Phillips Petroleum Company
1306 Santa Barbara Street
Santa Barbara, California 93104

Attention: Mr. F. R. Davis

Gentlemen:

Your partial plan of development of lease OCS-P 0166 locates Platform Hogan at coordinates of X = 1,006,354, Y = 905,646, Lambert Grid Zone 6. This platform has slots for 66 wells. Fifty-six of these slots are assigned to the present lease, and eight slots are assigned to unleased acreage between State lease PRC 3150.1 and lease OCS-P 0166, but could be used for injection wells or infill wells. The spacing of wells as shown on the accompanying plat is a modified five-acre program.

Two drilling rigs will be used, and the first six wells will offset production from State lands. The bottom hole locations will be within a target area 100' x 200'. The northeast line of the target will be 100' from the present lease line.

The development plan of that portion of the lease which will be developed from Platform Hogan is hereby approved. A development program of the westerly portion of the lease, which will be developed from Platform B, should be submitted at a later date.

As the geology is complicated, revisions may be necessary. Approval of any change of the above approved plan must be obtained from this office.

This approval is subject to change or cancellation in its entirety if at any time in our opinion the best interest of the Government is not adequately protected.

Sincerely yours,

(Orig. Sgd.) F. J. SCHAMBECK
