

The offshore cadastre used in the Gulf of Mexico is based on the North American Datum of 1927. Refer to the appropriate Official Protraction Diagrams.

STRAITS OF FLORIDA PLANNING AREA

The boundaries of the regular blocks are 4,800 international meters on a side and contain 2,304 hectares. The regular boundaries are defined in terms of X and Y coordinates of the Universal Transverse Mercator Grid System based on the Geodetic Reference System (GRS) 1980 Ellipsoid.

The Submerged Lands Act Boundary depicted hereon reflects the official Federal position for Submerged Lands Act and OCS Lands Act purposes. The areas of the fractional blocks abutting this line have been determined and are as depicted on the Supplemental Official OCS Block Diagrams (SOBDs). Consult the SOBDs for official descriptions and approval dates.

Onshore planimetric base compilation is from NOAA 1:70 000 Digital Shoreline, v1B, September, 1994.

This revised diagram supersedes protraction diagram WEST PALM BEACH NG17-05, approved 13-MAR-1997.

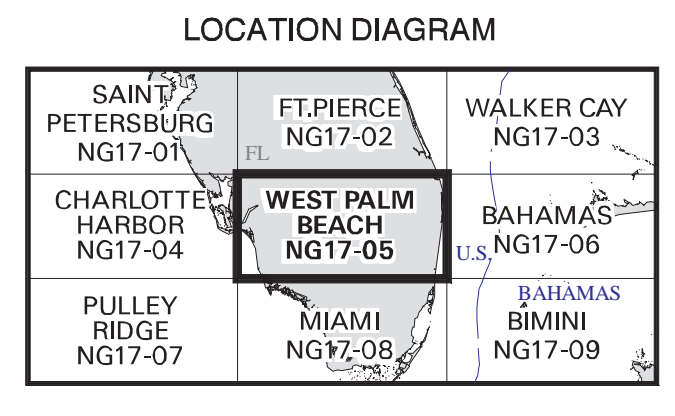

Subdivision of Blocks on the Outer Continental Shelf
Typical method of subdivision of the regular blocks, each subdivision being an integral part of the total, based on midpoint subdivision throughout.
