

# Outer Continental Shelf Renewable Energy Leases and Rights-of-Way

## Planned Activities Scenario

### How Does BOEM Assess the Impacts of Planned Activities?

- ◆ Analyze the impacts of the No Action Alternative
- ◆ Analyze the impacts of each action alternative
- ◆ Analyze the impacts of other reasonable foreseeable activities
- ◆ Analyze the combined impacts of each alternative (No Action and action alternatives) when combined with impacts from other reasonably foreseeable activities

### Ongoing and Planned Activities

- ◆ Other offshore wind energy development activities (see map to left)
- ◆ Undersea transmission lines, gas pipelines, and other submarine cables (e.g., telecommunications)
- ◆ Tidal energy projects
- ◆ Marine minerals use and ocean-dredged material disposal
- ◆ Military use
- ◆ Marine transportation (commercial, recreational, and research-related)
- ◆ Fisheries use, management, and monitoring surveys
- ◆ Global climate change
- ◆ Oil and gas activities
- ◆ Onshore development activities

For more information on renewable energy leases issued by BOEM, visit:  
<https://www.boem.gov/renewable-energy/state-activities>

For more information on the planned activities scenario, see Appendix D of the Draft Environmental Impact Statement available at this link: <https://www.boem.gov/renewable-energy/state-activities/atlantic-shores-offshore-wind-south-draft-environmental-impact>
