These evacuations are equivalent to 4.4% of 819 manned platforms and 11.4% of 140 rigs currently operating in the GOM.

This shut-in oil production is equivalent to 1.74% of daily production of oil in GOM, which is currently approximately 1.46 million BOPD.

This shut-in gas production is equivalent to 3.28% of the daily production of gas in the GOM, which is currently approximately 10.8 BCFPD.

MMS, part of the U.S. Department of the Interior, oversees 1.76 billion acres of the Outer Continental Shelf, managing offshore energy and minerals while protecting the human, marine, and coastal environments through advanced science and technology research. The OCS provides 30 percent of oil and 23 percent of natural gas produced domestically, and sand used for coastal restoration. MMS collects, accounts for, and disburses mineral revenues from Federal and American Indian lands, with Fiscal Year 2004 disbursements of approximately \$8 billion and more than \$143 billion since 1982. The Land and Water Conservation Fund, which pays for cooperative conservation, grants to states, and Federal land acquisition, gets nearly \$1 billion a year.
