

The boundaries of the regular blocks are 4,800 international meters on a side and contain 2,304 hectares. The regular boundaries are defined in terms of X and Y coordinates of the Universal Transverse Mercator Grid System based on the Geodetic Reference System (GRS) 1980 Ellipsoid.

Although not shown, the 200 nautical mile Continental Shelf Boundary lies within this diagram.

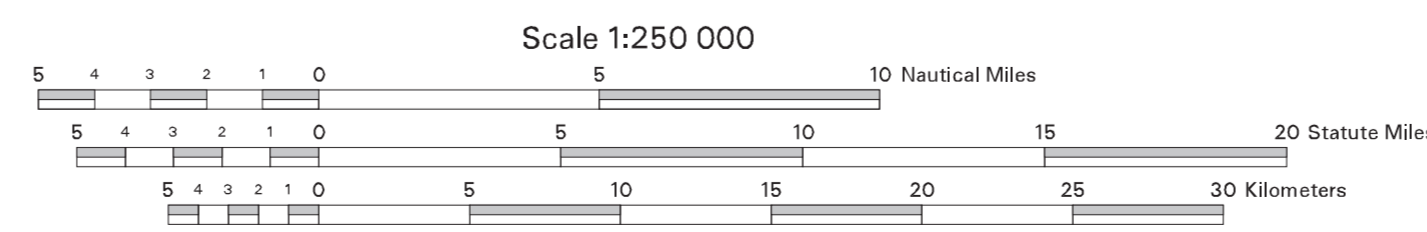

This revised diagram supersedes protraction diagram BLAKE SPUR NH18-04, approved 23-AUG-1996.

Areas and dimensions of the irregular blocks along the zone boundary are as indicated.

Subdivision of Blocks on the Outer Continental Shelf
Typical method of subdivision of the regular blocks, each subdivision being an integral part of the total, based on midpoint subdivision throughout.
