

NORTH ATLANTIC OCEAN

The offshore cadastral used in the North Atlantic Ocean is based on the North American Datum of 1983. Refer to the appropriate Official Protraction Diagrams.

All blocks are based on the Universal Transverse Mercator Grid System, Zone 17, with X origin = 1,640,416.67 feet (500,000 international meters), at 81° West Longitude, and Y origin = 0 feet at 0° Latitude. The boundaries of the regular blocks are 15,840 feet on a side and contain 5,760 acres.

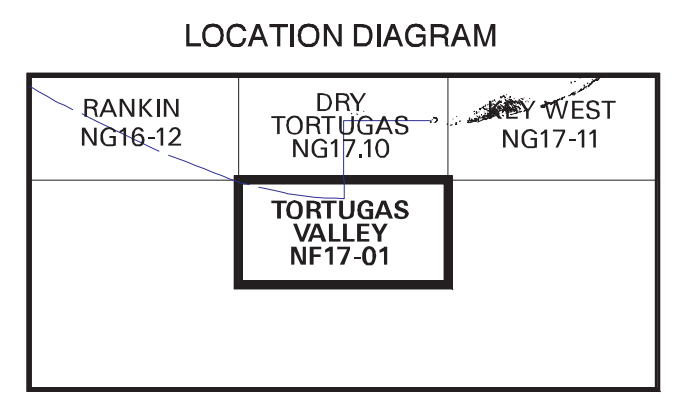

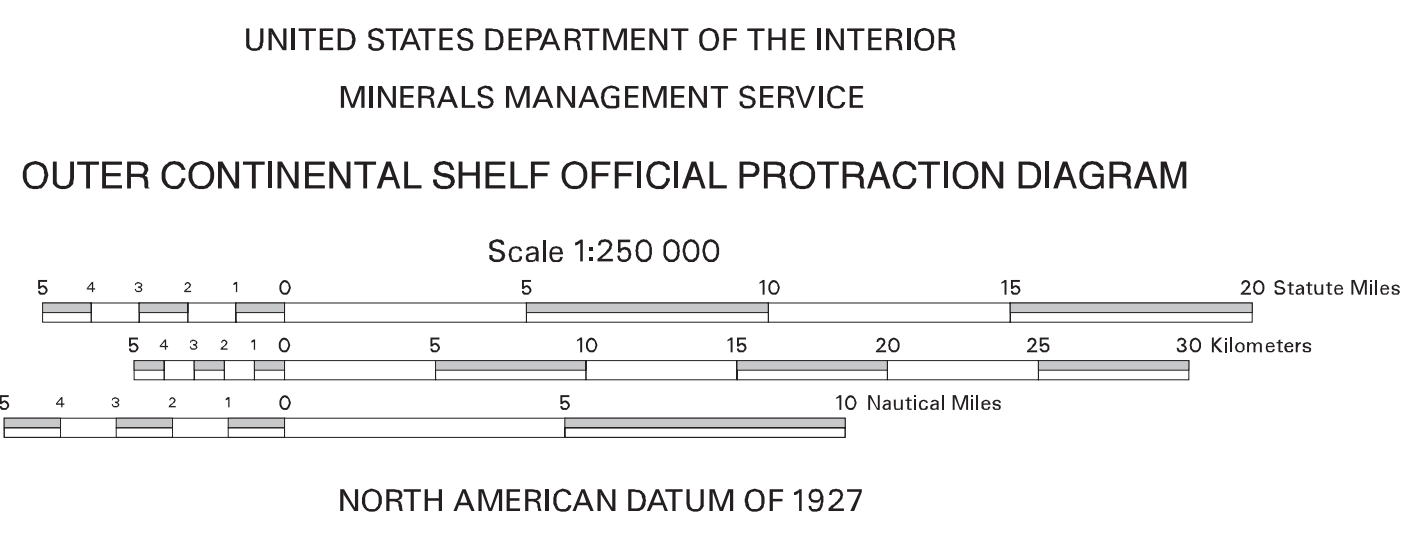

The United States-Cuba Maritime Boundary depicted here is provisional, pending the entry into force of applicable boundary delimitation agreements and, beyond 200 nautical miles, pending the establishment of United States continental shelf jurisdiction, if any.

This revised diagram supersedes protraction diagram TORTUGAS VALLEY NF17-01, approved 20-SEP-1985, and revised 20-SEP-1989.

The coordinate values appearing on this document were derived using North American Datum of 1927.

The areas of the fractional blocks abutting the U.S. - Cuba Maritime Boundary and the dividing line between the North Atlantic Ocean and the Gulf of Mexico have been determined and are as depicted on the Supplemental Official OCS Block Diagrams (SOBD's). Consult the SOBD's for official descriptions and approval dates.

Copies of these diagrams and other information may be obtained at the appropriate MMS OCS Region, Office of Program Services.

This diagram is prepared in accordance with 30 CFR 2568
