Dear Robert LaBelle,

Mid-Atlantic Regional Planning Body Members--

Please strongly consider protections for non-invasive recreation in your Ocean Planning. Surfing, sailing, kite boarding, all require clean accessible ocean waters and beaches. While these take place near shore, they are impacted by the much greater expanse of the mid-atlantic waters and estuaries. Your plan must strongly consider this broader environment for protections.

Thank you

Sincerely,

Kent Koping

Mid-Atlantic Regional Planning Body

Dear Regional Planning Body,

The Mid-Atlantic's ocean and bays are beautiful places for families to visit, swim, and fish. Our region's ocean is also an economic powerhouse, contributing more than \$48 billion to the region's gross domestic product (GDP) and nearly 700,000 jobs. And offshore waters serve as migratory corridors and a home for ocean life, including endangered North Atlantic right whales, sea turtles, and many fish species.

As our ocean faces growing challenges of pollution, loss of habitat, and competing industrial uses, it's critical the Mid-Atlantic Regional Ocean Action Plan ensure a healthy ocean today and in the future. I applaud the RPB on its work to complete this first-ever draft Ocean Action Plan. I hope you will incorporate these recommendations below that will make this Plan stronger and more reflective of me, as an ocean user and coastal citizen.

The Final Ocean Action Plan must:

- Develop a robust and effective process for engaging stakeholders in Plan implementation. Right now the draft Plan's public involvement strategies are vague and variable. Stakeholders, project proponents and agencies will all benefit through a consistent, uniform engagement strategy.
- Set a short, definitive deadline - ideally by the end of this year - to identify and post on the Mid-Atlantic Ocean Data Portal areas offshore that are important for the health of marine life (ecologically rich areas or ERAs).
- Strengthen Federal agency commitments to the Plan's tools for coordinating agency decisions. It is unacceptable that even a few actions outlined in the draft Plan do not have a lead federal agency or tasks the entire RPB with overseeing implementation.

With these additions to the Plan, I know our region will take a big step forward toward a healthier Atlantic Ocean.

Sincerely,

Robert Carnevale

Dear Robert LaBelle,

Mid-Atlantic Regional Planning Body Members--

Congratulations on completing a draft of the first comprehensive plan for our oceans in the Mid-Atlantic! We applaud your hard work and commitment to listening to stakeholders like myself in shaping this plan over the last three years.

But it is precisely all of that hard work that is at risk if the final plan is not specific enough or doesn't significantly change how our oceans are managed to keep them healthy and functioning into the future.

Please use all of the data now available to you and delineate where the most productive areas of the ocean are located. Without that information how will we know where to place future projects like offshore wind farms?

The ocean planning process represents a rare opportunity to look into the future and decide what we want our ocean to look like. Please create a final ocean plan for the Mid-Atlantic that gets us to your vision of a healthy, clean, thriving ocean.

Thank you

Mid-Atlantic Regional Planning Body

Dear Regional Planning Body,

The Mid-Atlantic's ocean and bays are beautiful places for families to visit, swim, and fish. Our region's ocean is also an economic powerhouse, contributing more than \$48 billion to the region's gross domestic product (GDP) and nearly 700,000 jobs. And offshore waters serve as migratory corridors and a home for ocean life, including endangered North Atlantic right whales, sea turtles, and many fish species.

As our ocean faces growing challenges of pollution, loss of habitat, and competing industrial uses, it's critical the Mid-Atlantic Regional Ocean Action Plan ensure a healthy ocean today and in the future. I applaud the RPB on its work to complete this first-ever draft Ocean Action Plan. I hope you will incorporate these recommendations below that will make this Plan stronger and more reflective of me, as an ocean user and coastal citizen.

The Final Ocean Action Plan must:

- Develop a robust and effective process for engaging stakeholders in Plan implementation. Right now the draft Plan's public involvement strategies are vague and variable. Stakeholders, project proponents and agencies will all benefit through a consistent, uniform engagement strategy.
- Set a short, definitive deadline - ideally by the end of this year - to identify and post on the Mid-Atlantic Ocean Data Portal areas offshore that are important for the health of marine life (ecologically rich areas or ERAs).
- Strengthen Federal agency commitments to the Plan's tools for coordinating agency decisions. It is unacceptable that even a few actions outlined in the draft Plan do not have a lead federal agency or tasks the entire RPB with overseeing implementation.

With these additions to the Plan, I know our region will take a big step forward toward a healthier Atlantic Ocean.

Sincerely,

Karen McGuinness

Dear Robert LaBelle,

Mid-Atlantic Regional Planning Body Members--

Congratulations on completing a draft of the first comprehensive plan for our oceans in the Mid-Atlantic! We applaud your hard work and commitment to listening to stakeholders like myself in shaping this plan over the last three years.

But it is precisely all of that hard work that is at risk if the final plan is not specific enough or doesn't significantly change how our oceans are managed to keep them healthy and functioning into the future.

Please use all of the data now available to you and delineate where the most productive areas of the ocean are located. Without that information how will we know where to place future projects like offshore wind farms?

The ocean planning process represents a rare opportunity to look into the future and decide what we want our ocean to look like. Please create a final ocean plan for the Mid-Atlantic that gets us to your vision of a healthy, clean, thriving ocean.

Thank you

Thank you for submitting comments on the Draft Mid-Atlantic Regional Ocean Action Plan; we will post them on our website. The MidA RPB will consider all public comments in revising the Draft Plan, and will submit a final Plan to the National Ocean Council for its concurrence this fall. Please check our website <http://www.boem.gov/Ocean-Action-Plan/> for additional information.

Mid-Atlantic Regional Planning Body

Dear Regional Planning Body,

The Mid-Atlantic's ocean and bays are beautiful places for families to visit, swim, and fish. Our region's ocean is also an economic powerhouse, contributing more than \$48 billion to the region's gross domestic product (GDP) and nearly 700,000 jobs. And offshore waters serve as migratory corridors and a home for ocean life, including endangered North Atlantic right whales, sea turtles, and many fish species.

As our ocean faces growing challenges of pollution, loss of habitat, and competing industrial uses, it's critical the Mid-Atlantic Regional Ocean Action Plan ensure a healthy ocean today and in the future. I applaud the RPB on its work to complete this first-ever draft Ocean Action Plan. I hope you will incorporate these recommendations below that will make this Plan stronger and more reflective of me, as an ocean user and coastal citizen.

The Final Ocean Action Plan must:

- Develop a robust and effective process for engaging stakeholders in Plan implementation. Right now the draft Plan's public involvement strategies are vague and variable. Stakeholders, project proponents and agencies will all benefit through a consistent, uniform engagement strategy.
- Set a short, definitive deadline - ideally by the end of this year - to identify and post on the Mid-Atlantic Ocean Data Portal areas offshore that are important for the health of marine life (ecologically rich areas or ERAs).
- Strengthen Federal agency commitments to the Plan's tools for coordinating agency decisions. It is unacceptable that even a few actions outlined in the draft Plan do not have a lead federal agency or tasks the entire RPB with overseeing implementation.

With these additions to the Plan, I know our region will take a big step forward toward a healthier Atlantic Ocean.

Sincerely,

Roberta Jacobs

Dear Robert LaBelle,

Mid-Atlantic Regional Planning Body Members--

Congratulations on completing a draft of the first comprehensive plan for our oceans in the Mid-Atlantic! We applaud your hard work and commitment to listening to stakeholders like myself in shaping this plan over the last three years.

But it is precisely all of that hard work that is at risk if the final plan is not specific enough or doesn't significantly change how our oceans are managed to keep them healthy and functioning into the future.

Please use all of the data now available to you and delineate where the most productive areas of the ocean are located. Without that information how will we know where to place future projects like offshore wind farms?

The ocean planning process represents a rare opportunity to look into the future and decide what we want our ocean to look like. Please create a final ocean plan for the Mid-Atlantic that gets us to your vision of a healthy, clean, thriving ocean.

Mid-Atlantic Regional Planning Body

Dear Regional Planning Body,

The Mid-Atlantic's ocean and bays are beautiful places for families to visit, swim, and fish. Our region's ocean is also an economic powerhouse, contributing more than \$48 billion to the region's gross domestic product (GDP) and nearly 700,000 jobs. And offshore waters serve as migratory corridors and a home for ocean life, including endangered North Atlantic right whales, sea turtles, and many fish species.

As our ocean faces growing challenges of pollution, loss of habitat, and competing industrial uses, it's critical the Mid-Atlantic Regional Ocean Action Plan ensure a healthy ocean today and in the future. I applaud the RPB on its work to complete this first-ever draft Ocean Action Plan. I hope you will incorporate these recommendations below that will make this Plan stronger and more reflective of me, as an ocean user and coastal citizen.

The Final Ocean Action Plan must:

- Develop a robust and effective process for engaging stakeholders in Plan implementation. Right now the draft Plan's public involvement strategies are vague and variable. Stakeholders, project proponents and agencies will all benefit through a consistent, uniform engagement strategy.
- Set a short, definitive deadline - ideally by the end of this year - to identify and post on the Mid-Atlantic Ocean Data Portal areas offshore that are important for the health of marine life (ecologically rich areas or ERAs).
- Strengthen Federal agency commitments to the Plan's tools for coordinating agency decisions. It is unacceptable that even a few actions outlined in the draft Plan do not have a lead federal agency or tasks the entire RPB with overseeing implementation.

With these additions to the Plan, I know our region will take a big step forward toward a healthier Atlantic Ocean.

Sincerely,

Sean Gough

Dear Robert LaBelle,

Mid-Atlantic Regional Planning Body Members--

Congratulations on completing a draft of the first comprehensive plan for our oceans in the Mid-Atlantic! We applaud your hard work and commitment to listening to stakeholders like myself in shaping this plan over the last three years.

But it is precisely all of that hard work that is at risk if the final plan is not specific enough or doesn't significantly change how our oceans are managed to keep them healthy and functioning into the future.

Please use all of the data now available to you and delineate where the most productive areas of the ocean are located. Without that information how will we know where to place future projects like offshore wind farms?

The ocean planning process represents a rare opportunity to look into the future and decide what we want our ocean to look like. Please create a final ocean plan for the Mid-Atlantic that gets us to your vision of a healthy, clean, thriving ocean.

Thank you

Mid-Atlantic Regional Planning Body

Dear Regional Planning Body,

The Mid-Atlantic's ocean and bays are beautiful places for families to visit, swim, and fish. Our region's ocean is also an economic powerhouse, contributing more than \$48 billion to the region's gross domestic product (GDP) and nearly 700,000 jobs. And offshore waters serve as migratory corridors and a home for ocean life, including endangered North Atlantic right whales, sea turtles, and many fish species.

As our ocean faces growing challenges of pollution, loss of habitat, and competing industrial uses, it's critical the Mid-Atlantic Regional Ocean Action Plan ensure a healthy ocean today and in the future. I applaud the RPB on its work to complete this first-ever draft Ocean Action Plan. I hope you will incorporate these recommendations below that will make this Plan stronger and more reflective of me, as an ocean user and coastal citizen.

The Final Ocean Action Plan must:

- Develop a robust and effective process for engaging stakeholders in Plan implementation. Right now the draft Plan's public involvement strategies are vague and variable. Stakeholders, project proponents and agencies will all benefit through a consistent, uniform engagement strategy.
- Set a short, definitive deadline - ideally by the end of this year - to identify and post on the Mid-Atlantic Ocean Data Portal areas offshore that are important for the health of marine life (ecologically rich areas or ERAs).
- Strengthen Federal agency commitments to the Plan's tools for coordinating agency decisions. It is unacceptable that even a few actions outlined in the draft Plan do not have a lead federal agency or tasks the entire RPB with overseeing implementation.

With these additions to the Plan, I know our region will take a big step forward toward a healthier Atlantic Ocean.

Sincerely,

Karen Kent

Dear Robert LaBelle,

Mid-Atlantic Regional Planning Body Members--

Congratulations on completing a draft of the first comprehensive plan for our oceans in the Mid-Atlantic! We applaud your hard work and commitment to listening to stakeholders like myself in shaping this plan over the last three years.

But it is precisely all of that hard work that is at risk if the final plan is not specific enough or doesn't significantly change how our oceans are managed to keep them healthy and functioning into the future.

Please use all of the data now available to you and delineate where the most productive areas of the ocean are located. Without that information how will we know where to place future projects like offshore wind farms?

The ocean planning process represents a rare opportunity to look into the future and decide what we want our ocean to look like. Please create a final ocean plan for the Mid-Atlantic that gets us to your vision of a healthy, clean, thriving ocean.

Thank you

Mid-Atlantic Regional Planning Body

Dear Regional Planning Body,

The Mid-Atlantic's ocean and bays are beautiful places for families to visit, swim, and fish. Our region's ocean is also an economic powerhouse, contributing more than \$48 billion to the region's gross domestic product (GDP) and nearly 700,000 jobs. And offshore waters serve as migratory corridors and a home for ocean life, including endangered North Atlantic right whales, sea turtles, and many fish species.

As our ocean faces growing challenges of pollution, loss of habitat, and competing industrial uses, it's critical the Mid-Atlantic Regional Ocean Action Plan ensure a healthy ocean today and in the future. I applaud the RPB on its work to complete this first-ever draft Ocean Action Plan. I hope you will incorporate these recommendations below that will make this Plan stronger and more reflective of me, as an ocean user and coastal citizen.

The Final Ocean Action Plan must:

- Develop a robust and effective process for engaging stakeholders in Plan implementation. Right now the draft Plan's public involvement strategies are vague and variable. Stakeholders, project proponents and agencies will all benefit through a consistent, uniform engagement strategy.
- Set a short, definitive deadline - ideally by the end of this year - to identify and post on the Mid-Atlantic Ocean Data Portal areas offshore that are important for the health of marine life (ecologically rich areas or ERAs).
- Strengthen Federal agency commitments to the Plan's tools for coordinating agency decisions. It is unacceptable that even a few actions outlined in the draft Plan do not have a lead federal agency or tasks the entire RPB with overseeing implementation.

With these additions to the Plan, I know our region will take a big step forward toward a healthier Atlantic Ocean.

Sincerely,

Arlene Balassaitis

Thank you for submitting comments on the Draft Mid-Atlantic Regional Ocean Action Plan; we will post them on our website. The MidA RPB will consider all public comments in revising the Draft Plan, and will submit a final Plan to the National Ocean Council for its concurrence this fall. Please check our website <http://www.boem.gov/Ocean-Action-Plan/> for additional information.

Thank you for submitting comments on the Draft Mid-Atlantic Regional Ocean Action Plan; we will post them on our website. The MidA RPB will consider all public comments in revising the Draft Plan, and will submit a final Plan to the National Ocean Council for its concurrence this fall. Please check our website <http://www.boem.gov/Ocean-Action-Plan/> for additional information.

Mid-Atlantic Regional Planning Body

Dear Regional Planning Body,

The Mid-Atlantic's ocean and bays are beautiful places for families to visit, swim, and fish. Our region's ocean is also an economic powerhouse, contributing more than \$48 billion to the region's gross domestic product (GDP) and nearly 700,000 jobs. And offshore waters serve as migratory corridors and a home for ocean life, including endangered North Atlantic right whales, sea turtles, and many fish species.

As our ocean faces growing challenges of pollution, loss of habitat, and competing industrial uses, it's critical the Mid-Atlantic Regional Ocean Action Plan ensure a healthy ocean today and in the future. I applaud the RPB on its work to complete this first-ever draft Ocean Action Plan. I hope you will incorporate these recommendations below that will make this Plan stronger and more reflective of me, as an ocean user and coastal citizen.

The Final Ocean Action Plan must:

- Develop a robust and effective process for engaging stakeholders in Plan implementation. Right now the draft Plan's public involvement strategies are vague and variable. Stakeholders, project proponents and agencies will all benefit through a consistent, uniform engagement strategy.
- Set a short, definitive deadline - ideally by the end of this year - to identify and post on the Mid-Atlantic Ocean Data Portal areas offshore that are important for the health of marine life (ecologically rich areas or ERAs).
- Strengthen Federal agency commitments to the Plan's tools for coordinating agency decisions. It is unacceptable that even a few actions outlined in the draft Plan do not have a lead federal agency or tasks the entire RPB with overseeing implementation.

With these additions to the Plan, I know our region will take a big step forward toward a healthier Atlantic Ocean.

Sincerely,

John Bovio

Dear Robert LaBelle,

Mid-Atlantic Regional Planning Body Members--

Congratulations on completing a draft of the first comprehensive plan for our oceans in the Mid-Atlantic! We applaud your hard work and commitment to listening to stakeholders like myself in shaping this plan over the last three years.

But it is precisely all of that hard work that is at risk if the final plan is not specific enough or doesn't significantly change how our oceans are managed to keep them healthy and functioning into the future.

Please use all of the data now available to you and delineate where the most productive areas of the ocean are located. Without that information how will we know where to place future projects like offshore wind farms?

The ocean planning process represents a rare opportunity to look into the future and decide what we want our ocean to look like. Please create a final ocean plan for the Mid-Atlantic that gets us to your vision of a healthy, clean, thriving ocean.

Thank you

Our region's ocean is also an economic powerhouse, contributing more than \$48 billion to the region's gross domestic product (GDP) and nearly 700,000 jobs. And offshore waters serve as migratory corridors and a home for ocean life, including endangered North Atlantic right whales, sea turtles, and many fish species.

As our ocean faces growing challenges of pollution, loss of habitat, and competing industrial uses, it's critical the Mid-Atlantic Regional Ocean Action Plan ensure a healthy ocean today and in the future. I applaud the RPB on its work to complete this first-ever draft Ocean Action Plan. I hope you will incorporate these recommendations below that will make this Plan stronger and more reflective of me, as an ocean user and coastal citizen.

The Final Ocean Action Plan must:

- Develop a robust and effective process for engaging stakeholders in Plan implementation. Right now the draft Plan's public involvement strategies are vague and variable. Stakeholders, project proponents and agencies will all benefit through a consistent, uniform engagement strategy.
- Set a short, definitive deadline - ideally by the end of this year - to identify and post on the Mid-Atlantic Ocean Data Portal areas offshore that are important for the health of marine life (ecologically rich areas or ERAs).
- Strengthen Federal agency commitments to the Plan's tools for coordinating agency decisions. It is unacceptable that even a few actions outlined in the draft Plan do not have a lead federal agency or tasks the entire RPB with overseeing implementation.

With these additions to the Plan, I know our region will take a big step forward toward a healthier Atlantic Ocean.

Sincerely,

Betty Ann Duggan

Congratulations on completing a draft of the first comprehensive plan for our oceans in the Mid-Atlantic! We applaud your hard work and commitment to listening to stakeholders like myself in shaping this plan over the last three years.

But it is precisely all of that hard work that is at risk if the final plan is not specific enough or doesn't significantly change how our oceans are managed to keep them healthy and functioning into the future.

Please use all of the data now available to you and delineate where the most productive areas of the ocean are located. Without that information how will we know where to place future projects like offshore wind farms?

The ocean planning process represents a rare opportunity to look into the future and decide what we want our ocean to look like. Please create a final ocean plan for the Mid-Atlantic that gets us to your vision of a healthy, clean, thriving ocean.

Thank you for submitting comments on the Draft Mid-Atlantic Regional Ocean Action Plan; we will post them on our website. The MidA RPB will consider all public comments in revising the Draft Plan, and will submit a final Plan to the National Ocean Council for its concurrence this fall. Please check our website <http://www.boem.gov/Ocean-Action-Plan/> for additional information.

Mid-Atlantic Regional Planning Body

Dear Regional Planning Body,

The Mid-Atlantic's ocean and bays are beautiful places for families to visit, swim, and fish. Our region's ocean is also an economic powerhouse, contributing more than \$48 billion to the region's gross domestic product (GDP) and nearly 700,000 jobs. And offshore waters serve as migratory corridors and a home for ocean life, including endangered North Atlantic right whales, sea turtles, and many fish species.

As our ocean faces growing challenges of pollution, loss of habitat, and competing industrial uses, it's critical the Mid-Atlantic Regional Ocean Action Plan ensure a healthy ocean today and in the future. I applaud the RPB on its work to complete this first-ever draft Ocean Action Plan. I hope you will incorporate these recommendations below that will make this Plan stronger and more reflective of me, as an ocean user and coastal citizen.

The Final Ocean Action Plan must:

- Develop a robust and effective process for engaging stakeholders in Plan implementation. Right now the draft Plan's public involvement strategies are vague and variable. Stakeholders, project proponents and agencies will all benefit through a consistent, uniform engagement strategy.
- Set a short, definitive deadline - ideally by the end of this year - to identify and post on the Mid-Atlantic Ocean Data Portal areas offshore that are important for the health of marine life (ecologically rich areas or ERAs).
- Strengthen Federal agency commitments to the Plan's tools for coordinating agency decisions. It is unacceptable that even a few actions outlined in the draft Plan do not have a lead federal agency or tasks the entire RPB with overseeing implementation.

With these additions to the Plan, I know our region will take a big step forward toward a healthier Atlantic Ocean.

Sincerely,

Ann Buscher

Dear Robert LaBelle,

Mid-Atlantic Regional Planning Body Members--

Congratulations on completing a draft of the first comprehensive plan for our oceans in the Mid-Atlantic! We applaud your hard work and commitment to listening to stakeholders like myself in shaping this plan over the last three years.

But it is precisely all of that hard work that is at risk if the final plan is not specific enough or doesn't significantly change how our oceans are managed to keep them healthy and functioning into the future.

Please use all of the data now available to you and delineate where the most productive areas of the ocean are located. Without that information how will we know where to place future projects like offshore wind farms?

The ocean planning process represents a rare opportunity to look into the future and decide what we want our ocean to look like. Please create a final ocean plan for the Mid-Atlantic that gets us to your vision of a healthy, clean, thriving ocean.

Thank you

Sincerely,

Christopher Poli

Thank you for submitting comments on the Draft Mid-Atlantic Regional Ocean Action Plan; we will post them on our website. The MidA RPB will consider all public comments in revising the Draft Plan, and will submit a final Plan to the National Ocean Council for its concurrence this fall. Please check our website <http://www.boem.gov/Ocean-Action-Plan/> for additional information.

Mid-Atlantic Regional Planning Body

Dear Regional Planning Body,

The Mid-Atlantic's ocean and bays are beautiful places for families to visit, swim, and fish. Our region's ocean is also an economic powerhouse, contributing more than \$48 billion to the region's gross domestic product (GDP) and nearly 700,000 jobs. And offshore waters serve as migratory corridors and a home for ocean life, including endangered North Atlantic right whales, sea turtles, and many fish species.

As our ocean faces growing challenges of pollution, loss of habitat, and competing industrial uses, it's critical the Mid-Atlantic Regional Ocean Action Plan ensure a healthy ocean today and in the future. I applaud the RPB on its work to complete this first-ever draft Ocean Action Plan. I hope you will incorporate these recommendations below that will make this Plan stronger and more reflective of me, as an ocean user and coastal citizen.

The Final Ocean Action Plan must:

- Develop a robust and effective process for engaging stakeholders in Plan implementation. Right now the draft Plan's public involvement strategies are vague and variable. Stakeholders, project proponents and agencies will all benefit through a consistent, uniform engagement strategy.
- Set a short, definitive deadline - ideally by the end of this year - to identify and post on the Mid-Atlantic Ocean Data Portal areas offshore that are important for the health of marine life (ecologically rich areas or ERAs).
- Strengthen Federal agency commitments to the Plan's tools for coordinating agency decisions. It is unacceptable that even a few actions outlined in the draft Plan do not have a lead federal agency or tasks the entire RPB with overseeing implementation.

With these additions to the Plan, I know our region will take a big step forward toward a healthier Atlantic Ocean.

Sincerely,

Lourdes Cabrales

Dear Regional Planning Body,

The Mid-Atlantic's ocean and bays are beautiful places for families to visit, swim, and fish. Our region's ocean is also an economic powerhouse, contributing more than \$48 billion to the region's gross domestic product (GDP) and nearly 700,000 jobs. And offshore waters serve as migratory corridors and a home for ocean life, including endangered North Atlantic right whales, sea turtles, and many fish species.

As our ocean faces growing challenges of pollution, loss of habitat, and competing industrial uses, it's critical the Mid-Atlantic Regional Ocean Action Plan ensure a healthy ocean today and in the future. I applaud the RPB on its work to complete this first-ever draft Ocean Action Plan. I hope you will incorporate these recommendations below that will make this Plan stronger and more reflective of me, as an ocean user and coastal citizen.

The Final Ocean Action Plan must:

- Develop a robust and effective process for engaging stakeholders in Plan implementation. Right now the draft Plan's public involvement strategies are vague and variable. Stakeholders, project proponents and agencies will all benefit through a consistent, uniform engagement strategy.
- Set a short, definitive deadline - ideally by the end of this year - to identify and post on the Mid-Atlantic Ocean Data Portal areas offshore that are important for the health of marine life (ecologically rich areas or ERAs).
- Strengthen Federal agency commitments to the Plan's tools for coordinating agency decisions. It is unacceptable that even a few actions outlined in the draft Plan do not have a lead federal agency or tasks the entire RPB with overseeing implementation.

With these additions to the Plan, I know our region will take a big step forward toward a healthier Atlantic Ocean.

Sincerely,

Deborah Cerny

Dear Robert LaBelle,

Mid-Atlantic Regional Planning Body Members--

Thank you for the commitment and all the hard work that you have put into shaping and completing a draft of the first comprehensive plan for our oceans in the Mid-Atlantic.

We are hopeful that all of that hard work will accomplish our desired goal, that the final plan will be specific enough to significantly change how our oceans are managed and to keep them healthy and functioning into the future.

Please use all of the data now available to you and delineate where the most productive areas of the ocean are located. Without that information how will we know where to place future projects like offshore wind farms?

The ocean planning process represents a rare opportunity to look into the future and decide what we want our ocean to look like. Please create a final ocean plan for the Mid-Atlantic that gets us to your vision of a healthy, clean, thriving ocean.

Thank you

Sincerely,

Dear Robert LaBelle,

Mid-Atlantic Regional Planning Body Members--

Congratulations on completing a draft of the first comprehensive plan for our oceans in the Mid-Atlantic! We applaud your hard work and commitment to listening to stakeholders like myself in shaping this plan over the last three years.

But it is precisely all of that hard work that is at risk if the final plan is not specific enough or doesn't significantly change how our oceans are managed to keep them healthy and functioning into the future.

Please use all of the data now available to you and delineate where the most productive areas of the ocean are located. Without that information how will we know where to place future projects like offshore wind farms?

The ocean planning process represents a rare opportunity to look into the future and decide what we want our ocean to look like. Please create a final ocean plan for the Mid-Atlantic that gets us to your vision of a healthy, clean, thriving ocean.

I hope you will incorporate these recommendations below that will make this Plan stronger and more reflective of me, as an ocean user and coastal citizen.

The Final Ocean Action Plan must:

- Develop a robust and effective process for engaging stakeholders in Plan implementation. Right now the draft Plan's public involvement strategies are vague and variable. Stakeholders, project proponents and agencies will all benefit through a consistent, uniform engagement strategy.
- Set a short, definitive deadline - ideally by the end of this year - to identify and post on the Mid-Atlantic Ocean Data Portal areas offshore that are important for the health of marine life (ecologically rich areas or ERAs).
- Strengthen Federal agency commitments to the Plan's tools for coordinating agency decisions. It is unacceptable that even a few actions outlined in the draft Plan do not have a lead federal agency or tasks the entire RPB with overseeing implementation.

With these additions to the Plan, I know our region will take a big step forward toward a healthier Atlantic Ocean.

Sincerely,

Lauren Ellul

Thank you for submitting comments on the Draft Mid-Atlantic Regional Ocean Action Plan; we will post them on our website. The MidA RPB will consider all public comments in revising the Draft Plan, and will submit a final Plan to the National Ocean Council for its concurrence this fall. Please check our website <http://www.boem.gov/Ocean-Action-Plan/> for additional information.

Mid-Atlantic Regional Planning Body

Dear Regional Planning Body,

The Mid-Atlantic's ocean and bays are beautiful places for families to visit, swim, and fish. Our region's ocean is also an economic powerhouse, contributing more than \$48 billion to the region's gross domestic product (GDP) and nearly 700,000 jobs. And offshore waters serve as migratory corridors and a home for ocean life, including endangered North Atlantic right whales, sea turtles, and many fish species.

As our ocean faces growing challenges of pollution, loss of habitat, and competing industrial uses, it's critical the Mid-Atlantic Regional Ocean Action Plan ensure a healthy ocean today and in the future. I applaud the RPB on its work to complete this first-ever draft Ocean Action Plan. I hope you will incorporate these recommendations below that will make this Plan stronger and more reflective of me, as an ocean user and coastal citizen.

The Final Ocean Action Plan must:

- Develop a robust and effective process for engaging stakeholders in Plan implementation. Right now the draft Plan's public involvement strategies are vague and variable. Stakeholders, project proponents and agencies will all benefit through a consistent, uniform engagement strategy.

Dear Robert LaBelle,

Mid-Atlantic Regional Planning Body Members--

Congratulations on completing a draft of the first comprehensive plan for our oceans in the Mid-Atlantic! We applaud your hard work and commitment to listening to stakeholders like myself in shaping this plan over the last three years.

But it is precisely all of that hard work that is at risk if the final plan is not specific enough or doesn't significantly change how our oceans are managed to keep them healthy and functioning into the future.

Please use all of the data now available to you and delineate where the most productive areas of the ocean are located. Without that information how will we know where to place future projects like offshore wind farms?

The ocean planning process represents a rare opportunity to look into the future and decide what we want our ocean to look like. Please create a final ocean plan for the Mid-Atlantic that gets us to your vision of a healthy, clean, thriving ocean.

Thank you

Dear Robert LaBelle,

Mid-Atlantic Regional Planning Body Members--

Congratulations on completing a draft of the first comprehensive plan for our oceans in the Mid-Atlantic! We applaud your hard work and commitment to listening to stakeholders like myself in shaping this plan over the last three years.

But it is precisely all of that hard work that is at risk if the final plan is not specific enough or doesn't significantly change how our oceans are managed to keep them healthy and functioning into the future.

Please use all of the data now available to you and delineate where the most productive areas of the ocean are located. Without that information how will we know where to place future projects like offshore wind farms?

The ocean planning process represents a rare opportunity to look into the future and decide what we want our ocean to look like. Please create a final ocean plan for the Mid-Atlantic that gets us to your vision of a healthy, clean, thriving ocean.

Aug 11, 2016

Mid-Atlantic Regional Planning Body

Dear Regional Planning Body,

The Mid-Atlantic's ocean and bays are beautiful places for families to visit, swim, and fish. Our region's ocean is also an economic powerhouse, contributing more than \$48 billion to the region's gross domestic product (GDP) and nearly 700,000 jobs. And offshore waters serve as migratory corridors and a home for ocean life, including endangered North Atlantic right whales, sea turtles, and many fish species.

As our ocean faces growing challenges of pollution, loss of habitat, and competing industrial uses, it's critical the Mid-Atlantic Regional Ocean Action Plan ensure a healthy ocean today and in the future. I applaud the RPB on its work to complete this first-ever draft Ocean Action Plan. I hope you will incorporate these recommendations below that will make this Plan stronger and more reflective of me, as an ocean user and coastal citizen.

The Final Ocean Action Plan must:

- Develop a robust and effective process for engaging stakeholders in Plan implementation. Right now the draft Plan's public involvement strategies are vague and variable. Stakeholders, project proponents and agencies will all benefit through a consistent, uniform engagement strategy.
- Set a short, definitive deadline - ideally by the end of this year - to identify and post on the Mid-Atlantic Ocean Data Portal areas offshore that are important for the health of marine life (ecologically rich areas or ERAs).
- Strengthen Federal agency commitments to the Plan's tools for coordinating agency decisions. It is unacceptable that even a few actions outlined in the draft Plan do not have a lead federal agency or tasks the entire RPB with overseeing implementation.

With these additions to the Plan, I know our region will take a big step forward toward a healthier Atlantic Ocean.

Sincerely,

Michele Horenstein

Congratulations on completing a draft of the first comprehensive plan for our oceans in the Mid-Atlantic! We applaud your hard work and commitment to listening to stakeholders like myself in shaping this plan over the last three years.

But it is precisely all of that hard work that is at risk if the final plan is not specific enough or doesn't significantly change how our oceans are managed to keep them healthy and functioning into the future.

Please use all of the data now available to you and delineate where the most productive areas of the ocean are located. Without that information how will we know where to place future projects like offshore wind farms?

The ocean planning process represents a rare opportunity to look into the future and decide what we want our ocean to look like. Please create a final ocean plan for the Mid-Atlantic that gets us to your vision of a healthy, clean, thriving ocean.

Thank you

Aug 12, 2016

Mid-Atlantic Regional Planning Body

Dear Regional Planning Body,

As a conservation professional I recognize that the Mid-Atlantic's ocean and bays are beautiful places for families to visit, swim, and fish. Our region's ocean is also an economic powerhouse, contributing more than \$48 billion to the region's gross domestic product (GDP) and nearly 700,000 jobs. And offshore waters serve as migratory corridors and a home for ocean life, including endangered North Atlantic right whales, sea turtles, and many fish species.

As our ocean faces growing challenges of pollution, loss of habitat, and competing industrial uses, it's critical the Mid-Atlantic Regional Ocean Action Plan ensure a healthy ocean today and in the future. I applaud the RPB on its work to complete this first-ever draft Ocean Action Plan. I hope you will incorporate these recommendations below that will make this Plan stronger and more reflective of me, as an ocean user and coastal citizen.

The Final Ocean Action Plan must:

- Develop a robust and effective process for engaging stakeholders in Plan implementation. Right now the draft Plan's public involvement strategies are vague and variable. Stakeholders, project proponents and agencies will all benefit through a consistent, uniform engagement strategy.
- Set a short, definitive deadline - ideally by the end of this year - to identify and post on the Mid-Atlantic Ocean Data Portal areas offshore that are important for the health of marine life (ecologically rich areas or ERAs).
- Strengthen Federal agency commitments to the Plan's tools for coordinating agency decisions. It is unacceptable that even a few actions outlined in the draft Plan do not have a lead federal agency or tasks the entire RPB with overseeing implementation.

With these additions to the Plan, I know our region will take a big step forward toward a healthier Atlantic Ocean.

Sincerely,

Hugh Carola

Mid-Atlantic Regional Planning Body

Dear Regional Planning Body,

The Mid-Atlantic's ocean and bays are beautiful places for families to visit, swim, and fish. Our region's ocean is also an economic powerhouse, contributing more than \$48 billion to the region's gross domestic product (GDP) and nearly 700,000 jobs. And offshore waters serve as migratory corridors and a home for ocean life, including endangered North Atlantic right whales, sea turtles, and many fish species.

As our ocean faces growing challenges of pollution, loss of habitat, and competing industrial uses, it's critical the Mid-Atlantic Regional Ocean Action Plan ensure a healthy ocean today and in the future. I applaud the RPB on its work to complete this first-ever draft Ocean Action Plan. I hope you will incorporate these recommendations below that will make this Plan stronger and more reflective of me, as an ocean user and coastal citizen.

The Final Ocean Action Plan must:

- Develop a robust and effective process for engaging stakeholders in Plan implementation. Right now the draft Plan's public involvement strategies are vague and variable. Stakeholders, project proponents and agencies will all benefit through a consistent, uniform engagement strategy.
- Set a short, definitive deadline - ideally by the end of this year - to identify and post on the Mid-Atlantic Ocean Data Portal areas offshore that are important for the health of marine life (ecologically rich areas or ERAs).
- Strengthen Federal agency commitments to the Plan's tools for coordinating agency decisions. It is unacceptable that even a few actions outlined in the draft Plan do not have a lead federal agency or tasks the entire RPB with overseeing implementation.

With these additions to the Plan, I know our region will take a big step forward toward a healthier Atlantic Ocean.

Sincerely,

Ramona J Wirick
