Oil-Spill Risk Analysis: Gulf of Mexico Outer Continental Shelf (OCS) Lease Sales, Eastern Planning Area, 2003-2007, and Gulfwide OCS Program, 2003-2042

The Minerals Management Service recently released its report, Oil-Spill Risk Analysis: Gulf of Mexico Outer Continental Shelf (OCS) Lease Sales, Eastern Planning Area, 2003-2007, and Gulfwide OCS Program 2003-2042, by Zhen-Gang Ji, Walter R. Johnson, Charles F. Marshall, Gail B. Rainey, and Eileen M. Lear (ed.). This report summarizes the results of the oil-spill trajectory analysis that was used to estimate potential oil-spill risks from OCS activities in the Eastern Gulf of Mexico, and serves as support documentation for the relevant Environmental Impact Statement. Copies of OCS Report MMS 2002-069 are available from the Environmental Division, 381 Elden Street, Herndon, VA 20170, while supply lasts. It can be found on the internet at: www.mms.gov/itd/pubs/2002/2002-069.pdf. Copies are also available through the National Technical Information Service, 5285 Port Royal Rd., Springfield, VA 22161 (Accession No. PB2003-101120) at a cost of \$27.00 for paper copy or CD-ROM (Price Code A05); \$12.00 for microfiche (A01); and \$8.95 for electronic download (A00).
