

H
Houchin

December 18, 1968

Phillips Petroleum Company
1306 Santa Barbara Street
Santa Barbara, California 93104

Attention: Mr. F. R. Davis

Gentlemen:

In your letter of December 5, 1968, you requested approval of your proposed supplemental plan of development of lease OCS-P 0166.

The eastern portion of the lease is presently being developed from Platform Hogan with two drilling rigs.

Platform Houchin is now being constructed at the following Grid Zone 6 coordinates:

X = 1,003,115
Y = 804,772

You propose to develop the western portion of the lease on the same modified five acre spacing used in the easterly portion. Two drilling rigs on Platform Houchin will be used in this development with the first six wells to offset the western lease boundary. These offsetting wells will be directionally drilled to a 100 foot x 200 foot target area the west line of which is 100 feet from the lease boundary.

The proposed supplemental plan of development is approved as requested. Any change in this plan must receive prior approval from this office.

This approval is subject to change or cancellation in its entirety if at any time in our opinion the best interest of the Government is not adequately protected.

Sincerely yours,

(Orig. Sgd.) H. T. CYPHER, Jr.

H. T. Cypher
Acting Regional
Oil and Gas Supervisor
