Updated Monthly

Footnotes/Definitions:

1. A Planning Area is a large, contiguous portion of the OCS, consisting of defined OCS blocks, considered as an entity for administrative planning purposes. The quantity and size of a planning area can vary by Region.

2. An Active Lease is a lease that has been executed by the Lessor and the Lessee(s), has an effective date and has not been

3. A Producing lease is an active lease that has produced product i.e. oil or gas, or both. A non-producing lease is an active lease

4. There are currently no active leases split between CGOM and EGOM; thus there is no longer a small variation in acreage and

5. There are 4 planning areas in the Pacific Region but only 1 planning area with existing leases.

6. There are 15 planning areas in the Alaska Region, but only two planning areas with leases.

Combined Leasing Report As of February 1, 2022

Updated Monthly

Footnotes/Definitions:

1. A Planning Area is a large, contiguous portion of the OCS, consisting of defined OCS blocks, considered as an entity for administrative planning purposes. The quantity and size of a planning area can vary by Region.

2. An Active Lease is a lease that has been executed by the Lessor and the Lessee(s), has an effective date and has not been relinquished, expired, or terminated. Some leases have more than one block. Blocks are generally 9 square miles but can vary. Slight numerical discrepancies are the result of the processes used during the rounding of acreage.

3. A Producing lease is an active lease that has produced product i.e. oil or gas, or both. A non-producing lease is an active lease that has not produced product. NOTE: There can be a difference in the definition for producing and non-producing leases between BOEM and ONRR (i.e. time lag, fiscal versus calendar year, etc) because of different purposes in collecting data (i.e. operations versus revenue collection.)

4. There are currently no active leases split between CGOM and EGOM; thus there is no longer a small variation in acreage and production.

5. There are 4 planning areas in the Pacific Region but only 1 planning area with existing leases.

6. There are 15 planning areas in the Alaska Region, but only two planning areas with leases.

Footnotes/Definitions:

1. A Planning Area is a large, contiguous portion of the OCS, consisting of defined OCS blocks, considered as an entity for administrative planning purposes. The quantity and size of a planning area can vary by Region.

2. An Active Lease is a lease that has been executed by the Lessor and the Lessee(s), has an effective date and has not been relinquished, expired, or terminated. Some leases have more than one block. Blocks are generally 9 square miles but can vary. Slight numerical discrepancies are the result of the processes used during the rounding of acreage.

3. A Producing lease is an active lease that has produced product i.e. oil or gas, or both. A non-producing lease is an active lease that has not produced product. NOTE: There can be a difference in the definition for producing and non-producing leases between BOEM and ONRR (i.e. time lag, fiscal versus calendar year, etc) because of different purposes in collecting data (i.e. operations versus revenue collection.)

4. There are currently no active leases split between CGOM and EGOM; thus there is no longer a small variation in acreage and production.

5. There are 4 planning areas in the Pacific Region but only 1 planning area with existing leases.

6. There are 15 planning areas in the Alaska Region, but only two planning areas with leases.
