine, pursuant to 30 CFR 585.306, whether or not there is competitive interest in acquiring the ROW grant area ADP requested, as described in this notice. In addition, this notice provides an opportunity for interested stakeholders to provide comments on the ADP ROW request, including information relating to potential environmental consequences from the proposed project on existing geological, geophysical, and biological (habitat and species) conditions, as well as any potential impacts to existing ocean users (e.g., fishing industry and mariners) in the area described in this notice. If, in response to this notice, BOEM receives one or more indications of competitive interest from qualified entities that wish to transmit renewable energy in the proposed ADP ROW grant area, it may decide to move forward with the ROW grant issuance process using competitive procedures pursuant to 30 CFR 585.308. However, if BOEM receives no qualified competing indications of interest, BOEM may decide to move forward with the ROW grant issuance process using the

noncompetitive procedures contained in 30 CFR 585.309.

**Background**

**Statutory Authorization**

Under OCSLA subsection 8(p)(1)(C), the Secretary of the Interior (the Secretary) may issue leases or ROWs for activities that produce or support production, transportation, or transmission of energy from sources other than oil or gas, including renewable energy sources. Section 8(p) also requires the Secretary to issue any necessary regulations to carry out this authority. Regulations were issued for this purpose on April 29, 2009, and are codified in BOEM regulations at 30 CFR part 585. The Secretary has delegated the authority to issue leases, easements, and ROWs to the Director of BOEM.

**Determination of Competitive Interest and Granting Process**

BOEM will evaluate indications of competitive interest in the ROW grant area ADP requested to install cables for the transmission of renewable electricity, and will determine whether there is competitive interest in accordance with 30 CFR 585.307. At the conclusion of the comment period for this public notice, BOEM will review the submissions received to ensure that they are complete and that the submitters are qualified to hold a ROW grant under 30 CFR 585.106 and 107, and then will make its competitiveness determination.

BOEM may find that competitive interest exists if it receives a proposal to acquire an OCS ROW grant that cannot coexist with ADP's proposed activities within its requested grant corridor. In rendering its determination regarding competitive interest, BOEM will analyze whether the proposal by ADP would prevent a known competitor's subsequent, or parallel, use of the area for renewable energy transmission. Under BOEM's regulations at 30 CFR 585.302(b)(1), the rights accorded in a ROW grant do not prevent the issuance of other rights in the same area, provided that any subsequent rights BOEM grants in the area of a previously issued ROW grant do not unreasonably interfere with activities approved under the previously-issued ROW grant. Consequently, if you have an interest in obtaining a commercial lease for generating offshore wind energy in the area of ADP's ROW grant request, it is not necessary to submit indications of interest in response to this notice to protect your interest in obtaining a lease. This is because BOEM could issue a lease for generating offshore wind

energy in the same area as the ROW, so long as the lease activities do not unreasonably interfere with BOEM-approved activities on the ROW grant.

If BOEM determines that competitive interest exists, it may decide to proceed with the competitive granting process outlined in 30 CFR 585.308. If BOEM determines that there is no competitive interest in the proposed grant area, it will publish in the **Federal Register** a notice that there is no competitive interest. At that point, BOEM may decide to proceed with the noncompetitive grant issuance process pursuant to 30 CFR 585.306(b). If BOEM issues a ROW grant to ADP, ADP would need to conduct any construction activities on the ROW pursuant to a BOEM-approved General Activities Plan (GAP) pursuant to 30 CFR 585.600(c).

Whether BOEM proceeds with the competitive or noncompetitive grant process, it will consult and coordinate

with relevant Federal agencies, affected tribes, and affected state and local governments in issuing a grant; developing grant terms and conditions; and deciding whether to approve, disapprove, or approve with modifications any activities proposed in a GAP.

**Environmental Review and Permitting Process**

Prior to issuing any ROW grant or authorizing any construction activities on that ROW grant, BOEM would conduct a site-specific environmental review under the National Environmental Policy Act, during which it would act as the lead agency, coordinate with cooperating or consulting Federal agencies, and provide additional opportunities for public comment. BOEM would also participate in associated consultations under the Coastal Zone Management

Act, the Endangered Species Act (ESA), the Magnuson-Stevens Fishery Conservation and Management Act, the National Historic Preservation Act (NHPA), Executive Order 13175, and other laws, regulations, and authorities determined necessary throughout the process.

**Description of the Grant Request**

The area for which ADP has requested a ROW grant is located on the OCS off the coasts of New York and New Jersey. A ROW grant corridor, in which a cable, pipeline, or associated facility is located, is generally 200 feet in width centered on the cable and includes areas for the associated facilities limited to the area reasonably necessary for the OCP's or other necessary accessory facilities (30 CFR 585.301). The requested grant corridor crosses portions of the following OCS blocks:

Protraction No.	Lease block	Protraction No.	Lease block
NK18-12	6457	NJ18-03	6001

BOEM requests public comments and indications of competitive interest in the ROW grant area identified by this notice. The centerline of the eventual ROW grant may be adjusted based on the results of future surveys or new information obtained from stakeholder outreach and public comments, but the proposed project, if approved, is expected to occur within the listed lease blocks.

#### Map of the Area

You can find a map of the area proposed for a ROW grant at the following URL: <https://www.boem.gov/Renewable-Energy-Program/State-Activities/Regional-Proposals.aspx>. A large-scale map of the RFCI area showing boundaries of the area is available from BOEM upon request to the contact listed in the **FOR FURTHER INFORMATION CONTACT** section above.

#### Multiple Use Considerations

BOEM has identified the following multiple use issues through early coordination and outreach efforts:

##### *Department of Defense*

The Department of Defense (DoD) conducts offshore testing, training, and operations on the Atlantic above the OCS. BOEM would consult with the DoD on any activities proposed on the requested ROW grant to ensure that they are compatible with DoD activities on the Atlantic above the OCS.

##### *Shipping Traffic*

Shipping traffic occurs within the vicinity of the requested ROW grant. BOEM will coordinate with the United States Coast Guard to avoid or minimize potential conflicts.

#### *Protected Resources*

Several species of birds, marine mammals, sea turtles, and fish listed as threatened or endangered under the ESA may occur permanently or seasonally in the proposed ROW grant area. Protection of such species falls within the jurisdiction of the United States Fish and Wildlife Service (FWS) or the NOAA National Marine Fisheries Service (NMFS). The proposed route would cross North Atlantic right whale habitat and would therefore likely require consultation with NMFS to ensure adequate protection through mitigation measures. In addition to ESA-listed species, the area likely contains, seasonally or permanently, seabirds protected under the Migratory Bird Treaty Act and marine mammals protected under the Marine Mammal Protection Act. BOEM will coordinate with the FWS and NMFS to avoid, mitigate, and/or minimize potential impacts to the resources under their jurisdiction.

#### *Existing Infrastructure*

The proposed ROW grant crosses international fiber optic telecommunications cable. In order to construct its proposed project, ADP is expected to establish crossing agreements with their owners and ensure that installation activities do not cause any disruption to service, maintenance, or decommissioning, or otherwise damage those pipelines and cables identified by the affected parties.

#### *Fisheries and Essential Fish Habitat*

Portions of the area identified are used by the commercial and recreational fishing industry, and NMFS has designated essential fish habitat (EFH)

in much of the area. Consultations with NMFS may be required to identify measures to avoid and minimize impacts on EFH during the siting and installation phases of development.

#### **Required Indication of Competitive Interest Information**

If you intend to submit an indication of competitive interest for a ROW grant for the area identified in this notice for the purpose of transmitting electricity generated from a renewable source, you must provide the following:

(1) Documentation demonstrating that you are legally qualified to hold a lease or grant in accordance with the requirements of 30 CFR 585.106 and 585.107(c). Examples of the documentation appropriate for demonstrating your legal qualifications and related guidance can be found in Chapter 2 and Appendix B of the *BOEM Renewable Energy Framework Guide Book* available at: <http://www.boem.gov/RenGuidebook03/>. The documents you provide to demonstrate your qualifications to hold a lease or grant will be placed in a file kept by BOEM that may be made available for public review. If you wish that any part of your legal qualification documentation be kept confidential, clearly identify what should be kept confidential, and submit it under separate cover (see "Protection of Privileged or Confidential Information Section," below).

(2) Documentation demonstrating that you are technically and financially capable of constructing, operating, maintaining, and decommissioning the facilities described in (4) below in accordance with the requirements of 30 CFR 585.107(a). Guidance regarding the documentation required to demonstrate

your technical and financial qualifications can be found at: <http://www.boem.gov/Renewable-Energy-Program/Regulatory-Information/QualificationGuidelines-pdf.aspx>. Any documentation you submit to demonstrate your legal, technical, and financial qualifications must be provided to BOEM in both paper and electronic formats. BOEM considers an Adobe PDF file on a storage media device to be an acceptable format for an electronic copy.

(3) A statement that you wish to acquire a renewable energy ROW grant for the proposed grant corridor ADP requested for the NY/NJ Ocean Grid project, and a description of how your proposal would interfere with, or suffer interference from, the proposed project. You should submit any request for a ROW grant that does not conflict with the proposed grant corridor separately pursuant to 30 CFR 585.305.

(4) A description of your objectives, including:

- Devices and infrastructure involved (if your project would require the use of bottom-founded structures such as booster stations, please indicate where those platforms would be located);
- Anticipated capacity;
- How the project would support renewable energy; and
- A statement that the proposed activity conforms with applicable state and local energy planning requirements, initiatives, or guidance.

(5) A schedule of proposed activities, including those leading to commercial operations.

(6) Available and pertinent data and information concerning environmental conditions in the area, including any energy and resource data and information used to evaluate the area.

Further guidance for the qualifications process and requirements is available at: <http://www.boem.gov/Renewable-Energy-Program/Regulatory-Information/QualificationGuidelines-pdf.aspx>. Your complete submission, including the items identified in (1) through (6) above, must be provided to BOEM in both paper and electronic formats. BOEM considers an Adobe PDF file stored on a compact disc (CD) or portable storage device to be an acceptable format for submitting an electronic copy. Where applicable, you should submit spatial information in a format compatible with ArcGIS in a geographic coordinate system (NAD 83).

It is critical that you provide a complete submission of competitive interest so that BOEM may consider your submission in a timely manner. If BOEM reviews your submission and determines that it is incomplete, BOEM

will inform you of this determination and describe the information necessary in order for BOEM to deem your submission complete. If BOEM determines your second submission is also insufficient or that it has not received the requested information by a date BOEM specified, we reserve the right to deem your submission invalid. In such a case, BOEM would not consider your submission.

#### **Requested Information From Interested or Affected Parties**

BOEM is also requesting specific and detailed comments from interested or affected parties regarding the following:

(1) The current and future need for a regional transmission system in the proposed area, including utility, available grid connections, economics, efficiency or other relevant metrics.

(2) Whether BOEM should develop a broader strategic approach for regional transmission cables in which BOEM considers limits on the number and location of future ROW grants or, alternatively, processes unsolicited ROW grant requests on a case-by-case basis as it receives them from industry.

(3) Conditions to make such a network compatible with offshore wind projects.

(4) Offshore wind project developer interest in use of regional transmission networks on the OCS.

(5) Geological and geophysical conditions (including bottom and shallow hazards) in the area described in this notice.

(6) Known archaeological, historic or cultural resource sites on the seabed in the area described in this notice.

(7) Multiple uses of the area described in this notice, including navigation (in particular, commercial and recreational vessel usage) and commercial and recreational fisheries.

(8) Potential impacts to existing communication cables.

(9) DoD operational, training, and testing activities (surface and subsurface) in the area described in this notice that may be impacted by the proposed project.

(10) Potential future uses of the area.

(11) Advisable setback distance for other offshore structures, including other cables, and renewable energy structures.

(12) The potential risk to the proposed offshore transmission cable posed by anchors or other hazards, and burial depths that would be required to mitigate such risks.

(13) Relevant environmental and socioeconomic information.

#### **Protection of Privileged or Confidential Information**

##### *Freedom of Information Act*

BOEM will not disclose privileged or confidential information that you submit if it qualifies for Freedom of Information Act (FOIA) exemption for trade secrets and commercial or financial information, provided that you clearly label the submission with "Contains Confidential Information" and request that BOEM treat it as confidential. Please consider submitting such information as a separate attachment.

BOEM will not treat as confidential any aggregate summaries of such information or comments not containing such confidential or privileged information. Additionally, BOEM will not treat as confidential (1) the legal title of the nominating entity (for example, the name of your company), or (2) the list of whole or partial blocks that you are nominating. Information that is not labeled as privileged or confidential will be regarded by BOEM as suitable for public release.

##### *Personal Identifying Information*

BOEM does not consider anonymous comments; please include your name and address as part of your submittal. You should be aware that your entire comment, including your name, address, and your personal identifying information, may be made publicly available at any time. All submissions from identified individuals, businesses and organizations will be available for public viewing on [regulations.gov](http://regulations.gov). In order for BOEM to withhold from disclosure your personal identifying information, you must identify any information contained in the submittal of your comments that, if released, would constitute a clearly unwarranted invasion of your personal privacy. You must also briefly describe any possible harmful consequences of the disclosure of information, such as embarrassment, injury or other harm.

##### *National Historic Preservation Act (16 U.S.C. 470w-3(a))*

BOEM is required, after consultation with the Secretary, to withhold the location, character, or ownership of historic resources if it determines that disclosure may, among other things, risk harm to the historic resources or impede the use of a traditional religious site by practitioners. Tribal entities should designate as confidential information

that falls under Section 304 of the NHPA.

## INTERNATIONAL TRADE COMMISSION

[Investigation No. 332-571]

### U.S. Trade and Investment With Sub-Saharan Africa: Recent Trends and New Developments

**AGENCY:** United States International Trade Commission.

**ACTION:** Institution of investigation and scheduling of public hearing.

**SUMMARY:** Following receipt of a request dated May 6, 2019 from the United States Trade Representative (USTR) under the section 332(g) of the Tariff Act of 1930, the U.S. International Trade Commission (Commission) has instituted Investigation No. 332-571, *U.S. Trade and Investment with Sub-Saharan Africa: Recent Trends and New Developments*, for the purpose of preparing the report requested by the USTR. The Commission has scheduled a public hearing in connection with this investigation for July 24, 2019.

**DATES:**

July 12, 2019: Deadline for filing requests to appear at the public hearing.

July 17, 2019: Deadline for filing pre-hearing briefs and statements.

July 24, 2019: Public hearing.

July 31, 2019: Deadline for filing post-hearing briefs and statements.

August 16, 2019: Deadline for filing all other written submissions.

March 31, 2020: Transmittal of Commission report to USTR.

**ADDRESSES:** All Commission offices, including the Commission's hearing rooms, are located in the United States International Trade Commission Building, 500 E Street SW, Washington, DC. All written submissions should be addressed to the Secretary, United States International Trade Commission, 500 E Street SW, Washington, DC 20436. The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov/edis3-internal/app>.

**FOR FURTHER INFORMATION CONTACT:** Project Leaders Arthur Chambers ([arthur.chambers@usitc.gov](mailto:arthur.chambers@usitc.gov) or 202-205-2766) or Wen Jin (Jean) Yuan

([wenjin.yuan@usitc.gov](mailto:wenjin.yuan@usitc.gov) or 202-205-2383) for information specific to this investigation. For information on the legal aspects of this investigation, contact William Gearhart of the Commission's Office of the General Counsel ([william.gearhart@usitc.gov](mailto:william.gearhart@usitc.gov) or 202-205-3091). The media should contact Margaret O'Laughlin, Office of External Relations ([margaret.olaughlin@usitc.gov](mailto:margaret.olaughlin@usitc.gov) or 202-205-1819). Hearing-impaired individuals may obtain information on this matter by contacting the Commission's TDD terminal at 202-205-1810. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000.

**Background:** The Commission instituted this investigation following receipt of a letter from the USTR dated May 6, 2019. The letter requested that the Commission conduct an investigation and provide a report on U.S. trade and investment with sub-Saharan Africa (SSA). The USTR asked that the Commission's report, to the extent information is available, focus primarily on the years 2016-2018, or the latest three years for which data are available, but where appropriate examine longer-term trends since 2000. The USTR asked that this report should include the following:

1. An overview of U.S. exports of goods and services to SSA, which should, to the extent information is available:

a. Identify the sectors in which U.S. exports of goods and services to SSA have increased the most, in both value and percentage terms, and indicate major factors behind this growth.

b. Identify the SSA countries to which U.S. exports of goods and services have increased the most, in both value and percentage terms, and indicate the major factors behind this growth.

c. Identify SSA countries to which U.S. outward FDI has increased the most, in both value and percentage terms, and indicate major factors behind this growth.

d. Provide examples of how products and services from the United States integrate into key SSA value chains; identify possible opportunities for U.S. firms to better integrate into these value chains, where appropriate; and describe national or regional policies and other macroeconomic factors that may affect future demand for these U.S. products.

2. An overview of U.S. imports of goods and services from SSA, which

should, to the extent information is available:

a. Identify the sectors in which U.S. imports of goods and services from SSA have increased the most, in both value and percentage terms, and indicate major factors behind this growth. Data on goods should include both AGOA (including GSP) imports and total imports.

b. Identify the SSA countries in which exports of goods and services to the United States have increased the most, in both value and percentage terms, and indicate the major factors behind this growth. Data on goods should include both AGOA (including GSP) imports and total imports.

3. To the extent information is available, describe the intellectual property environment, including national and regional laws, enforcement measures, and infringement issues, in key SSA markets. Through case studies describe the effects of the intellectual property environment on trade and investment in the key SSA markets.

4. Provide a broad overview and examples of technological innovation in the SSA food and agricultural production, processing, and marketing system. This should include a broad description of SSA food and agricultural producers' use of technological improvements in such areas as crop and livestock nutrition and genetics (including biotechnology); machinery and equipment; data processing and analytics; and digital market information and risk management systems. Through case studies, describe how the adoption of such technological improvements has affected certain SSA food and agricultural producers' overall production and export performance. Additionally, describe current national and regional regulatory policies and market conditions in key countries in SSA that may affect the adoption of technological improvements in the SSA food and agricultural sector.

5. Provide a broad overview and describe recent developments in the digital economy for key SSA markets. Provide information on the market for digital technologies in those key SSA markets as well as the role of digital products and services from the United States. To the extent that data are available, describe the market for digital products and services, such as internet-connected devices, cloud computing, e-commerce, Internet of Things, blockchain, and internet search and digital content, as well as how adoption of digital technologies affects other industry sectors, such as manufacturing and other services. Describe current national and regional regulatory and
