

The boundaries of the regular blocks are 4,800 international meters on a side and contain 2,304 hectares. The regular boundaries are defined in terms of X and Y coordinates of the Universal Transverse Mercator Grid System based on the Geodetic Reference System (GRS) 80 Ellipsoid.

Onshore planimetric base compilation is from U.S.G.S. 1:250,000 series (United States) topographic sheets with coastline revised to agree with current (as of date of this diagram) NOS nautical charts.

The coordinate values appearing on this document were derived using the North American Datum of 1983.

The areas of the fractional blocks abutting the State Seaward Boundary and the Limit of (B)(g) Zone have been determined and are as depicted on the Supplemental Official Block Diagrams.

The Alaska Maritime National Wildlife Refuge consists of all public lands in the coastal waters and adjacent seas of Alaska consisting of islands, islets, rocks, reefs, capes and spires, as well as designated mainland areas.
