**34 STATES RECEIVE \$122 MILLION AS FIRST QUARTER
SHARE OF 1995 FEDERAL MINERAL REVENUES (#50029)**

The U.S. Department of the Interior's Minerals Management Service (MMS) today announced that it distributed more than \$122 million to 34 states during the first three months of 1995. The money represents the states' cumulative share of revenues collected for mineral production on federal lands located within their borders and from federal offshore oil and gas tracts adjacent to the state /federal water boundary.

The MMS is responsible for collecting, accounting for, auditing and disbursing revenues associated with mineral leases on federal and Indian lands. Disbursements are made to states on a monthly basis, as bonuses, rents, royalties and other revenues are collected.

A state is entitled to a share of the mineral revenues collected from federal lands located within that state s boundaries. For the majority of federal lands, states and the federal government share the revenues: 50 percent to the state,

40 percent to the Reclamation Fund for water projects, and 10 percent to the U.S. Treasury. One exception, Alaska, gets a 90-percent share, as prescribed by the Alaska Statehood Act.

Certain coastal states with federal offshore tracts adjacent to their seaward boundaries receive 27 percent of those mineral royalties. The remaining 73 percent of revenues from federal offshore leases is deposited in special accounts of the U.S. Treasury, including the General Fund, the Land and Water Conservation Fund, and the Historic Preservation Fund.

In 1994, more than \$537 million was distributed to 38 state treasuries. As of the first quarter of 1995, \$122 million was distributed to the following 34 states:

AL ... \$1,814,001.49	MI ... \$225,298.25	PA ... \$6,800.08
