

The boundaries of the regular blocks are 4,800 international meters on a side and contain 2,304 hectares. The regular boundaries are defined in terms of X and Y coordinates of the Universal Transverse Mercator Grid System based on the Geodetic Reference System (GRS) 1980 Ellipsoid.

Onshore planimetric base compilation is from Alaska Department of Natural Resources, 1:250,000 U.S.G.S. quadrangle maps dated 1950's to 1980's.

This revised diagram supersedes protraction diagram DE LONG MOUNTAINS NR03-08, approved 01-OCT-1991, and revised 31-DEC-1994.

The coordinate values appearing on this document were derived using NAD 83/WGS 84.

The State Seaward Boundary line depicted herein reflects the official federal position for Submerged Lands Act purposes. The areas of the fractional blocks abutting this line have been determined and are as depicted on the Supplemental Official OCS Block Diagrams (SOBD's). Consult the SOBD's for official descriptions and approval dates.

Copies of these diagrams and other information may be obtained at the appropriate MMS OCS Region, Office of Program Services.
