

The boundaries of the regular blocks are 4,900 international meters on a side and contain 2,304 hectares. The regular boundaries are defined in terms of X and Y coordinates of the Universal Transverse Mercator Grid System based on the Geodetic Reference System (GRS) 80 Ellipsoid.

The coordinate values appearing on this document were derived using the North American Datum of 1983. The areas of the fractional blocks abutting the State Seaward Boundary and the Limit of 8(g) Zone have been determined and are as depicted on the Supplemental Official Block Diagrams.
