

## **APPENDIX G**

### **Environmental and Physical Settings and Supplemental Information**

Section 508 of the Rehabilitation Act of 1973 requires that the information in federal documents be accessible to individuals with disabilities. The Bureau of Ocean Energy Management has made every reasonable effort to ensure that the information in this document is accessible. If you have any problems accessing the information, please contact BOEM's Office of Public Affairs at [boempublicaffairs@boem.gov](mailto:boempublicaffairs@boem.gov) or (202) 208-6474.

## **Introduction**

This appendix provides information on the environmental and physical settings of the Lease Area and information by resource or topic, as applicable, that supplements the information provided in the Revolution Wind Farm (RWF) and Revolution Wind Export Cable (RWEC) Project environmental impact statement (EIS).

## **Environmental and Physical Settings**

This section addresses the physical, geological, and biological settings in the vicinity of the RWF and RWEC Project (the Project). As directed under Section 1501.12 of the Council on Environmental Quality's (CEQ's) revised National Environmental Policy Act (NEPA) regulations, this EIS incorporates, by reference, the detailed analysis provided in the Vineyard Wind final EIS in Appendix E (Bureau of Ocean Energy Management [BOEM] 2021).

For more specific environmental and physical setting information, the reader is referred to the following COP sections in the *Construction and Operations Plan Revolution Wind Farm* (COP) (vhb 2022):

- General regional setting: See Sections 4.6.7 and 4.3.1 of the COP. These sections describe current land uses and land cover types in the vicinity of the onshore Project components.
- Climate: See Section 4.2.1 of the COP. This section describes current air quality in the vicinity of the RWF and RWEC.
- Physical oceanography and meteorology: See Section 4.2.4 of the COP. This section provides detailed information on physical oceanographic conditions, including circulation, currents, and water column stratification by temperature and salinity, as well as meteorological conditions such as wind speed and direction, occurrence of storms and cyclones, and ice and fog. Few hurricanes pass through New England, but the area is subjected to frequent Nor'easters that form offshore between Georgia and New Jersey and typically reach maximum intensity in New England. These storms are usually characterized by winds from the northeast and can bring heavy precipitation, wind, storm surges, and rough seas. They primarily occur between September and April but can form any time of year. Although hurricanes are relatively infrequent in New England, wave heights up to 30 feet (9 meters [m]) were recorded south of Block Island (Scripps Buoy 44097) during Hurricane Sandy in 2012 (National Oceanic and Atmospheric Administration, National Weather Service 2012).
- Geological resources: See Section 4.2.3 of the COP. This section describes the regional geological setting as well as specific marine geophysical and geotechnical site investigations conducted for the RWF in accordance with BOEM regulations 30 CFR 585.
- Biological resources: See Sections 4.3.2 to 4.3.7 of the COP. These sections describe current types and status of terrestrial and marine resources in the vicinity of the RWF and RWEC.

Analysis of potential impacts to these resources from all offshore wind activities is provided in the EIS as part of each resource's No Action Alternative discussion. Discussion of impacts as a result of the Proposed Action references the No Action Alternative where possible to reduce replication and focus the

analysis to the differences among alternatives. EPMS and any other measures that would be implemented to monitor or minimize resource impacts are discussed in Appendix F.

## **Avian and Bat Post-Construction Monitoring Framework**

Revolution Wind, LLC (Revolution Wind) has developed a draft avian and bat post-construction monitoring plan for the Project that summarizes the approach to monitoring; describes overarching monitoring goals and objectives; identifies the key avian species, priority questions, and data gaps unique to the region and Lease Area that would be addressed through monitoring; and describes methods and time frames for data collection, analysis, and reporting (see COP Appendix AA [Biodiversity Research Institute 2021]). Post-construction monitoring would assess impacts of the Project with the purpose of filling select information gaps and supporting validation of the Project's avian risk assessment. Focus may be placed on improving knowledge of Endangered Species Act (ESA)-listed species occurrence and movements offshore, avian collision risk, species/species group displacement, or similar topics. Where possible, monitoring conducted by Revolution Wind would build on and align with post-construction monitoring conducted by the other Orsted/Eversource offshore wind projects in the Northeast region. Revolution Wind would engage with federal and state agencies and environmental groups to identify appropriate monitoring options and technologies and to facilitate acceptance of the final avian and bat post-construction monitoring plan (see COP Appendix AA [Biodiversity Research Institute 2021]).

The content of the draft *Revolution Wind Avian and Bat Post-Construction Monitoring Framework* is provided below and is a direct excerpt from the *Assessment of the Potential Effects of the Revolution Offshore Wind Farm on Birds and Bats* (COP Appendix AA [Biodiversity Research Institute 2021:232–236]). Full references supporting this excerpt's author-year citations can be found in COP Appendix AA.

### **Introduction**

Revolution Wind LLC (Revolution Wind), a 50/50 joint venture between Orsted North America Inc. (Orsted NA) and Eversource Investment LLC (Eversource), proposes to construct and operate the RWF and the RWEC, collectively the Revolution Wind Farm Project (hereinafter referred to as the Project). The wind farm portion of the Project will be in Bureau of Ocean Energy Management (BOEM) Renewable Energy Lease Area OCS-A 0486 (Lease Area), southeast of Point Judith, Rhode Island, and east of Block Island, Rhode Island. The Project's generating capacity will range between 704

megawatts (MW) and 880 MW. This RWF Avian and Bat Post-Construction Monitoring Framework (hereafter the “Framework”) focuses solely on the offshore footprint of the Project within the Lease Area, and does not apply to the offshore export cable, cable landfall, or onshore portions of the Project.

Revolution Wind has developed this Framework to outline an approach to post-construction monitoring that supports advancement of the understanding of bird and bat interactions with offshore wind farms. The scope of monitoring is designed to meet federal requirements [30 CFR 585.626(b)(15) and 585.633(b)] and is scaled to the size and risk profile of the Project with a focus on species of conservation concern.

The intent of the Framework is to outline overarching monitoring objectives, monitoring questions, proposed monitoring elements, and reporting requirements. A detailed Avian and Bat Post-Construction Monitoring Plan (Monitoring Plan), based on this Framework, will be developed in coordination with BOEM, U.S. Fish and Wildlife Service (USFWS), and other relevant regulatory agencies prior to beginning monitoring. Where feasible, monitoring conducted at the RWF will be coordinated with monitoring at neighboring Orsted/Eversource offshore wind projects—South Fork Wind Farm (SFWF) and Sunrise Wind Farm (SRWF)—to facilitate integrated analyses across a broader geographic area.

Monitoring objectives, questions, and associated methods are summarized in Table G-AB1. Technical approaches were selected based on offshore logistical constraints, their ability to address monitoring objectives, and their effectiveness in the marine environment. Emerging technologies, such as multi-sensor radar/camera collision detection systems, are not proposed under this Framework because they have not yet been broadly deployed offshore or demonstrated to effectively reduce uncertainties related to potential impacts on birds and bats.

**Table G-AB1. Monitoring Objectives, Questions, General Approaches to be Used, and Duration**

Taxa	Monitoring Objective	Primary Questions	Approach	Duration
Bats	Monitor occurrence of bats	What times of year and under what environmental conditions are bats detected in the wind farm?	Acoustics	2 years
Birds	Monitor use by ESA listed birds	What times of year and under what conditions are ESA birds present in the wind farm?	Radio tags	up to 3 years
Birds	Monitor use by nocturnal migratory birds	What are the flux rates and flight heights of nocturnally migrating birds?	Radar	1-2 years
Birds	Monitor movement of marine birds around the turbines	What are the avoidance rates of marine birds?	Radar	1-2 years

Both	Document mortality	What dead or injured species are found incidentally?	Incidental observations	Project lifetime
------	--------------------	--	-------------------------	------------------

### Bat Acoustic Monitoring

The presence of bats in the marine environment has been documented in the U.S. (Hatch et al. 2013, Solick and Newman 2021). However, there remains uncertainty regarding the extent to which bats occur offshore, particularly within offshore wind farms. Acoustic detectors are commonly used to study bat movements and migration (Johnson et al. 2011). Following the approach taken at SFWF (Final Environmental Impact Statement Appendix F<sup>1</sup>), Orsted/Eversource would conduct bat acoustic monitoring to assess bat activity at RWF, targeting key data gaps related to species presence/composition, temporal patterns of activity, and correlation with weather and atmospheric conditions. The primary monitoring questions are: What times of year and under what environmental conditions are bats detected in the wind farm?

Acoustic monitoring of bat presence would be conducted for two years post-construction. A detector would first be tested onsite to determine if there is any sound interference. Contingent on a successful test, ultrasonic bat detector stations would be installed on the offshore convertor station, wind turbine platforms, and/or buoys. The specific number and location of detector stations would be selected to optimize study design goals, and would be determined in cooperation with BOEM, USFWS, and other relevant regulatory agencies. While specific timing would be dictated by logistics, detectors would likely be deployed in the early spring or late winter (March), and removed in the late fall or early winter (December) after migration, or the most appropriate period as determined in cooperation with BOEM, USFWS, and other relevant regulatory agencies. The detectors would record calls of both cave-hibernating bats, including the northern long-eared bat (*Myotis septentrionalis*), and migratory tree bats; the resulting information can be used to identify bats to species. All acoustic data recorded would be processed with approved software to filter out poor quality data and identify the presence of bat calls. Where information is insufficient to make a species identification, calls would be classified to one of two phonic groups: low frequency bats (LoF), or high frequency bats (HiF). The HiF group includes both migratory tree bats and cave hibernating bats. Since HiFi include the ESA-listed northern long-eared bat, they would then be manually vetted by an experienced acoustician to the highest resolution possible (e.g., species or genus).

All bat calls detected and identified would be analyzed to understand relationships with time of day, season, and weather/atmospheric conditions. The results would provide information on bat presence offshore and the conditions under which they may occur near offshore wind turbines.

---

<sup>1</sup> <https://www.boem.gov/renewable-energy/state-activities/south-fork>

## **Motus Tracking Network and ESA Use Study**

Tracking studies indicate that at least some individual ESA-listed Piping Plovers (*Charadrius melodus*), Red Knots (*Calidris canutus rufa*), and Roseate Terns, may pass through the Rhode Island and Massachusetts lease areas (Loring et al. 2018, 2019). However, due to limited coverage of onshore automated telemetry receiving stations and low probability of detecting tags (hereafter, Motus receivers and tags) in the offshore environment (Loring et al. 2019), there remains uncertainty related to offshore movements of ESA-listed birds in New England. Revolution Wind would install offshore Motus receiver stations and contribute funding to radio-tagging efforts to address this data gap. The exact species being studied would be determined in consultation with federal agencies and would be dependent on existing, ongoing field efforts. The Motus receivers would also provide opportunistic presence/absence data on other species carrying Motus tags, such as migratory songbirds and bats. The primary monitoring questions are: What times of year and under what environmental conditions are ESA birds present in the wind farm?

Movements of radio-tagged ESA-listed birds in the vicinity of the RWF would be monitored for up to three years post-construction, during the spring, summer, and fall. Motus receivers would be installed within the wind farm to determine the presence/absence of ESA-listed species. The specific number and location of offshore receiver stations would be selected to optimize study design goals, and would be determined using a design tool currently being developed through a New York State Energy Research and Development Authority (NYSERDA) funded project<sup>2</sup>. If there is a need identified by USFWS and in coordination with efforts at SFWF and RWF, existing Motus receiver stations at up to two onshore locations near the RWF would be refurbished or maintained to confirm the presence and movements of radio-tagged ESA-species in areas adjacent to RWF. Funding for up to 150 Motus tags per year would be provided to researchers working with ESA-listed birds for up to three consecutive years.

ESA-listed bird presence/absence in the wind farm would be analyzed by comparing detections within the wind farm to coastal receiver towers. All detections would be analyzed to understand relationships with time of day, season, and weather.

## **Radar Monitoring: Nocturnal Migrants Flux and Flight Heights**

Nocturnal migrants, including songbirds and shorebirds, are documented to fly offshore (Adams et al. 2015, Loring et al. 2020). Since nocturnal migration events are episodic and cannot be detected during daytime surveys, there is uncertainty on the timing and intensity of migration offshore. Radar, oriented vertically, has been used at offshore wind farms in Europe to study nocturnal migration events (Hill et al. 2014). Orsted/Eversource is considering conducting a one-to-two-year radar study across SRWF, SFWF, and RWF

---

<sup>2</sup> <https://www.briloon.org/renewable/automatedvhfguidance>

to record the passage rates (flux) of migrants and flight heights. The primary monitoring questions are: What are the flux rates and flight heights of nocturnally migrating birds?

Since radar approaches to monitoring birds are actively evolving and feasibility would need to be determined, a specific system and methods would be identified closer to when the projects begin operating. The results would be related to time of year and weather conditions, to increase the understanding on when nocturnal migrants may have higher collision risk.

### **Radar Monitoring: Marine Bird Avoidance**

Marine birds, particularly loons, sea ducks, auks, and the Northern Gannet (*Morus bassanus*), have been documented to avoid offshore wind farms, potentially leading to displacement from habitat (Goodale and Milman 2016). However, there remains uncertainty on how birds would respond to Orsted/Eversource's large turbines that would be spaced one nautical mile apart. Based on methods used by Desholm and Kahlert (2005), Skov et al. (2018), and others, Orsted/Eversource is considering conducting a one-to-two-year cross-project (SRWF, SFWF, and RWF) radar study to collect data on macro (and potentially meso—i.e., flying between turbines) avoidance rates. These data on avoidance would support understanding of both displacement and collision vulnerability. The primary monitoring questions is: What are the avoidance rates of marine birds?

### **Documentation of Dead and Injured Birds and Bats**

Revolution Wind, or its designated operator, would implement a reporting system to document dead or injured birds or bats found incidentally on vessels and project structures during construction, operation, and decommissioning. The location would be marked using GPS, an Incident Reporting Form would be filled out, and digital photographs taken. Any animals detected that could be ESA-listed, would have their identity confirmed by consulting biologists, and a report would be submitted to the designated staff at Revolution Wind who would then report it to BOEM, USFWS, and other relevant regulatory agencies. Carcasses with federal or research bands or tags would be reported to the U.S. Geological Survey (USGS) Bird Band Laboratory, BOEM, and USFWS.

### **Adaptive Monitoring**

Adaptive monitoring is an important principle underlying Revolution Wind's post-construction monitoring Framework. Over the course of monitoring, Revolution Wind would work with BOEM, USFWS, and other relevant regulatory agencies, to determine the need for adjustments to monitoring approaches, consideration of new monitoring technologies, and/or additional periods of monitoring, based on an ongoing assessment of monitoring results. Potential triggers for adaptive monitoring may include, but not be limited to, equipment failure, an unexpected impact to birds or bats identified through monitoring, or new opportunities to collaborate with other projects in the region. The Monitoring Plan would include a series of potential adaptive monitoring actions,

developed in coordination with BOEM, USFWS, and other relevant regulatory agencies, to be considered as appropriate.

### **Reporting**

Revolution Wind would submit an annual report to BOEM and USFWS summarizing post-construction monitoring activities, preliminary results as available, and any proposed changes in the monitoring program. Revolution Wind would participate in an annual meeting with BOEM and USFWS to discuss the report. (Biodiversity Research Institute 2021:232–236)

## **Commercial Fisheries and For-Hire Recreational Fishing**

Information in this section provides an overview of the commercial fisheries data used in EIS Section 3.9. It also provides a description of the methodological approach used to describe the dependency of fishermen on the Lease Area.

### **Overview of Commercial Fisheries Data Used in the Environmental Impact Statement Section 3.9**

The primary source of data was summarized vessel trip report (VTR) data provided by the National Marine Fisheries Service (NMFS) (2021a). Included were annual VTR data (2008–2019) for specific geographic areas relevant to the Project showing commercial fishing revenue, trips, and number of unique vessels for each fishery management plan (FMP) fishery, species, gear, and port of landing.<sup>3</sup> These data were also used to analyze the distribution of commercial fishing revenue from the Lease Area across fishing vessels. In addition, the VTR data provided by NMFS (2021a) described the activities of for-hire recreational fishing vessels, including landings by species and the number of angler trips by port.

A second source of data was the website at NMFS (2021b), which summarizes commercial fisheries data for each proposed WEA along the U.S. Atlantic Coast. These data were downloaded and used to summarize revenue at risk across all proposed offshore wind projects under the No Action Alternative.

---

<sup>3</sup> NMFS requires all federally permitted commercial fishing vessels (with the exception of those vessels that only have a lobster permit) to submit a VTR for every fishing trip (50 CFR 648.7). The VTR data provide a broad census of fishing activity that encompasses the majority of commercial fisheries active near the RWF and offshore RWEC. VTRs include a single fishing location (reported in latitude and longitude coordinates) for each trip. VTR location information is only an approximation of fishing activity, particularly with respect to the use of mobile gear, because fishermen self-report only one set of coordinates for a fishing trip, despite the fact that one trip may include multiple gear tows that take place in many different locations across a much wider area. VTR instructions require that fishermen record the haulback position where most of the fishing occurred (Livermore 2017; NMFS 2020a).

A fisherman with a vessel with a federal lobster permit is only required to fill out a VTR if he or she has another federal permit. Approximately 63% of the lobster fleet fishing in statistical area 537, which encompasses most of the RI/MA WEAs, reports through VTRs (Atlantic States Marine Fisheries Commission 2018).

In addition, polar histograms (Figure 3.9-3 through Figure 3.9-5) developed by BOEM based on NMFS vessel monitoring system (VMS) data provided by NMFS (2019) are included in Section 3.9.<sup>4</sup> From January 2014 through August 2019, VMS coverage levels ranged between 90% and 100% for the following FMP fisheries: Atlantic Herring; Bluefish; Mackerel, Squid, and Butterfish; Monkfish; Northeast Multispecies (large-mesh); Northeast Multispecies (small-mesh); Sea Scallop; Spiny Dogfish; Summer Flounder, Scup, and Black Sea Bass; and Surfclam and Ocean Quahog. Average VMS coverage levels were lower for the following FMP fisheries: Skate (75%); Highly Migratory Species (48%); Jonah Crab (14%); and American Lobster (11%) (NMFS 2019).

## Average Annual Revenues and Non-Disclosure Issues

In general, Section 3.9 provides information on the average annual revenue over the 2008–2019 period. However annual data were provided only for the years for which data could be disclosed. If an annual data-point for a given FMP, gear, or port within a given geographic area could not be disclosed because there were an insufficient number of vessels or dealers, then NMFS added the datapoint to a “non-disclosed” category. By combining all the datapoints that could not be disclosed, NMFS was able to report to the annual total revenue for every year. However, this methodology for reporting non-disclosed data points hampers accurate estimation of average annual revenue because there were often non-disclosed data for one or more years, particularly if the geographic area is small or if there were relatively low levels of participation. Table G-1 is provided to demonstrate these issues. The table shows the annual data for gears as provided by NMFS for the RWEC from 2008 to 2019. It is not possible to infer whether numbers shown as zero (with a “–”) denote zero revenue for the gear or that the data were not disclosed and assigned to the “All Other Gear” category.

**Table G-1. National Marine Fisheries Service-Greater Atlantic Regional Fisheries Office Commercial Fishing Annual Revenue Data for the Lease Area**

Gear	2008 (\$1000s)	2009 (\$1000s)	2010 (\$1000s)	2011 (\$1000s)	2012 (\$1000s)	2013 (\$1000s)	2014 (\$1000s)	2015 (\$1000s)	2016 (\$1000s)	2017 (\$1000s)	2018 (\$1000s)	2019 (\$1000s)	Non-Zero Years
Dredge-Scallop	\$10.8	\$5.6	\$2.8	\$14.4	–	\$5.3	\$8.3	\$17.8	\$20.6	\$6.1	\$4.8	\$11.0	11
Gillnet-Sink	\$35.3	\$38.7	\$49.3	\$38.3	\$24.3	\$22.9	\$24.7	\$20.8	\$25.8	\$25.8	\$15.5	\$15.9	12
Handline	\$1.4	\$1.1	\$0.8	\$0.8	\$0.7	\$0.5	\$1.3	\$0.5	\$1.1	\$1.7	\$1.4	\$1.4	12
Pot-Lobster	\$139.3	\$105.5	\$91.8	\$70.1	\$79.0	\$50.8	\$52.8	\$55.6	\$55.3	\$49.8	\$65.1	\$89.3	12
Pot-Other	\$2.0	\$3.2	\$17.5	\$21.2	\$12.9	\$10.5	\$5.1	\$6.5	\$11.0	\$9.5	\$20.1	\$15.0	12
Trawl-Bottom	\$115.5	\$114.2	\$139.7	\$185.9	\$263.6	\$237.5	\$191.6	\$205.3	\$187.3	\$150.4	\$155.1	\$182.8	12

<sup>4</sup> VMS data are generated from automated transmissions from transponders that are required to be on board and operating whenever permitted vessels are fishing or transiting with the intent to harvest fish or shellfish. Data are transmitted once every 60 minutes for all FMPs except sea scallops, which are transmitted once every 30 minutes. Each transmission includes the current directional bearing and vessel speed as well as the average bearing and vessel speed since the last transmission. Using the average vessel speed, NMFS uses an algorithm to assign an assumed activity (either fishing or transiting) to each transmission.

Gear	2008 (\$1000s)	2009 (\$1000s)	2010 (\$1000s)	2011 (\$1000s)	2012 (\$1000s)	2013 (\$1000s)	2014 (\$1000s)	2015 (\$1000s)	2016 (\$1000s)	2017 (\$1000s)	2018 (\$1000s)	2019 (\$1000s)	Non-Zero Years
Trawl-Midwater	\$8.3	\$43.9	\$7.9	\$37.9	\$131.8	\$100.3	\$125.6	\$51.6	\$36.9	\$0.7	–	–	10

Source: NMFS (2022).

Notes: Revenue is adjusted for inflation to thousands of 2019 dollars. ND = not disclosed. A “–” indicates a value equal to zero, while \$0.0 indicates a value greater than zero, but less than \$500.

## Commercial Fisheries Revenue Intensity Figures

The revenue intensity figures for commercial fisheries shown in Figures G-1 through G-13 have been developed to provide a visual representation of harvesting locations across FMP fisheries. These figures are reproduced from the Fishing Footprints webpage (NMFS 2020b) with the addition of the Lease Area and the RWEC superimposed. The figures provided are generally limited to those that are available for the years 2016 through 2018, although an exception is made for Figure G-13, which summarizes the revenue intensity of all fisheries combined and which is provided for the years 2013 through 2015 (the most recent data available on the webpage).

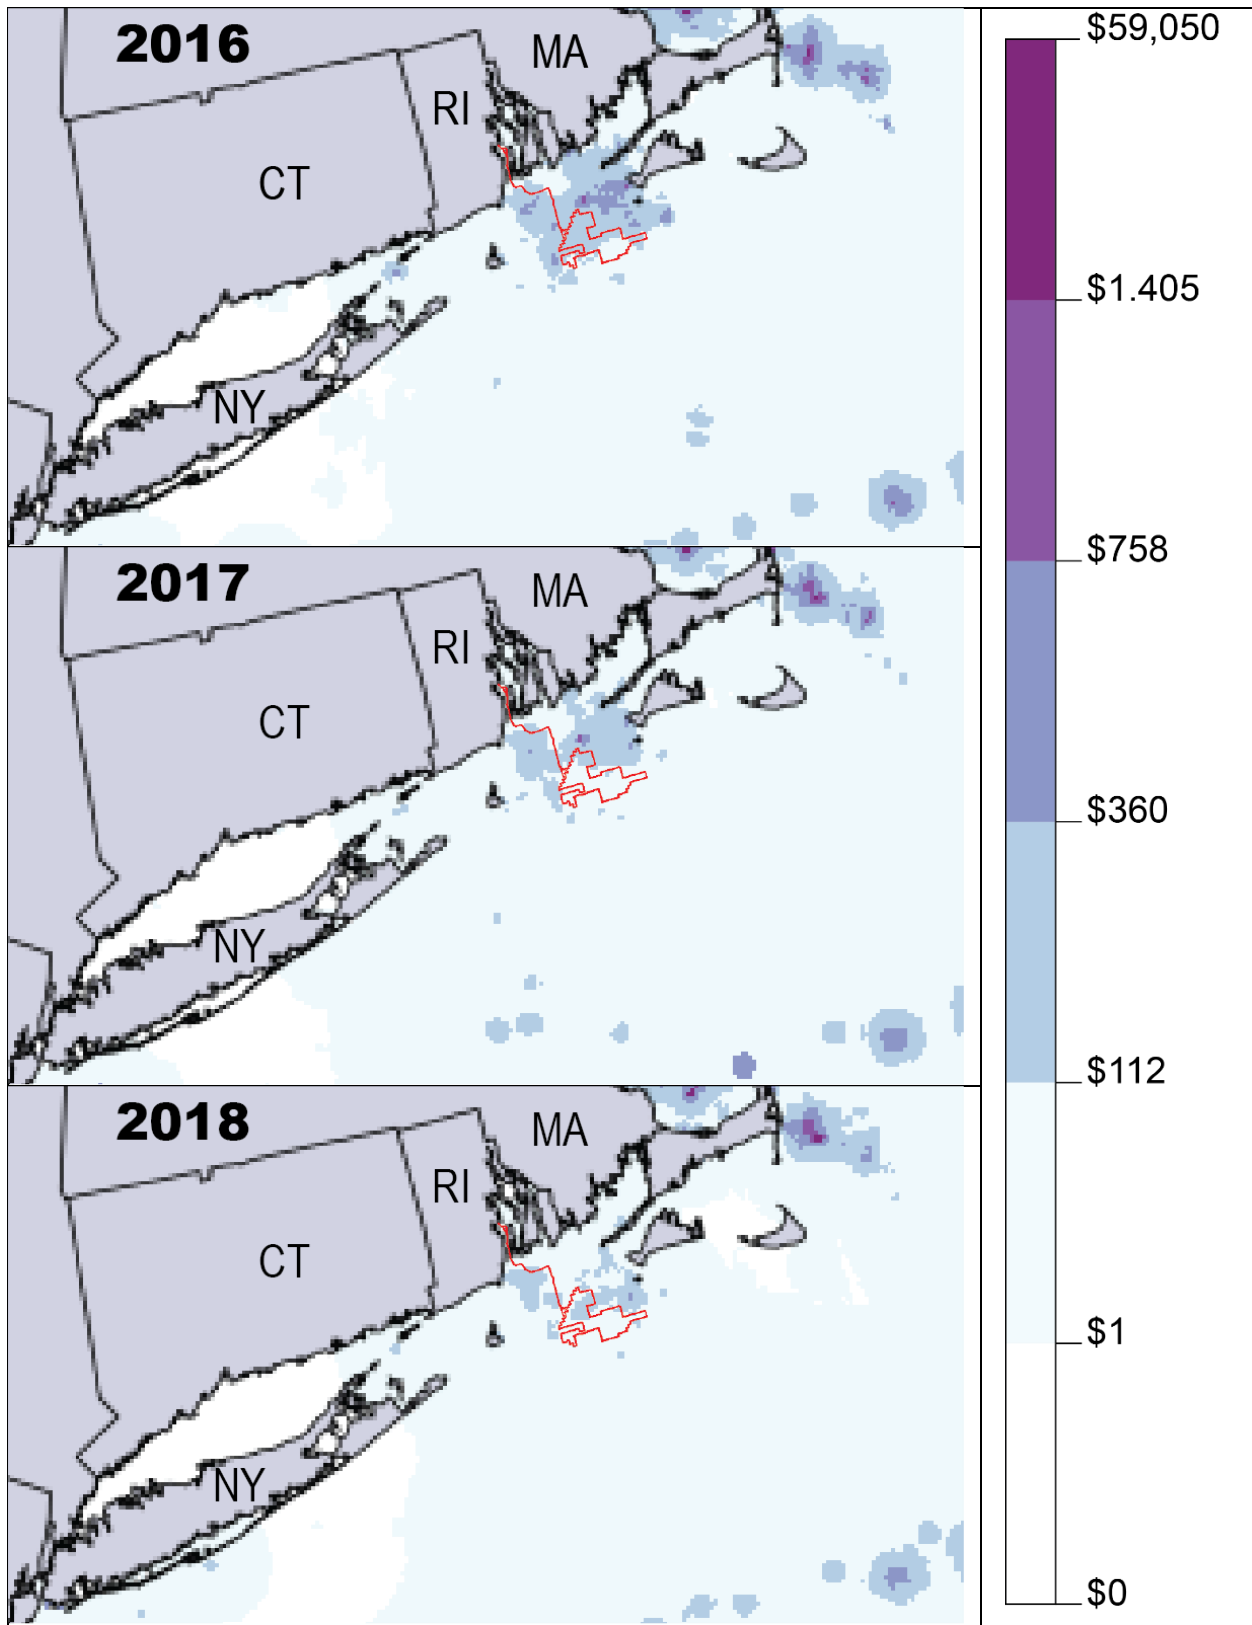

Figure G-1. Revenue Intensity for the American Lobster Fishery Management Plan in the Vicinity of the Lease Area, 2016–2018 (NMFS 2020b).

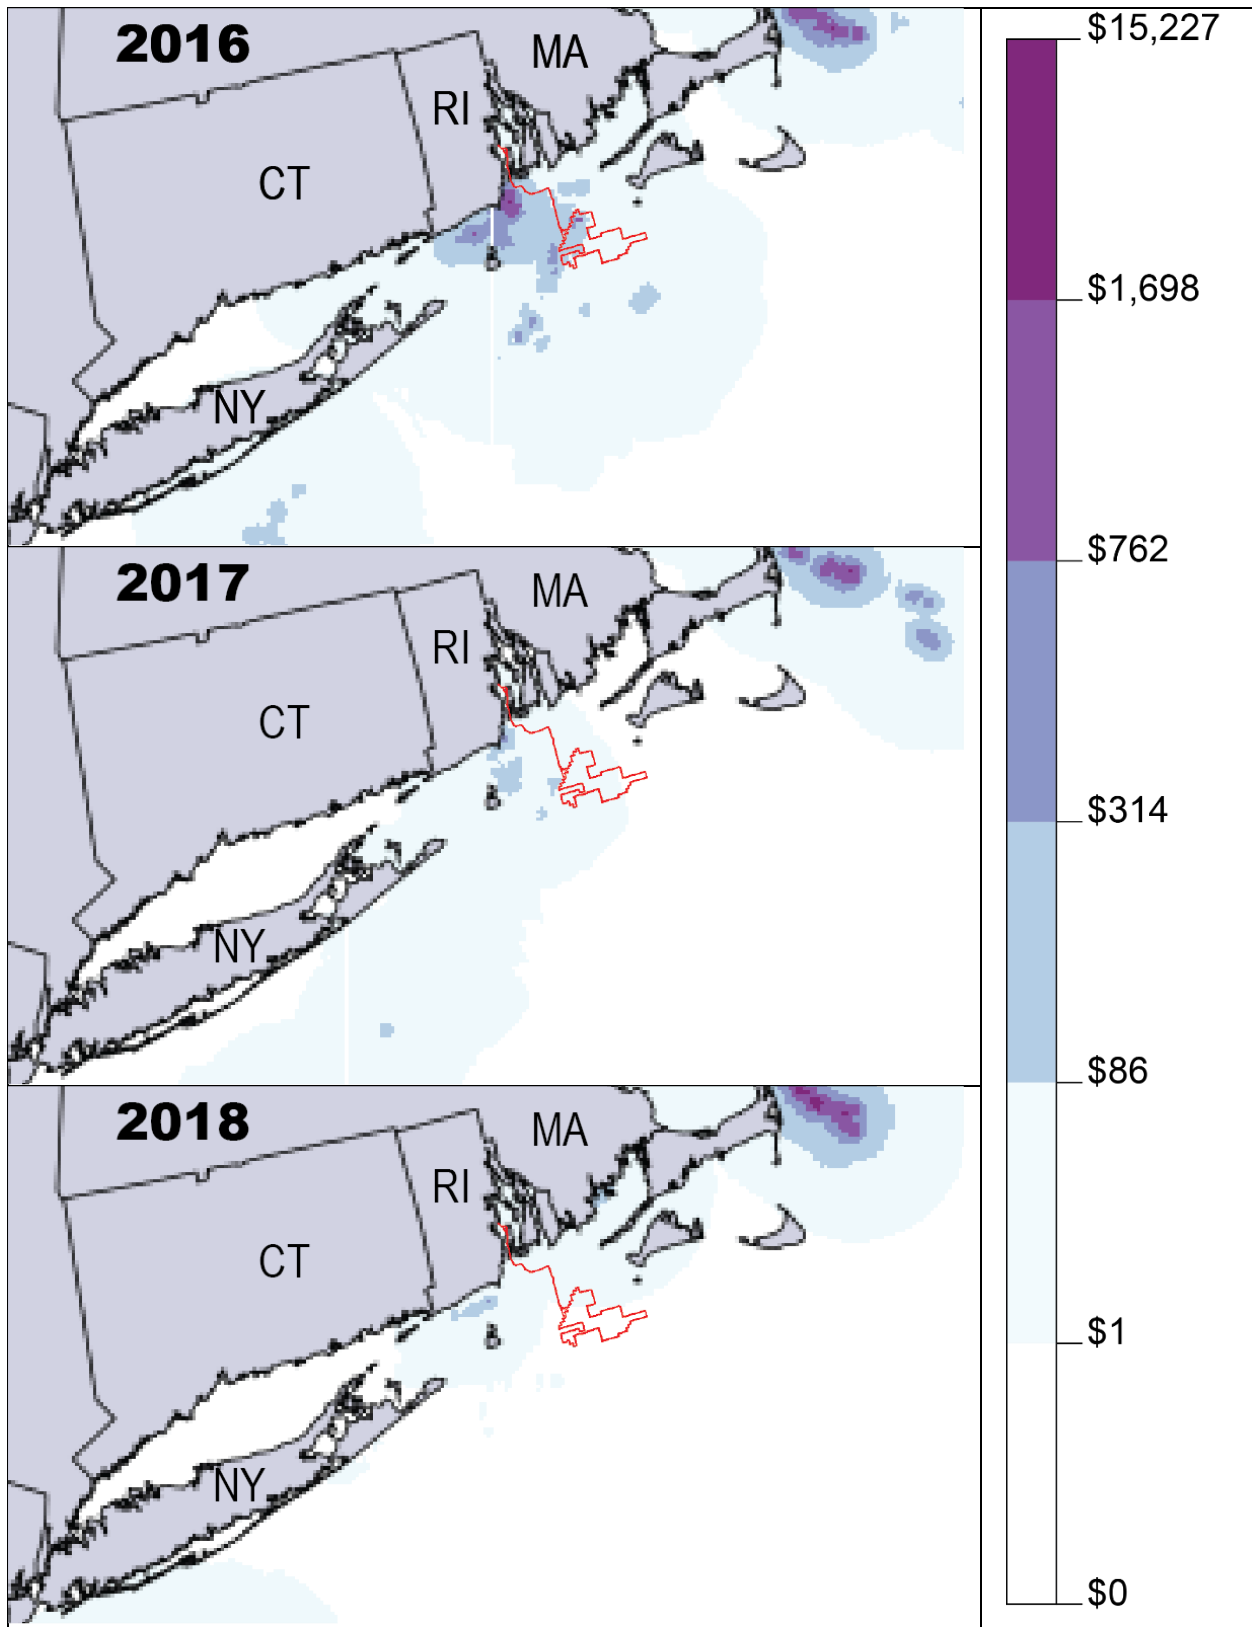

Figure G-2. Revenue Intensity for the Atlantic Herring Fishery Management Plan in the Vicinity of the Lease Area, 2016–2018 (NMFS 2020b).

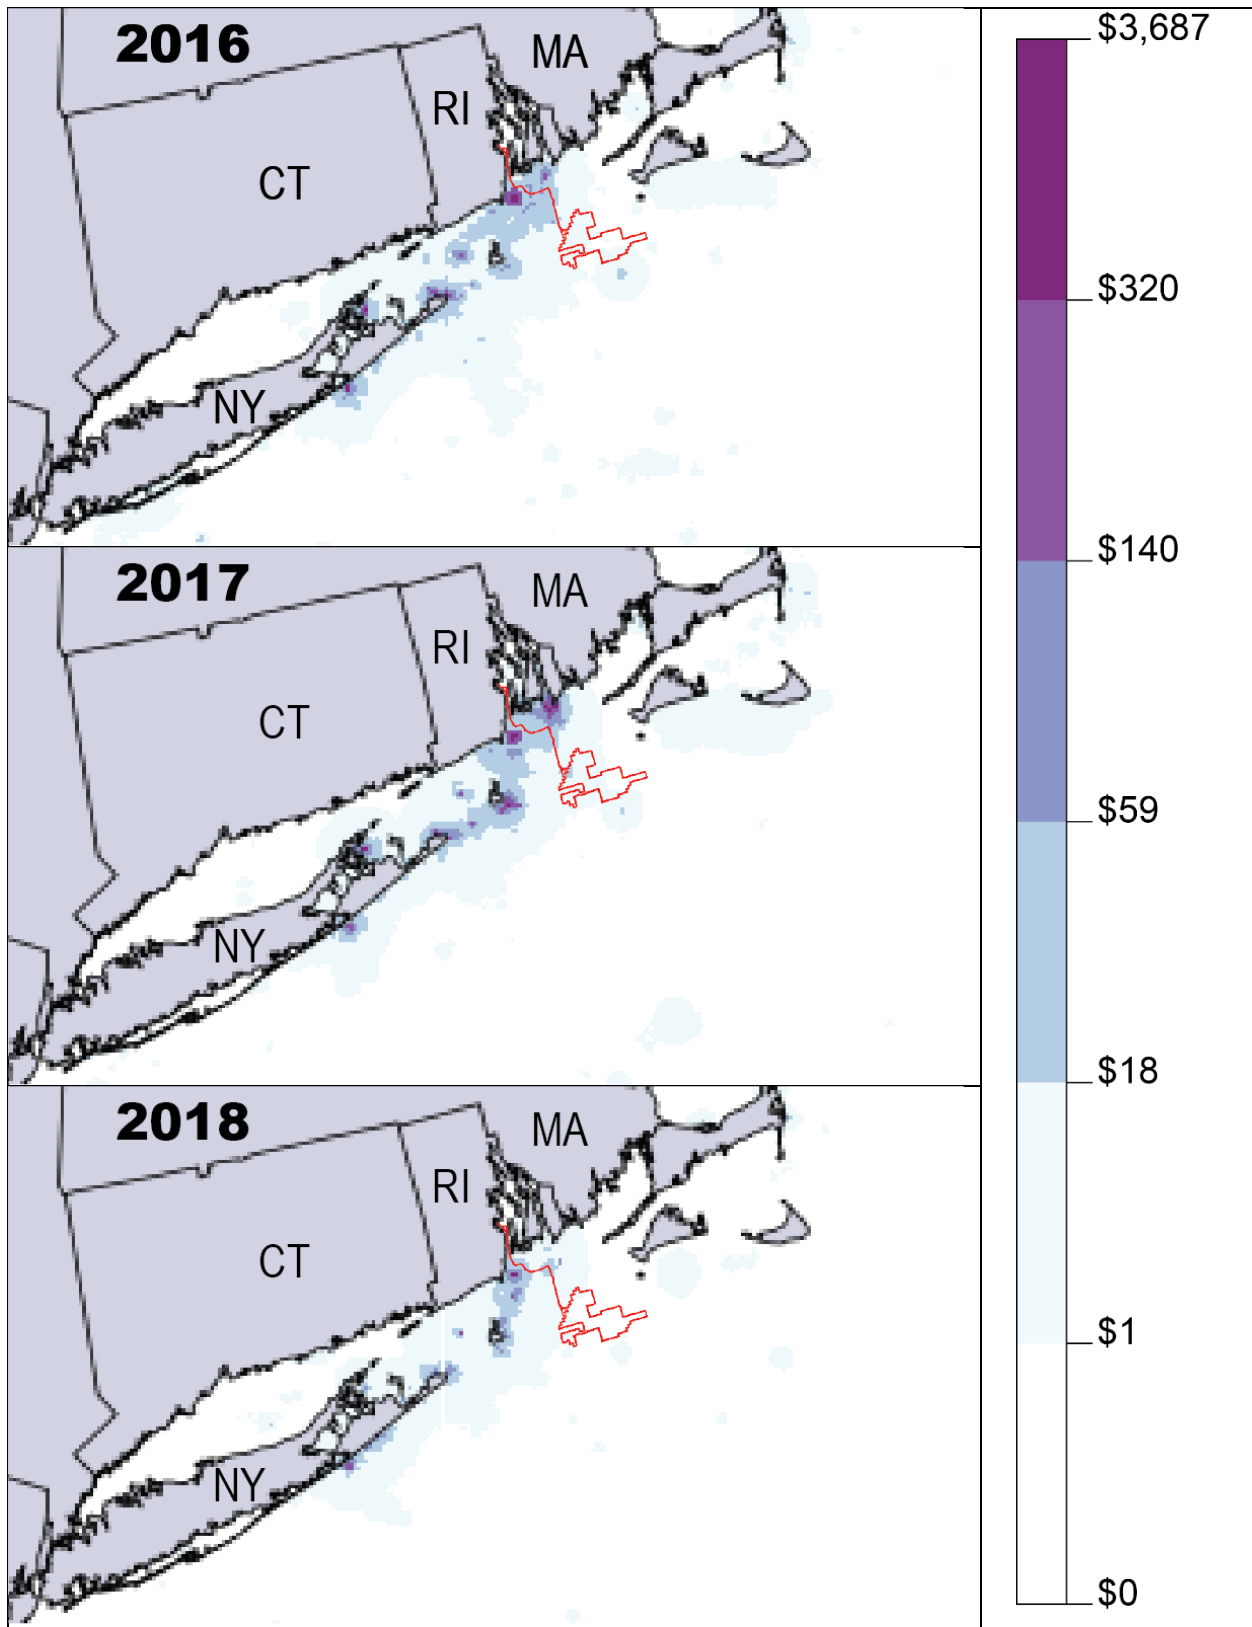

Figure G-3. Revenue Intensity for the Bluefish Fishery Management Plan in the Vicinity of the Lease Area, 2016–2018 (NMFS 2020b).

Figure G-4. Revenue Intensity for the Golden Tilefish Fishery Management Plan in the Vicinity of the Lease Area, 2016–2018 (NMFS 2020b).

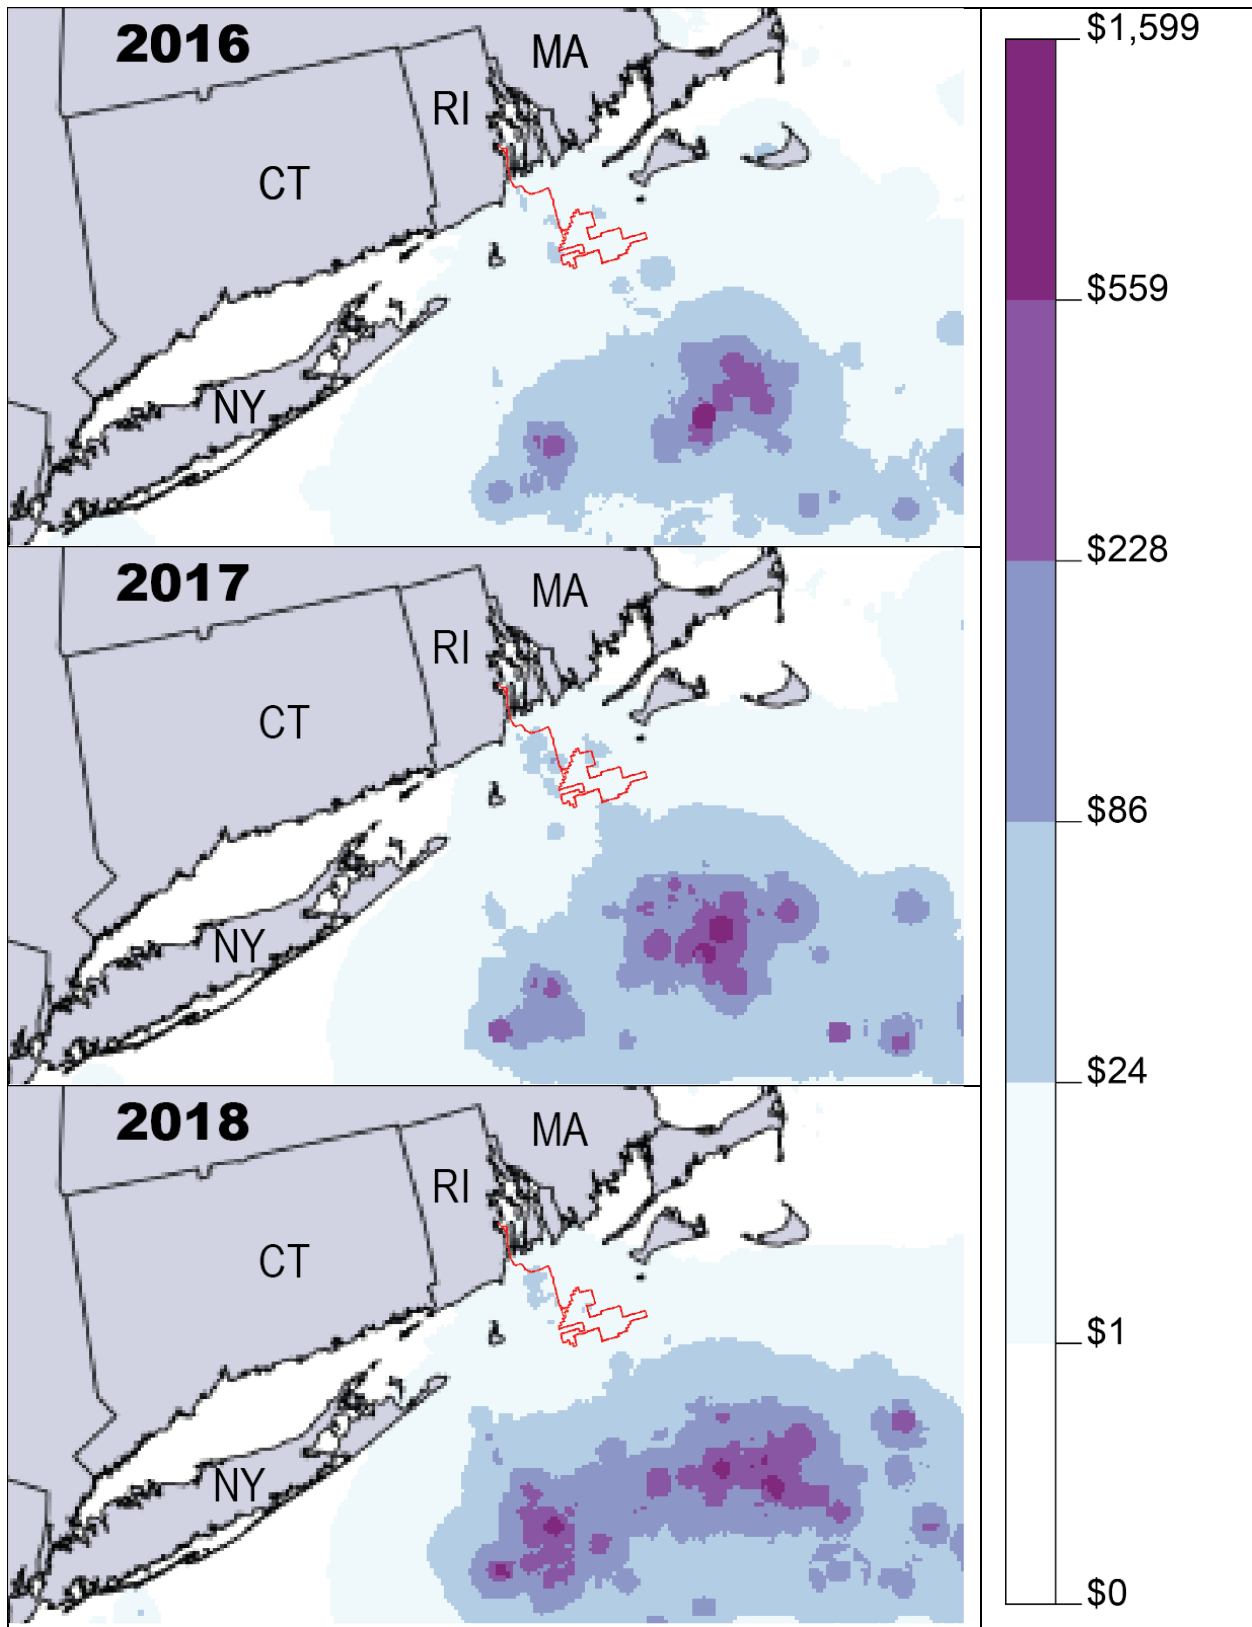

Figure G-5. Revenue Intensity for the Jonah Crab Fishery Management Plan in the Vicinity of the Lease Area, 2016–2018 (NMFS 2020b).

Figure G-6. Revenue Intensity for the Mackerel, Squid, and Butterfish Fishery Management Plan in the Vicinity of the Lease Area, 2016–2018 (NMFS 2020b).

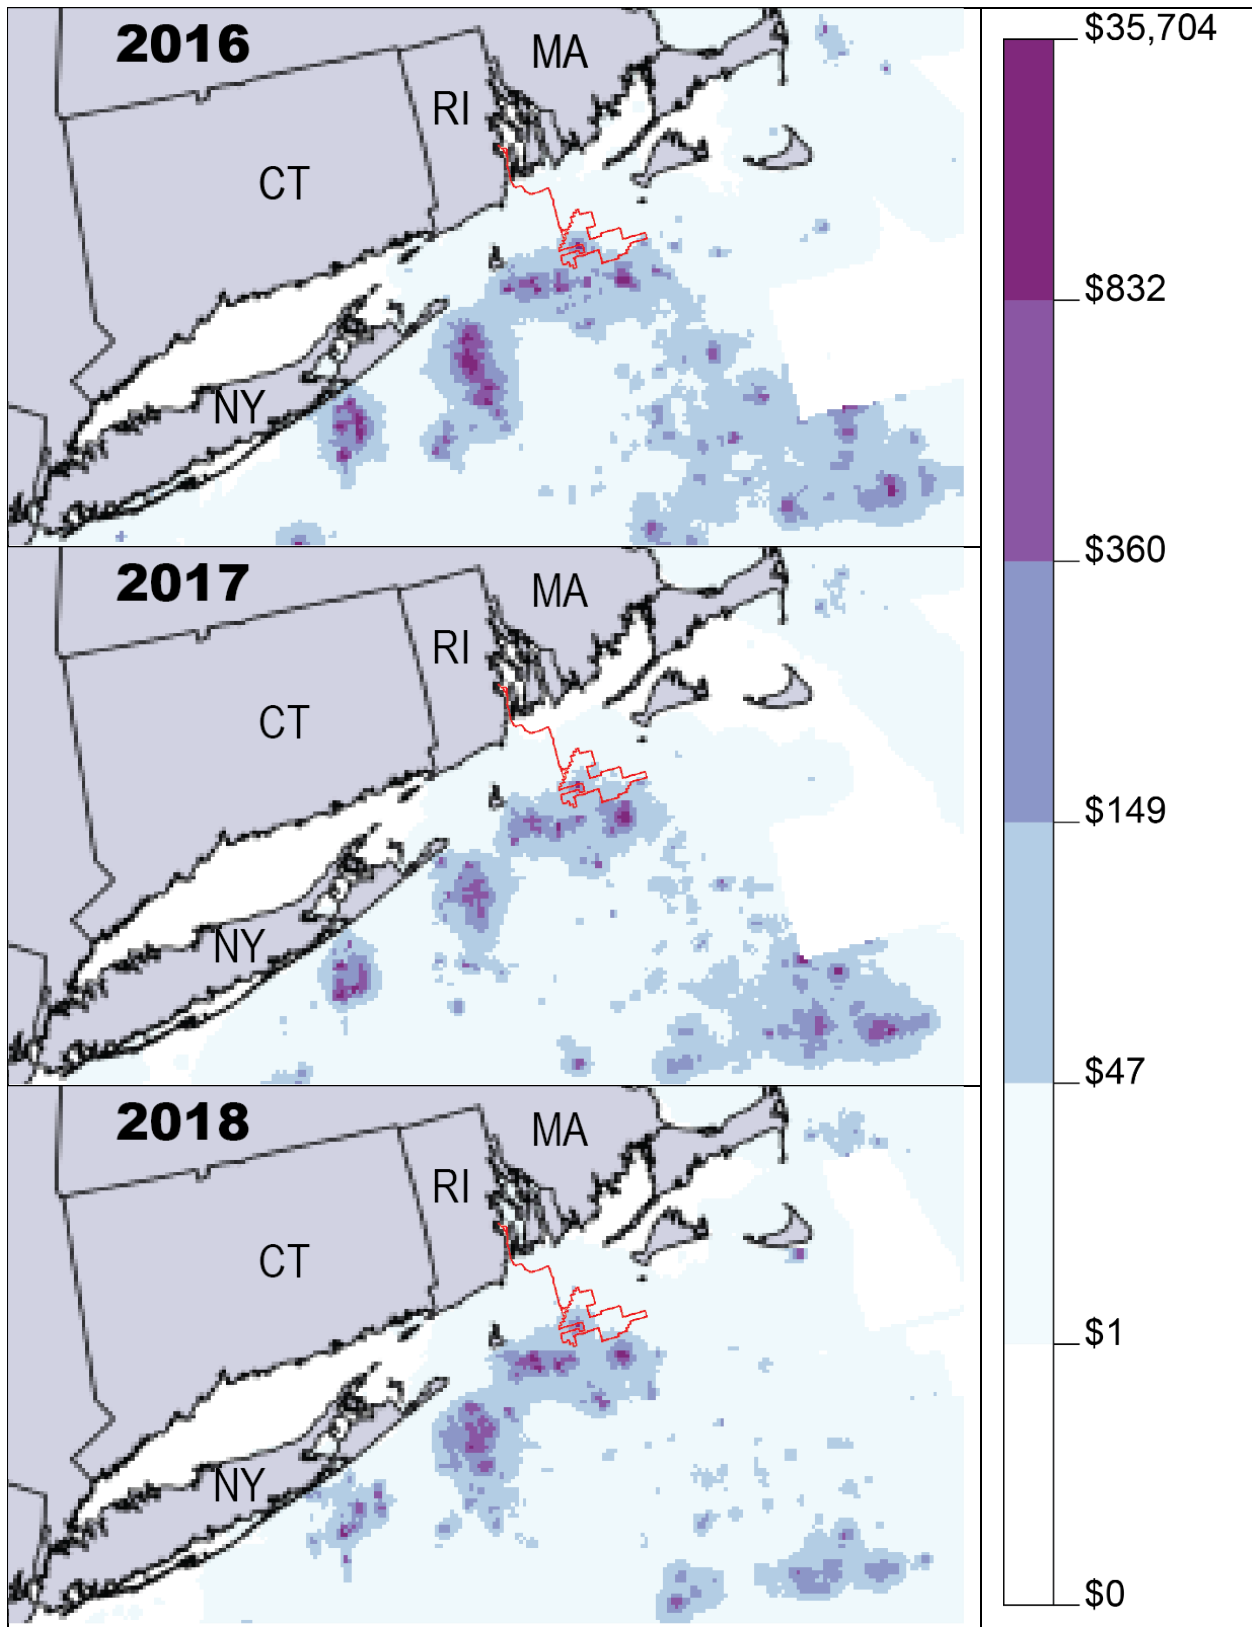

Figure G-7. Revenue Intensity for the Monkfish Fishery Management Plan in the Vicinity of the Lease Area, 2016–2018 (NMFS 2020b).

Figure G-11. Revenue Intensity for the Spiny Dogfish Fishery Management Plan in the Vicinity of the Lease Area, 2016–2018 (NMFS 2020b).

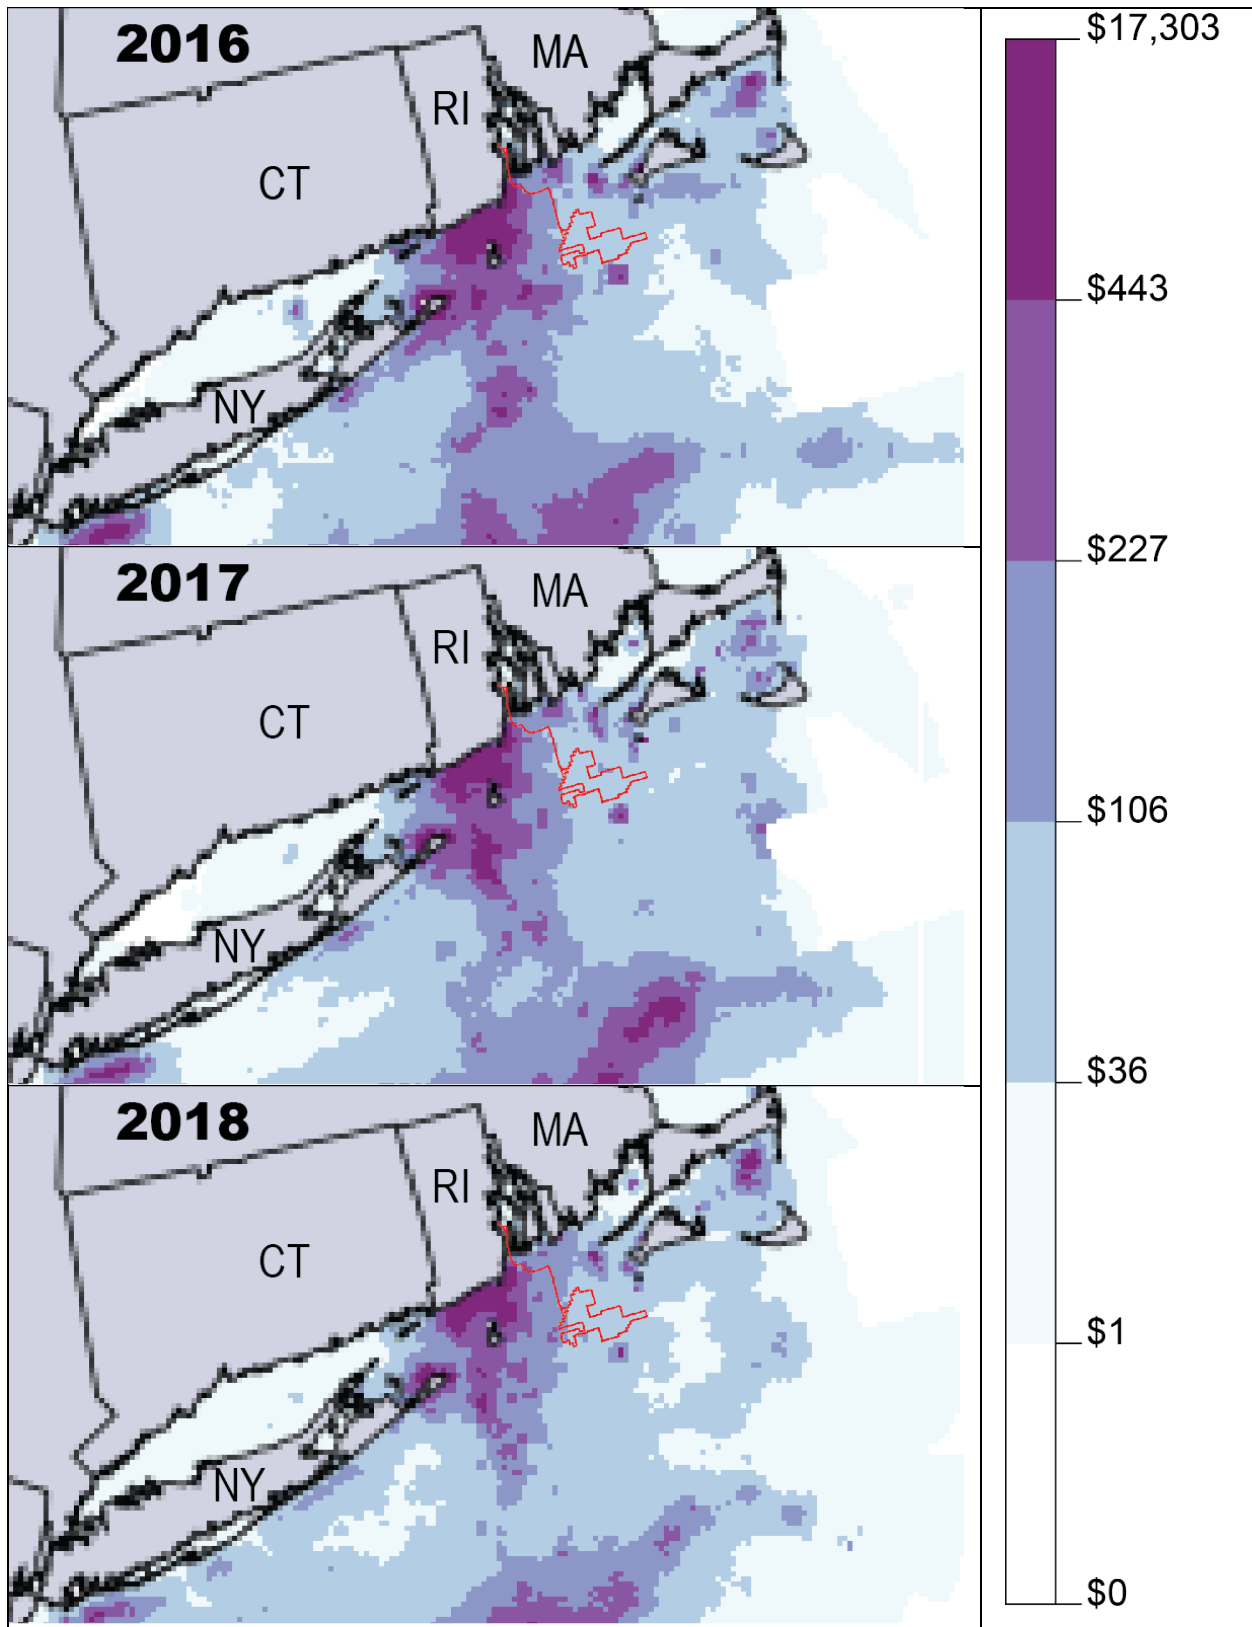

Figure G-12. Revenue Intensity for the Summer Flounder, Scup, and Black Sea Bass Fishery Management Plan in the Vicinity of the Lease Area, 2016–2018 (NMFS 2020b).

Figure G-13. Revenue Intensity for All Fisheries Combined in the Vicinity of the Lease Area, 2013–2015 (NMFS 2020b).

## Analysis of the Economic Dependency on Fishing Grounds in the Lease Area among Commercial Fishing Vessels

To analyze differences in the economic importance of fishing grounds in the Lease Area across the commercial fishing fleet, information was obtained from NMFS (2021c) on the number of federally permitted commercial fishing vessels that fished annually in the Lease Area during the 2008–2019 period, together with box plot figure summarizing the relative dependence of these vessels during that period.

The vessel-level annual revenue percentages were divided into quartiles, which were created by ordering the data from lowest to highest percentage value and then dividing the data into four groups of equal size. The first quartile represents the lowest 25% of ranked percentages while the fourth quartile represents the highest 25%. NMFS (2021c) reported the number of “outlier” vessels in the revenue distribution of percentage of revenue. In the context of this analysis, an outlier is a vessel that derived an exceptionally high proportion of its annual revenue from the Lease Area in comparison to other vessels that fished in the area.<sup>5</sup>

As shown in Table G-2, from 2008 through 2019, an average of 289 vessels per year fished in the Lease Area, with a high of 331 vessels in 2008 and a low of 251 vessels in 2018. The average annual number of outliers was 40.5 (14% of all vessels), with a high of 47 outliers in 2016 (14.6% of all vessels) and a low of 31 outliers in 2019 (11.8% of all vessels).

**Table G-2. Number of Federally Permitted Vessels in the Lease Area (2008–2019)**

Year	Number of Vessels	Number of Outliers	Number of Outliers as a Percentage of Total Vessels
2008	331	46	13.9%
2009	308	43	14.0%
2010	253	35	13.8%
2011	262	31	11.8%
2012	282	40	14.2%
2013	308	41	13.3%
2014	308	46	14.9%
2015	296	40	13.5%
2016	322	47	14.6%
2017	284	40	14.1%

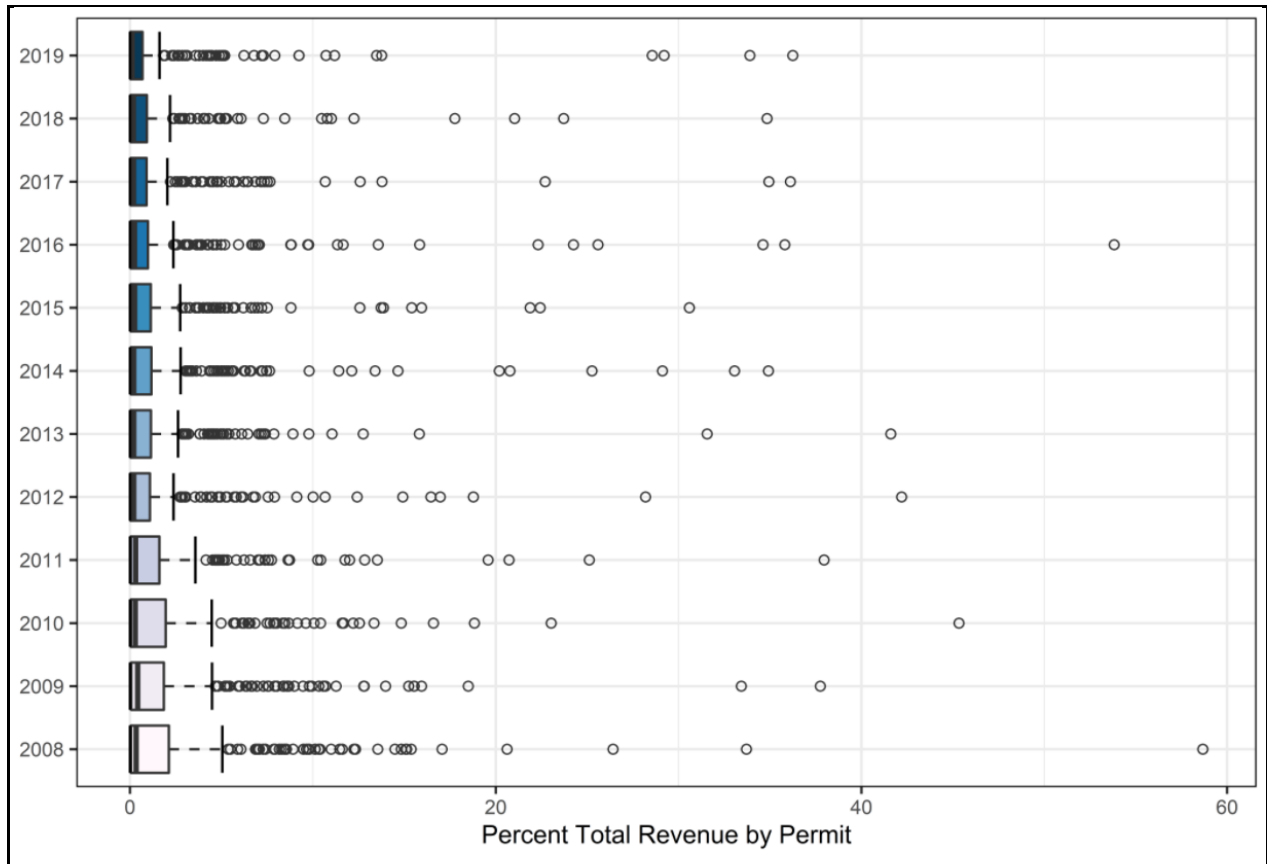

<sup>5</sup> Technically, an outlier in a box plot distribution is an observation that is more than 1.5 times the length of the box away from either the first quartile (Q1) or third quartile (Q3). Specifically, if an observation is less than  $Q1 - (1.5 \times IQR)$  or greater than  $Q3 + (1.5 \times IQR)$ , it is an outlier; where  $IQR = \text{interquartile range} = Q3 - Q1$ .

Year	Number of Vessels	Number of Outliers	Number of Outliers as a Percentage of Total Vessels
2018	251	35	13.9%
2019	261	42	16.1%
Average	288	40	14.0%

Source: NMFS (2021c).

More detailed information about the distribution of the vessel-level annual revenue percentages is provided in the boxplot below (see Figure G-14). The box plot begins at the first quartile, or the value beneath which 25% of all vessel-level revenue percentages fall. A thick line within the box identifies the median, the observation at which 50% of vessel-level revenue percentages are above or beneath. The box ends at the third quartile, or the vessel-level revenue percentage beneath which 75% of observations fall. Nonparametric estimates of the minimum and maximum values are also indicated by the “whiskers” (dashed line terminating in a vertical line) that jut out from each side of the box. Any points outside of these whiskers are vessel-level revenue percentages that are considered outliers.

From 2008 through 2019, the vessel ranked as the seventy-fifth percentile vessel (i.e., the vessel in the third quartile with the greatest dependence on the Lease Area over the 12-year period) derived 0.88% of its total revenue from the Lease Area (NMFS 2021c). Of the outliers, the vessel with the greatest dependence on the Lease Area derived 38% of its total revenue from the area. Looking at individual years shown in the box plot, in 2008, one vessel derived nearly 60% of its total revenue from the Lease Area. In that same year, the vessel with the greatest percentage of dependence in the third quartile generated approximately 2.2% of its revenue from the Lease Area. Figure G-14 shows that in any given year the revenue percentage for the majority of outliers were below 10%.

**Figure G-14. Percentage of Total Commercial Fishing Revenue of Federally Permitted Vessels Derived from the Lease Area by Vessel (2008–2019) (NMFS 2021c).**

It is important to note that the box plot data do not provide any information about total revenues, or if there are correlations between the relative dependence on the lease area and total revenue of the individual vessel. To that end, additional data will be requested from NMFS that will indicate for each quartile and for the outliers as a group the total revenue for the quartile/outlier group from within the Lease Area (i.e., the average numerator) as well as the total revenue from all areas (i.e., average denominator) for the quartile/outlier group.

## Annual Commercial Revenue Exposed in the Lease Area and along the RWECC by FMP Fishery, Port, and Gear under Alternatives C, D, and E

### Alternative C

#### FMP Fishery

**Table G-3. Annual Commercial Fishing Revenue Exposed in the Lease Area and along the RWECC by FMP Fishery under Alternative C1 (2008–2019)**

FMP Fishery	Peak Annual Revenue (\$1,000s)	Average Annual Revenue (\$1,000s)	Average Annual Revenue at Risk as a Percentage of Total in the Mid-Atlantic and New England Regions	Average Annual Revenue at Risk as a Percentage of Total Revenue in the RFA
American Lobster	\$462.9	\$261.8	0.28%	3.36%
Atlantic Herring	\$267.1	\$100.9	0.39%	3.37%
Bluefish	\$17.0	\$8.6	0.67%	1.47%
Highly Migratory Species	\$6.8	\$2.2	0.10%	0.98%
Jonah Crab	\$37.8	\$21.4	0.22%	0.36%
Mackerel, Squid, and Butterfish	\$296.6	\$136.4	0.26%	0.88%
Monkfish	\$179.0	\$97.9	0.48%	1.30%
Northeast Multispecies (large-mesh)	\$112.3	\$48.9	0.07%	2.05%
Northeast Multispecies (small-mesh)	\$189.0	\$71.1	0.63%	2.52%
Sea Scallop	\$367.9	\$143.7	0.03%	0.29%
Skates	\$160.5	\$102.1	1.37%	2.85%
Spiny Dogfish	\$35.2	\$15.2	0.51%	6.22%
Summer Flounder, Scup, Black Sea Bass	\$126.3	\$80.5	0.20%	0.73%
Other FMPs, non-disclosed species and non-FMP fisheries	\$550.4	\$235.4	0.25%	0.70%
All FMP and non-FMP Fisheries	\$1,610.9	\$1,326.0	0.14%	0.92%

Source: Developed using data from NMFS (2021a, 2022).

Notes: Revenue is adjusted for inflation to 2019 dollars. Peak annual revenue is calculated independently for all rows including the total row.

Other FMPs, non-disclosed species, and non-FMP fisheries includes revenue from three FMP fisheries: Surfclam/ Ocean Quahog, Red Crab, and River Herring. In addition, it includes revenue from species in FMP fisheries for which data could not be disclosed due to confidentiality restrictions, and revenue earned by federally permitted vessels operating in fisheries that are not federally managed.

**Table G-4. Annual Commercial Fishing Revenue Exposed in the Lease Area and along the RWEC by FMP Fishery under Alternative C2 (2008–2019)**

FMP Fishery	Peak Annual Revenue (\$1,000s)	Average Annual Revenue (\$1,000s)	Average Annual Revenue at Risk as a Percentage of Total in the Mid-Atlantic and New England Regions	Average Annual Revenue at Risk as a Percentage of Total Revenue in the RFA
American Lobster	\$428.1	\$246.0	0.26%	3.15%
Atlantic Herring	\$261.1	\$99.2	0.38%	3.31%
Bluefish	\$16.8	\$8.5	0.67%	1.46%

Source: Developed using data from NMFS (2021a, 2022).

Notes: Revenue is adjusted for inflation to 2019 dollars. Peak annual revenue is calculated independently for all rows including the total row.

Ports shown in *italics* indicate that fewer than 12 years but more than 4 years of data were used to calculate the estimates. Otherwise, estimates are based on 12 years of data. Vessels with 4 or fewer years of reported data are shown with an ND (non-disclosed) for average revenues and for percentages of other areas.

\* Includes unlisted ports that had landings and data from non-disclosed years from listed ports harvested by federally permitted vessels fishing along the offshore RWECC or in the Lease Area.

## Gear

**Table G-23. Annual Commercial Fishing Revenue Exposed in the Lease Area and along the RWECC by Gear Type under Alternative D1 (2008–2019)**

Gear Type	Peak Annual Revenue (\$1,000s)	Average Annual Revenue (\$1,000s)	Average Annual Revenue in the Lease Area as a Percentage of Total Landings in the Mid-Atlantic and New England Regions	Average Annual Revenue in the Lease Area as a Percentage of Total Landings in the RFA
Dredge-clam	\$369.2	\$94.1	0.15%	0.45%
Dredge-scallop	\$339.9	\$136.8	0.03%	0.28%
Gillnet-sink	\$268.6	\$180.1	0.60%	1.87%
Handline	\$14.8	\$3.4	0.07%	0.25%
Pot-other	\$514.2	\$333.0	0.29%	2.07%
Trawl-bottom	\$631.3	\$474.3	0.25%	1.10%
Trawl-midwater	\$189.8	\$97.1	0.51%	4.13%
All other gear*	\$283.8	\$79.6	0.17%	2.99%

## **Demographics, Employment, and Economics**

This section provides a summary of the assumptions and methodologies used to generate estimates of the employment impacts of the RWF under the alternatives assessed.

### **Assumptions Regarding Local Hiring Practices and Local and U.S. Suppliers of Wind Farm Components**

This section contains two subsections that describe a) the assumptions regarding the local hiring practices of Revolution Wind, and b) the ability of local and U.S. manufacturing industries to meet the demands of offshore wind projects.

#### **Local Hiring Practices**

Revolution Wind documents many of its assumptions relating to local hiring practices in Table ES-1 of the COP and provides additional information in Section 4.6.1 of the COP. These are summarized in the bulleted list below and provide guidance for the assessment of the economic impacts of the Project and alternatives:

- Where possible, local workers would be hired to meet labor needs for Project construction, operations and maintenance (O&M), and decommissioning.
- The onshore facilities construction schedule would be designed to minimize impacts to the local community during the summer tourist season, generally between Memorial Day and Labor Day.
- The RWF would be constructed using multiple ports for fabrication and pre-commissioning and could utilize locations in different states throughout the geographic analysis area.
- Revolution Wind would hire local workers to the extent practical for RWF, RWEC, and interconnection facility management, fabrication, and construction.
- Non-local construction personnel typically include mariners, export cable manufacturing personnel, and other specialists who may temporarily relocate during the construction and decommissioning.
- Population impacts to the communities in the geographic analysis area could result mainly from the short-term influx of construction personnel. The total population change is assumed to equal the total number of non-local construction workers plus any accompanying family members. Due to the short duration of construction activities,<sup>6</sup> however, it is unlikely that non-local workers would relocate families to the area.

#### **Assumptions Regarding the Ability of “Local Suppliers” to Meet Project Demands for Specialized Project Components**

Several recent studies describe the offshore wind industry in the United States as being in its early developmental stages, and that as it currently exists, a relatively large share of the capital expenditures

---

<sup>6</sup> Revolution Wind lists the expected duration of various components of construction, installation, and commissioning of the Project in Sections 3.3 and 3.4 of the COP. It is assumed that the actual construction work on the Project would be completed within a 2-year window. Final engineering, design, and manufacturing of Project components would begin prior to actual construction and installation.

(CapEx) of the Project and the resulting jobs and income for offshore wind projects are likely to leak out to economies outside both the geographic analysis area and the United States as a whole. In its study for the U.S. Department of Energy, Navigant Consulting, Inc. (2013:x) states that because of the lack of U.S. demand for offshore components, “no domestic manufacturing facilities are currently serving the offshore wind market.” More recently, AECOM (2017:3-42) in its white paper, *Evaluating Benefits of Offshore Wind Energy Projects in NEPA*, developed for BOEM, states the following:

At each phase of offshore wind energy development, there is the potential to generate economic benefits locally, regionally, nationally, and/or internationally, depending on the extent to which these geographic areas can deliver the materials and skills necessary to develop offshore wind energy. Imported materials and services into the particular region being assessed represent lost opportunities for local production and employment. As the offshore wind energy industry advances in the U.S., more opportunities for domestic value can be created along the value chain and for supporting services. Supporting services could include consulting services, financial services, education and training, and research and development.

From a more quantitative perspective, BVG Associates Limited (BVG) (2017) concludes that for offshore projects constructed before 2022, the United States as a whole can expect to realize a minimum of 35% of the total expected jobs needed to meet U.S. demand, including jobs in the supply chain, development, and construction. In addition, BVG concludes that there is high probability that United States–based jobs could be between 50% and 63% of offshore wind–related jobs by 2022.

A March 2020 report by the American Wind Energy Association (2020) appears somewhat more conservative and assumes in its baseline scenario that by 2025, U.S. offshore wind installations will reach 2,000 MW per year with domestic content reaching 21% of the total capital expenditure. By 2030 it expects domestic content to increase to 45% in its baseline scenario.

Based on the economic impact methodology used, which is described in the next section, it is estimated that the local share of CapEx for the RWF will range from approximately 20% to 30% of pre-tax CapEx, while the local share for operating expenditures (OpEx) (excluding local taxes, lease payments, and finance charges) is estimated at 40% to 50% of total OpEx (excluding local taxes, lease payments, and finance charges).

## **Methodology Used to Estimate Employment and Value-Added Impacts of Alternatives Included in the Environmental Impact Statement**

This section describes the methodology used to generate estimates of the economic impacts (jobs and value added) of the Project and included alternatives. The first section describes the estimates of economic impacts of the Project as estimated in the COP, and the second section describes the methodology utilized to assess the impacts of permutations of the Project required for the EIS that were not included in the COP.

### **Economics Impacts of the Project as Estimated in the Construction and Operations Plan**

In the COP and Appendix BB to the COP, Guidehouse, Inc. (Guidehouse) (2020), using the Jobs and Economic Development Impacts Offshore Wind Model (JEDI-OWM) developed by the National

Renewable Energy Laboratory (NREL 2017), provides an economic impact analysis summarizing estimates of jobs, earnings, output, and value added that are expected to result from a “baseline” project with a nameplate capacity of 712 megawatts (MW) that utilizes 89 wind turbine generators (WTGs), each with a capacity to generate 8 MW of power. In COP Appendix BB, Guidehouse states that the “primary source for the model inputs was DWW Rev I who provided capital and operating budgets including costs, employment, and percent local data that are specific to the Project.” While the COP and Appendix BB summarize “baseline project” impacts, very few of the project-specific inputs provided to Guidehouse for use in its modeling exercise were actually specified. Two key confidential inputs<sup>7</sup> were included in Appendix BB—specifically, the total expected capital expenditures (Total CapEx) for the Project and the total local expenditure for O&M (Local OpEx). Table G-36 summarizes the “local” jobs and investment impacts of the baseline project in Rhode Island and Connecticut as estimated by Guidehouse.

**Table G-36. Summary of Jobs and Investment Impacts in Rhode Island and Connecticut for the Baseline Project**

Project Phase	Impact Category	Jobs	Earnings (\$ millions)	Output (\$ millions)	Value Added (\$ millions)
Construction	Direct	1,440	\$124.40	\$148.80	\$130.10
	Indirect	1,623	\$123.00	\$497.40	\$205.80
	Induced	793	\$51.10	\$137.60	\$81.10
	<b>Total</b>	<b>3,856</b>	<b>\$298.50</b>	<b>\$783.90</b>	<b>\$417.00</b>
Operations	Direct	58	\$4.90	\$4.90	\$4.90
	Indirect	18	\$1.50	\$51.40	\$47.50
	Induced	156	\$10.80	\$29.30	\$17.60
	<b>Total</b>	<b>233</b>	<b>\$17.20</b>	<b>\$85.70</b>	<b>\$70.00</b>

Source: Guidehouse (2021)

Note that the impacts of the baseline project (712-MW capacity utilizing eighty-nine 8-MW WTGs) during construction summarize impacts over the entire construction period. Construction job figures are in job years, which are full-time equivalent (FTE) jobs multiplied by the number of construction years. Operations jobs are FTEs for a period of 1 year.

Northern Economics—the contracted economic analysts for this EIS—have developed similar estimates using the same JEDI-OWM for an identically sized project using confidential inputs for Total CapEx and Total Local OpEx that were documented in Appendix BB, but without the additional inputs that were supplied to Guidehouse from Revolution Wind. These results are provided in Table G-37 while Table G-38 presents a percentage-based comparison of the two set of results. An examination of the tables indicates that there are differences in the two sets of tables—the additional inputs supplied by Revolution Wind to Guidehouse are important for directly estimating Project impacts.

<sup>7</sup> These key inputs are considered confidential and therefore cannot be specified in the EIS.

**Table G-37. Summary of Jobs and Investment Impacts in Rhode Island and Connecticut for the Baseline Project as Developed by Northern Economics**

Project Phase	Impact Category	Jobs	Earnings (\$ millions)	Output (\$ millions)	Value Added (\$ millions)
Construction	Direct	1,185	\$56.52	\$222.28	\$84.95
	Indirect	2,016	\$146.37	\$574.85	\$224.00
	Induced	1,376	\$86.84	\$237.76	\$145.13
	<b>Total</b>	<b>4,577</b>	<b>\$289.73</b>	<b>\$1,034.89</b>	<b>\$454.09</b>
Operations	Direct	42	\$4.32	\$4.32	\$4.32
	Indirect	222	\$17.06	\$59.12	\$25.50
	Induced	81	\$5.43	\$15.30	\$8.25
	<b>Total</b>	<b>345</b>	<b>\$26.81</b>	<b>\$78.73</b>	<b>\$38.07</b>

Source: Developed by Northern Economics using information in COP Appendix BB.

Note that the impacts of the baseline project (712-MW capacity utilizing eighty-nine 8-MW WTGs) during construction summarize impacts over the entire construction period. Construction job figures are in job years, which are full-time equivalent (FTE) jobs multiplied by the number of construction years. Operations jobs are FTEs for a period of 1 year.

**Table G-38. Percentage-Based Comparison of Jobs and Economic Development Impacts Offshore Wind Model Results**

Project Phase	Impact Category	Jobs in Table G-37 as a Percentage of Jobs in Table G-36 (%)	Earnings in Table G-37 as a Percentage of Earnings in Table G-36 (%)	Output in Table G-37 as a Percentage of Output in Table G-36 (%)	Value Added in Table G-37 as a Percentage of Value Added in Table G-36 (%)
Construction	Direct	82%	45%	149%	65%
	Indirect	124%	119%	116%	109%

Operations	Direct	71%	88%	88%	88%
	Indirect	1211%	1137%	115%	54%
	Induced	52%	50%	52%	47%
	<b>Total</b>	<b>148%</b>	<b>156%</b>	<b>92%</b>	<b>54%</b>

Source: Developed by Northern Economics.

Notwithstanding differences in the two sets of results, the full analysis of the economic impacts of the RWF requires estimates for the baseline project as well as estimates of economic impacts for the project if larger WTGs are used (i.e., 10-MW or 12-MW WTGs), and/or if the project capacity increased to its maximum capacity of 880 MW. In addition, because there is a suite of alternatives that could constrain the number of WTG positions that can be utilized (i.e., Alternatives C, D, and E) it will be necessary to

estimate economic impacts under a much wider range of Project configurations than the single configuration provided in the COP.

Therefore, a methodology that builds on the results developed by Guidehouse but allows the flexibility to estimate impacts under different configurations is required. This methodology is summarized below.

### Methodology to Estimate Project Permutations while Incorporating Information from Guidehouse

The methodology developed to estimate project permutations relies on the fact that the JEDI-OWM is essentially a scalable model—if the number of WTGs increases relative to baseline and all other project inputs are held constant, then the economic impacts generally change proportionally regardless of the starting values.

Assume for example that rather than the baseline project of 712 MW utilizing eighty-nine 8-MW WTGs, a larger project of 800 MW utilizing one-hundred 8-MW turbines is assessed. In this case, the only change is the number of WTGs used in the project, which increase by 12.4% from 89 to 100. The WTGs used are assumed to have the same unit cost as the monopile foundations on which they are installed. Similarly, assuming the spacing of the WTGs remains constant, the total length of the inter-array cable would also be expected to increase by amount that approaches 12.4%. Table G-39 shows the percentage differences between the 800-MW project and the 712 MW project as estimated by Northern Economics. Based on the built-in scalability of the JEDI-OWM model, it assumed that if Guidehouse were to run the same comparison, changing only the total project capacity by changing the number of WTGs and holding all other factors constant, the results would be remarkably similar as those shown below.

**Table G-39. Percentage-Based Comparison of Northern Economics JEDI-OWM Model Results between an 800-MW Project and a 712-MW Project**

Project Phase	Impact Category	Jobs with the 800-MW Project as a Percentage of Jobs in Table G-3 (%)	Earnings with the 800-MW Project as a Percentage of Earnings in Table G-3 (%)	Output with the 800-MW Project as a Percentage of Output in Table G-3 (%)	Value Added with the 800-MW Project as a Percentage of Value Added in Table G-3 (%)
Construction	Direct	110.8%	109.0%	106.6%	108.4%
	Indirect	109.8%	110.3%	110.9%	110.3%
	Induced	111.0%	111.2%	111.1%	111.1%
	<b>Total</b>	<b>110.4%</b>	<b>110.3%</b>	<b>110.0%</b>	<b>110.2%</b>
Operations	Direct	112.4%	112.4%	112.4%	112.4%
	Indirect	112.4%	112.4%	112.4%	112.4%
	Induced	112.4%	112.4%	112.4%	112.4%
	<b>Total</b>	<b>112.4%</b>	<b>112.4%</b>	<b>112.4%</b>	<b>112.4%</b>

Based on the results above, economic impacts of project permutations will be estimated using the following steps:

1. Estimate the economic impacts of the project permutation by making appropriate changes to Northern Economics' baseline project inputs
2. Estimate the percentage change of the permutation against the Northern Economic baseline project impacts.
3. Apply this percentage change to the baseline project impacts estimated by Guidehouse.

### **Other Assumptions Used to Estimate Impacts of Project Permutations**

In addition to the scaling methodology described above, the following assumptions are also utilized in the estimates of economic impacts.

#### ***Assumptions Regarding the Minimum Project Size If Larger Capacity Wind Turbine Generators are Utilized***

Guidehouse does not explicitly state why it assumed a 712-MW project as opposed to a 704-MW project, which would match the Project's existing power purchase agreement (PPA) and the minimum project listed in the project design envelope (PDE), as reported in Appendix D. Note that a 712-MW project with eighty-nine 8-MW WTGs exceeds the PPA by one full 8-MW WTG. Therefore, it is assumed that excess capacity will be built by an amount equal to one WTG in excess of the number of WTGs nominally needed to meet the 704-MW PPA. Thus, if 10-MW WTGs are used, 71 WTGs (with a total capacity of 710 MW) would nominally be able meet the 704 PPA. It is assumed however that one additional WTG would be installed for a total of 720 MW—the extra WTG will provide greater reliability for customers of the project. Similarly, if 12-MW WTGs are utilized, 63 WTGs would nominally meet the PPA capacity with 708 MW. Adding one additional WTG (64 in total) will result in a project capacity of 720 MW and provide greater reliability.<sup>8</sup>

#### ***Assumptions Regarding the Relative Project Capital Costs when Higher Capacity Wind Turbine Generators Are Utilized***

Information regarding the comparative capital costs of offshore wind projects that utilize smaller or larger WTGs are not readily available, although it is generally assumed and reported that utilization of larger WTGs generally results in lower overall capital costs and greater overall project efficiency. An updated version of the JEDI-OWM (Release 2021-2) has been made available (NREL 2021), which enables users to estimate project capital cost using a choice of three WTG capacities: 6 MW, 12 MW, or 15 MW.<sup>9</sup> Figure G-15 shows hypothetical capital cost of a 720-MW project with three alternative assumptions regarding the size of the WTGs. Moving from utilization of 6-MW WTGs to utilization of 12-MW WTGs results in a nominal CapEx reduction of approximately \$250 million or 10% of total CapEx. Using 15-MW WTGs rather than 12-MW results in a smaller (2%) CapEx reduction. The 2nd order polynomial

---

<sup>8</sup> The Project developer has confirmed that the assumption is reasonable.

<sup>9</sup> While JEDI-OWM Release 2021-2 includes this built-in capital cost comparison feature, the model does not yet appear to include built-in local economic impact coefficients linked to multipliers that enable the user to generate economic impacts in terms of jobs, earnings, and value added.

trendline shown in the figure was used to estimates of CapEx savings for similar size projects using different sizes of WTGs ranging from 6 MW to 16 MW.

Source: Developed by Northern Economics using JEDI-OWM Release 2021-2 (NREL 2021) and the RWF Project location.

Note: Reviewers should not assume the project capital costs shown here reflect actual estimates of the project capital costs for Revolution Wind.

**Figure G-15. Hypothetical Capital Cost Estimates of a 720 MW Wind Farm with Three WTG Sizes**

**Assumptions Regarding the Maximum Capacity Limits**

The PDE summarized in Appendix D states that the maximum capacity of the Project is 880 MW. The PDE also indicates that WTGs ranging from 8 MW to 12 MW will be considered, but no more than 100 WTGs would be utilized. If one hundred 8-MW WTGs are utilized, then the largest project that could be built is 800 MW. An 880-MW project could be built using eighty-eight 10-MW WTGs, but if 12-MW WTGs are used, then seventy-three WTGs achieves a project capacity of 876 MW; utilizing seventy-four 12-MW WTGs results in a project that exceeds the maximum project capacity by 8 MW (i.e., project capacity would be 888 MW, and thus would not be developed).

Based on guidance from Revolution Wind (Roll 2021) indicating that they would not exceed the 880 MW maximum capacity of the project established in the PDE, it is presumed that the maximum project size that would be developed if 12-MW WTGs are used would comprise 73-WTGs with a total capacity of 876 MW. Similarly, if 14-MW WTGs are authorized as in Alternative F, the largest project that would be developed would utilize 62 14-MW WTGs for a total capacity of 868 MW, noting that adding an additional 14-MW turbine results in 882 MW of total capacity project which would exceed the 880 MW maximum capacity limit in the PDE.

## **Environmental Justice**

This section provides maps displaying the environmental justice characteristics of the counties and cities/towns in the geographical analysis area. The geographical analysis area includes counties that contain or are adjacent to ports that may be used for Project construction staging, O&M, or decommissioning; contain major ports that commercial fisheries that could be affected by the Project; that contain the proposed Project landing site and onshore transmission cable; or for which some portion of the county lies within the visual study area. Minority and low-income percentages are based on 2015-2019 American Community Survey 5-year summary file data obtained from EPA's EJScreen, an environmental justice screening and mapping tool (EPA 2021).

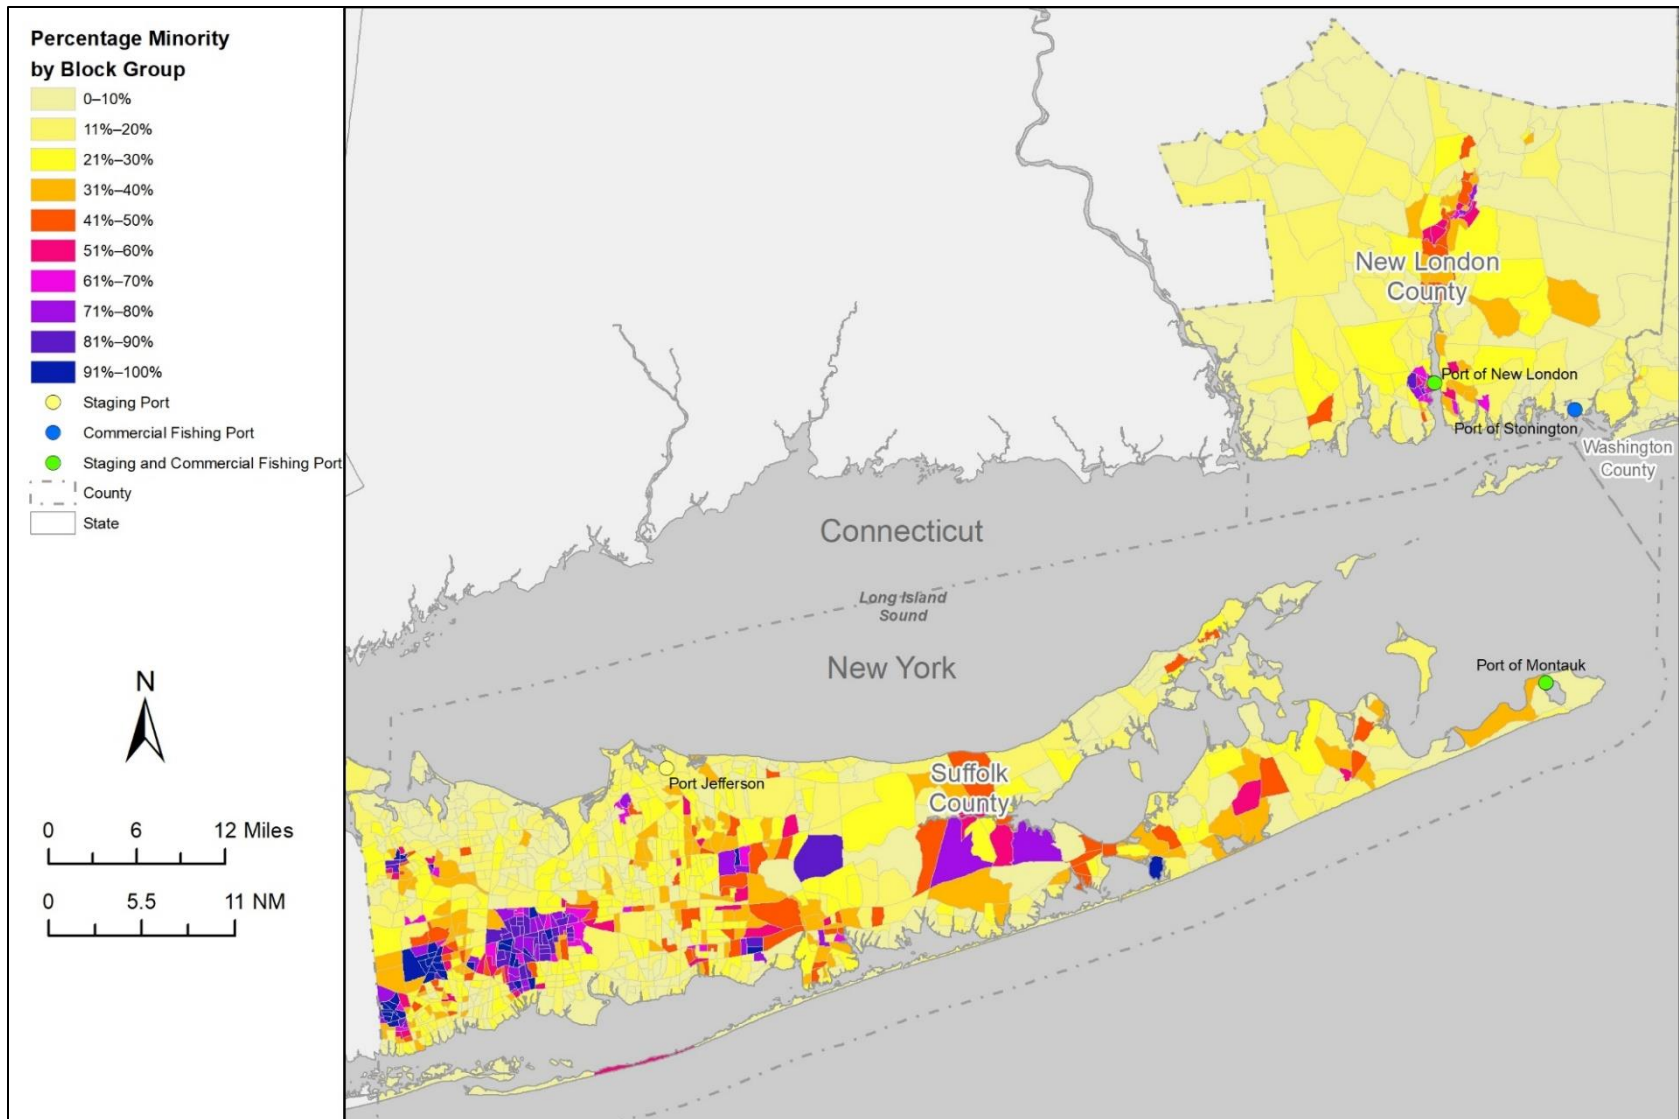

Figures G-16 through G-21 show minority population percentages by census block group, while Figures G-22 through G-27 show low-income population percentages by census block group. Figures G-28 through G-33 show the locations of block groups that have been determined to be potential environmental justice areas of concern because of concentrations of minority or low-income populations (see Section 3.12.1 for additional details).

Tables G-EJ1 through G-EJ26 provide additional information about the identity of the block groups determined to be potential environmental justice areas of concern. The tables list the multi-digit identifier of each of these block groups. The block group identifiers are organized by county and sub-county name (city, town, or census designated place). Each identifier listed in the tables include the census tract (CT) code and census block group (BG) code as reported by the U.S. Census Bureau in the online mapping tool available at <https://tigerweb.geo.census.gov/tigerweb/> (U.S. Census Bureau 2021). The fully specified identifiers for census block groups include the two-digit code for the state and three-digit code for the county. The captions for the tables include these codes. Each block group is categorized based on whether it is a potential environmental justice concern because of its minority population, low-income population, or both.

## Electromagnetic Fields

Figure G-34. Comparison of electromagnetic fields produced by offshore wind farm transmission cables to the Earth's background magnetic field.

## **Visual Resources**

Visual resources impacts associated with the RWF were evaluated and determined based on information and findings associated with the RWF visual impact assessment (VIA) (EDR 2021) and the application of BOEM's Assessment of *Seascape, Landscape, and Visual Impacts of Offshore Wind Energy Developments on the Outer Continental Shelf of the United States* methodology (Sullivan 2021), also known as seascape, landscape, and visual impacts assessment (SLVIA). At the request of BOEM, the SLVIA methodology for determination of impacts to key observation points (KOPs) (comprising the VIA component of the SLVIA) and impacts to character areas (ocean [OCA], seascapes [SCA] and landscapes [LCA]) (comprising the seascape and landscape impacts assessment [SLIA] component of the SLVIA) was applied (Sullivan 2021:29–33) to previously documented evaluation and impact methodologies associated with the RWF VIA.

The SLVIA impact methodology was crosswalked with the RWF VIA to extract previously documented existing views and proposed Project visual conditions and information associated with the Proposed Action (Table G-40 and G-41). KOP information and character area information associated with the 2021 Visual Impact Assessment was also extracted and applied to Alternatives B, C, D, and E and compiled in Tables G-42 thru G-47 to provide a consistent baseline of information related to determination of impacts associated with KOPs and character areas in relation to the Proposed Action for comparison purposes.

Up to 37 viewing condition scenarios (e.g., daytime, sunset and nighttime) associated with 28 individual KOPs were evaluated for each action alternative associated with the VIA component of the SLVIA (VIA Tables G-40a thru G-40b, G-42, G-44a thru G-44b and G-46). Not all KOPs were evaluated for all action alternatives. The orientation of specific KOPs in relation to action alternatives were reviewed and selected for further analysis based on geographic proximity of each action alternative. Each table combines the sensitivity rating based on a location's susceptibility to change and its perceived value to society based on information from the RWF VIA as well as the magnitude rating consisting of size or scale of the change associated with the proposed Project, the geographic extent of the change, and the duration and reversibility of the change for each KOP, for an overall impact determination finding of major, moderate, minor, or negligible (Sullivan 2021), which correspond to impacts described in the EIS. Cumulative impacts associated with KOPs (VIA Table G-48) have been evaluated and identify the level of impact associated with the contribution of the Proposed Action to the No Action Alternative.

Impacts associated with the SLIA component of the analysis (SLIA Tables G-41a thru G-41e, G-43a thru G-43c, G-45a thru G-45c and G-47a thru G-47c) crosswalk and categorize landscape similarity zones as described in the RWF VIA with SLVIA character area descriptions to provide a general understating of OCA, SCA and LCA relationships. Visibility analyses to determine the overall character area visibility associated with each alternative in comparison to the Proposed Action to provide a basis for impact determination is included in each table. Impacts to Specially Designated Areas have also been included in each SLIA table and categorized based on Specially Designated Area type.

Impact findings are based on the best available information associated with the RWF VIA for the action alternatives, and some deviation between the RWF VIA impact findings and the SLVIA impacts findings as applied in the following tables may occur due to differences in methodological approaches.

**Table G-40a. Visual Impact Assessment Impact Matrix for Alternative B (Proposed Action) (see Table G-40b for continuation table)**

KOP Number	KOP Name	Representative Character Area (SCA, LCA, OCA)	Viewing Direction	Elevation (feet)	Lighting Angle of Proposed Action Simulation	Visibility Threshold	Distance to Nearest Turbine (miles/nautical miles)	Horizontal Field of View Occupied	Susceptibility Rationale	Susceptibility Rating (high, medium, low)	Value Rationale	Value Rating (high, medium, low)	SLVIA Sensitivity Rating Rationale	SLVIA Sensitivity Rating (high, medium, low)
AI01	Brenton Point State Park	SCA/LCA	South-Southeast	34.9	Sidelit	VTL2	16.7/14.5	180	Landscape is characteristic of recreational development; seascape appears intact	Low	Local Residents, Tourists/Vacationers, Fishing Community  Newport/Ocean Drive State Scenic Area, Brenton Point State Park, Rhode Island Historic District, Ocean Drive National Historic Landmark	High	Popular destination for residents and tourists who enjoy sightseeing, recreating, and sunbathing.	Medium
AI01	Brenton Point State Park - Night	SCA/LCA	South-Southeast	34.9	N/A	VTL2	16.7/14.5	180	Night seascape appears intact	Medium	Local Residents, Tourists/Vacationers, Fishing Community  Newport/Ocean Drive State Scenic Area, Brenton Point State Park, Rhode Island Historic District, Ocean Drive National Historic Landmark	High	Popular destination for residents and tourists who enjoy sightseeing.	High
AI03	Newport Cliff Walk	SCA/LCA	Southeast to South-Southeast	22.8	Sidelit	VTL3	15.3/13.3	180	Landscape is characteristic of natural areas and minimal recreational development; seascape appears intact	Medium	Local Residents, Tourists/Vacationers  Newport/Ocean Drive State Scenic Area, Cliff Walk National Recreation Trail, Newport National Historic Landmark	High	Popular among residents and tourists, particularly during the summer season. No other human-made features are visible.	High
AI05	Sachuest Point National Wildlife Refuge	LCA	South-Southeast	21.7	Variable	VTL4	14.8/12.9	180	Landscape is characteristic of natural areas and minimal recreational development; seascape appears intact	Medium	Local Residents, Tourists/Vacationers; Educational, Birders  Sachuest Point National Wildlife Refuge, Sachuest Point State Scenic Area	High	Popular destination for hikers, fishermen, and nature enthusiasts, particularly birders	High
AI06	Sachuest Beach (Second Beach)	SCA	South-Southeast to South	10.2	Sidelit	VTL3	16.0/13.9	160	Landscape is characteristic of minimal shoreline recreational development; seascape appears intact	Medium	Local Residents, Tourists/Vacationers  Sachuest Beach (Second Beach), Narragansett Bay	Medium	Residents and vacationers regularly use Second Beach, particularly during the summer.	Medium
AI07	Hanging Rock (Norman Bird Sanctuary)	LCA	Southeast to South-Southeast	67.3	Backlit	VTL5	16.2/14.1	160	Landscape has infrastructure development and recreational development; seascape appears intact	Medium	Local Residents, Tourists/Vacationers  Norman Bird Sanctuary, Paradise Avenue and Associated Roads, State Scenic Byway, Second Beach, Paradise Rocks Rhode Island Historic District	High	Popular destination for residents and tourists who enjoy birdwatching, sightseeing, recreating, and sunbathing.	High
BI04	Southeast Lighthouse	SCA	East	161.1	Sidelit	VTL2	15.3/13.3	180	Landscape has characteristic historic lighthouse setting with supporting development; BIWF is visible (3 miles)	High	Local Residents, Tourists/Vacationers  Southeast Light National Historic Landmark, Mohegan Bluffs Scenic Area	High	Maintenance of views from historic landmark and scenic area; user groups	High

KOP Number	KOP Name	Representative Character Area (SCA, LCA, OCA)	Viewing Direction	Elevation (feet)	Lighting Angle of Proposed Action Simulation	Visibility Threshold	Distance to Nearest Turbine (miles/nautical miles)	Horizontal Field of View Occupied	Susceptibility Rationale	Susceptibility Rating (high, medium, low)	Value Rationale	Value Rating (high, medium, low)	SLVIA Sensitivity Rating Rationale	SLVIA Sensitivity Rating (high, medium, low)
BI04	Southeast Lighthouse - Night	SCA	East	161.1	N/A	VTL 4	15.3/13.4	180	Night seascape appears intact	High	Local Residents, Tourists/Vacationers  Southeast Light National Historic Landmark, Mohegan Bluffs Scenic Area	High	Maintenance of views from historic landmark and scenic area; user groups	High
BI12	Clayhead Trail	SCA	East	78.8	Sidelit	VTL1	15.9/13.8	180	Landscape is characteristic of intact natural shoreline; seascape appears intact	Medium	Tourists/Vacationers, Local Residents  Clayhead Trail State Scenic District; Clay Head Preserve	High	Clayhead Trail State Scenic District; popular destination for residents and tourists who enjoy sightseeing and recreating.	High
BI13	North Light	SCA	East	27.5	Backlit	VTL4	17.2/15.0	160	Landscape has compatible residential and recreational development; seascape appears intact	Moderate	Tourists/Vacationers, Local Residents  North Light National Register Historic Property, Beach Plum Neck/North Light State Scenic Area, Corn Neck Road Historic District (NRE)	High	Remote and private scenic/historic experience set among dune landforms and dense dune vegetation.	High
CI01	Cuttyhunk Island	SCA	South to Southwest	151.3	Backlit	VTL5	13.9/12.1	180	Landscape has compatible residential and recreational development; seascape appears intact	High	Local Residents, Tourists/Vacationers  Elizabeth Islands State Scenic Area, Buzzards Bay	High	Cuttyhunk is a remote island, which hosts a small number of year-round residents and a large influx of tourists during the summer months.	High
CO1	Beavertail Lighthouse	SCA	Southeast to South-Southeast	27.5	Sidelit	VTL1	18.4/15.9	180	Landscape is characteristic of intact natural shoreline; seascape appears intact	Low	Local Residents, Tourists/Vacationers  National Register Historic Site, Beavertail Point Scenic Area, Rhode Island Historic District, Beavertail State Park	High	Popular destination for residents and tourists who enjoy sightseeing, recreating, fishing, and sunbathing.	Medium
LI04	Montauk Point State Park	SCA/LCA	East	48.0	Sidelit	VTL1	31.5/27.4	90	Landscape has characteristic historic lighthouse setting with supporting compatible development; BIWF is visible (approximately 17 miles)	Low	Local Residents, Tourists/Vacationers, Fishing Community  Montauk Point State Park, National Register Historic Site, Scenic Area of Statewide Significance	High	Montauk Point Scenic Area of Statewide Significance; Montauk State Park is a popular destination for local residents and tourists/vacationers. Year-round outdoor recreational opportunities include wildlife viewing and photography.	Medium
LI04	Montauk Point State Park - Night	SCA/LCA	East	48.0	N/A	VTL2	31.5/27.4	40	Night seascape influenced by existing BIWF lighting	Medium	Local Residents, Tourists/Vacationers, Fishing Community  Montauk Point State Park, National Register Historic Site, Scenic Area of Statewide Significance	High	Montauk Point Scenic Area of Statewide Significance; Montauk State Park is a popular destination for local residents and tourists/vacationers. Year-round outdoor recreational opportunities include wildlife viewing and photography.	High

KOP Number	KOP Name	Representative Character Area (SCA, LCA, OCA)	Viewing Direction	Elevation (feet)	Lighting Angle of Proposed Action Simulation	Visibility Threshold	Distance to Nearest Turbine (miles/nautical miles)	Horizontal Field of View Occupied	Susceptibility Rationale	Susceptibility Rating (high, medium, low)	Value Rationale	Value Rating (high, medium, low)	SLVIA Sensitivity Rating Rationale	SLVIA Sensitivity Rating (high, medium, low)
MM01	Gooseberry Island	LCA	South to South-Southwest	16.0	Backlit	VTL4	15.1/13.2	180	Landscape is characteristic of intact natural shoreline; seascape appears intact	Medium	Local Residents, Tourists/Vacationers  Horseneck Beach State Reservation, Westport South Dartmouth Unit State Scenic Area, Buzzards Bay	Medium	Buzzards Bay is near Gooseberry Public Beach, south of Horseneck Beach State Reservation on the mainland, and within the Westport South Dartmouth State Scenic Area.	Medium
MM04	Nobska Lighthouse	SCA/LCA	South-Southwest to Southwest	53.7	Sidelit	VTL1	28.2/24.5	90	Landscape has characteristic historic lighthouse setting with supporting compatible development; seascape appears intact	Low	Local Residents, Tourists/Vacationers  Nobska Lighthouse National Register Historic Site, Church Street/Nobska Point State Historic District, Nobska Beach Association Beach	High	Maintenance of views from historic landmark and scenic area; user groups	Medium
MV02	Philbin Beach	SCA	South-Southwest to West-Southwest	10.5	Variable	VTL5	13.6/11.8	180	Landscape is characteristic of intact natural shoreline; seascape appears intact	High	Local Residents, Tourists/Vacationers  Gay Head West Tisbury Unit State Scenic Area, Philbin Beach	High	A popular destination for residents and tourists who enjoy sightseeing, surfing, swimming, recreating, and sunbathing.	High
MV03	Lucy Vincent Beach	SCA	South-Southwest to Southwest	27.7	Backlit	VTL 3	15.5/13.5	90	Landscape has compatible residential and recreational development; seascape appears intact though occupied by beach users	Medium	Local Residents, Tourists/Vacationers  Gay Head West Tisbury Unit State Scenic Area, Lucy Vincent Beach	High	Provides recreational opportunities for town residents including swimming, sunbathing, walking, nature viewing, fishing, and photography.	High
MV03	Lucy Vincent Beach - Sunset	SCA	South-Southwest to Southwest	27.7	Backlit	VTL 4	15.5/13.6	90	Landscape has compatible residential and recreational development; seascape appears intact with minimal influence of beach users	High	Local Residents, Tourists/Vacationers  Gay Head West Tisbury Unit State Scenic Area, Lucy Vincent Beach	Medium	Provides recreational opportunities for town residents including walking, nature viewing, and photography.  Evening / night less occupied	Medium
MV05	Moshup Beach	SCA	South-Southwest to West-Southwest	23.1	Variable	VTL 5	13.7/11.9	180	Landscape is characteristic of intact natural shoreline; seascape appears intact	High	Local Residents, Tourists/Vacationers  Gay Head West Tisbury State Scenic Area, Moshup Beach	High	Popular public beach; open to residents and tourists and is a popular destination in the summertime.	High
MV05	Moshup Beach - Sunset	SCA	South-Southwest to West-Southwest	23.1	Backlit	VTL 5	13.7/11.10	180	Landscape is characteristic of intact natural shoreline; seascape appears intact	High	Local Residents, Tourists/Vacationers  Gay Head West Tisbury State Scenic Area, Moshup Beach	High	Popular public beach; open to residents and tourists and is a popular destination in the summertime.	High
MV07	Aquinnah Overlook	SCA	South to Southwest	145.5	Sidelit	VTL 3	13.7/11.9	180	Landscape has compatible recreational development; seascape appears intact	High	Local Residents, Tourists/Vacationers  Gay Head Aquinnah Shops Area State Historic Area, Gay Head West Tisbury Unit State Scenic Area, Gay Head Cliffs National Natural Landmark	High	The Aquinnah Overlook is a dedicated viewing platform, providing opportunities for sweeping views of the ocean, beach, shoreline bluffs, and natural vegetation.	High

KOP Number	KOP Name	Representative Character Area (SCA, LCA, OCA)	Viewing Direction	Elevation (feet)	Lighting Angle of Proposed Action Simulation	Visibility Threshold	Distance to Nearest Turbine (miles/nautical miles)	Horizontal Field of View Occupied	Susceptibility Rationale	Susceptibility Rating (high, medium, low)	Value Rationale	Value Rating (high, medium, low)	SLVIA Sensitivity Rating Rationale	SLVIA Sensitivity Rating (high, medium, low)

MV07	Aquinnah Overlook - Night	SCA	South to Southwest	145.5	N/A	VTL 3	13.7/11.11	180	Night seascape appears intact	High	Local Residents, Tourists/Vacationers  Gay Head Aquinnah Shops Area State Historic Area, Gay Head West Tisbury Unit State Scenic Area, Gay Head Cliffs National Natural Landmark	High	The Aquinnah Overlook is a dedicated viewing platform, providing opportunities for sweeping views of the ocean.	High
MV09	Gay Head Lighthouse	SCA	South to West-Southwest	162.1	Sidelit	VTL 4	13.9/12.1	180	Landscape has characteristic historic lighthouse setting with supporting compatible development; seascape appears intact	High	Local Residents, Tourists/Vacationers  Gay Head Lighthouse National Historic Landmark, Gay Head West Tisbury Unit State Scenic Area	High	Gay Head Lighthouse is a popular destination for residents and tourists interested in historic lighthouses and picturesque ocean views.	High
MV10	South Beach State Park	SCA	Southwest to West-Southwest	17.0	Sidelit	VTL3	22.0/19.1	160	Landscape is characteristic of intact natural shoreline; seascape appears intact other than single buoy on horizon	Moderate	Local Residents, Tourists/Vacationers  South Beach State Park	High	The beach is a popular destination for local residents as well as tourists/vacationers, and is heavily utilized during the summer months for recreating, sunbathing, and surfing.	High
MV11	Wasque Point	SCA	West-Southwest	13.6	Backlit	VTL 2	24.8/21.5	140	Landscape is characteristic of intact natural shoreline; seascape appears intact	Low	Local Residents, Tourists/Vacationers  Wasque Point	Medium	A variety of public lands used by residents and tourists/vacationers for hiking, sunbathing, beachcombing, and wildlife viewing.	Low
MV12	Peaked Hill Reservation	LCA	South-Southwest to Southwest	305.1	Backlit	VTL 1	16.3/14.2	180	Landscape is characteristic of intact, natural forested shoreline; seascape appears intact	Low	Local Residents, Tourists/Vacationers  Identified by the Wampanoag of Gay Head	High	Location has particular cultural importance and is a popular destination for members of the Aquinnah Tribe of Gay Head.	High
MV12	Peaked Hill Reservation - Sunset	LCA	South-Southwest to Southwest	305.1	Backlit	VTL4	16.3/14.2	180	Landscape is characteristic of intact, natural densely forested shoreline; seascape appears intact	Medium	Local Residents, Tourists/Vacationers  Identified by the Wampanoag of Gay Head	High	Location has particular cultural importance and is a popular destination for members of the Aquinnah Tribe of Gay Head	High
MV13	Edwin DeVries Vanderhoop Homestead	SCA	South to Southwest	17.0	Backlit	VTL5	13.8/12.0	180	Landscape is characteristic of intact natural shoreline; seascape appears intact	High	Local Residents, Tourists/Vacationers  Edwin D. Vanderhoop Homestead National Register Historic Site, Head West Tisbury Unit State Scenic Resource	High	Large numbers of residents and tourists during the summer months while visiting the Aquinnah Cultural Center	Medium

KOP Number	KOP Name	Representative Character Area (SCA, LCA, OCA)	Viewing Direction	Elevation (feet)	Lighting Angle of Proposed Action Simulation	Visibility Threshold	Distance to Nearest Turbine (miles/nautical miles)	Horizontal Field of View Occupied	Susceptibility Rationale	Susceptibility Rating (high, medium, low)	Value Rationale	Value Rating (high, medium, low)	SLVIA Sensitivity Rating Rationale	SLVIA Sensitivity Rating (high, medium, low)
NI10	Madaket Beach	SCA	West	20.6	Backlit	VTL1	34.6/30.0	60	Landscape has compatible recreational development; seascape appears intact	Low	Local Residents, Tourists/Vacationers  Madaket Beach, Nantucket National Historic Landmark	High	Beach is a popular destination for residents and tourists who enjoy sightseeing, recreating, and sunbathing.	Medium
NL01	Nomans Land Island NWR (not occupied)	SCA	West-Southwest	42.1	Sidelit	VTL5	8.7/7.5	180	Landscape is characteristic of intact natural shoreline/bluffs; seascape appears intact; minimal human influence	Medium	No Access  Nomans Land Island National Wildlife Refuge/ natural and intact	Low	Uninhabited island with intact seascape	Low
NL01	Nomans Land Island NWR - Sunset (not occupied)	SCA	West-Southwest	42.1	Backlit	VTL6	8.7/7.6	180	Landscape is characteristic of intact natural shoreline/bluffs; seascape appears intact	High	No Access  Nomans Land Island National Wildlife Refuge	Medium	Uninhabited island with intact seascape	Medium
RI01	Watch Hill Lighthouse	SCA/LCA	East-Southeast	24.1	Sidelit	VTL1	32.8/28.5	160	Landscape has compatible residential and recreational development; seascape appears intact	Low	Local Residents, Tourists/Vacationers  Watch Hill National Register Historic District, Watch Hill State Scenic Area	High	Popular destination for residents and tourists who enjoy sightseeing, history, and recreating.	Medium
RI06	Trustom Pond NWR	SCA/LCA	Southeast	13.8	Backlit	VTL3	22.6/19.6	180	Landscape is characteristic of intact natural shoreline; seascape appears intact	Medium	Local Residents, Tourists/Vacationers  Trustom Pond/Matunuck State Scenic Area, Trustom Pond National Wildlife Refuge	Medium	Near the Trustom Pond/Matunuck State Scenic Area, and the Trustom Pond National Wildlife Refuge Public Beach.	Medium
RI08	Scarborough Beach State Park	SCA	Southeast	14.8	Backlit	VTL4	19.1/16.6	180	Landscape is characteristic of recreational shoreline development; seascape appears intact	Medium	Local Residents, Tourists/Vacationers  Scarborough State Beach	Medium	Popular destination for residents and tourists who enjoy sightseeing, recreating, and sunbathing.	Medium
RI09	Narragansett Beach	SCA	Southeast	10.5	Backlit	VTL1	20.0/17.4	160	Landscape has compatible residential and recreational development; seascape appears intact	Low	Local Residents, Tourists/Vacationers  Narragansett Town Beach	High	Very popular vacation destination and hosts large tourist crowds in the summer with up to 10,000 guests per day.	Medium

Table G-40b. Visual Impact Assessment Impact Matrix for Alternative B (Proposed Action)

KOP Number	Size or Scale Rationale	Size and Scale Rating (large, medium, small)	Geographic Extent Rationale (Appendix A COP VIA)	Geographic Extent Rating (large, medium, small)	Duration/Reversibility Rationale	Duration/Reversibility Rating (good, fair, poor)	SLVIA Magnitude Rating Rationale	SLVIA Magnitude Rating (large, medium, small)	SLVIA Overall Impact Level Rationale	SLVIA Overall Impact Level (major, moderate, minor, negligible)
AI01	Visibility of the entire RWF extends inland across public open space and into the adjacent Newport Country Club before breaking up into discrete areas of visibility of less than half of the WTGs due to screening provided by vegetation, structures, and topography.	Small	Number of turbines visible - 100 Percent visibility - 26%–50%	Medium	Long-term (30 years)/Reversible	Fair	Overall size and scale along with visibility reduces contrast and perceivability	Medium	Importance of recreation and historic resources, duration and visibility from KOP	Moderate

KOP Number	Size or Scale Rationale	Size and Scale Rating (large, medium, small)	Geographic Extent Rationale (Appendix A COP VIA)	Geographic Extent Rating (large, medium, small)	Duration/Reversibility Rationale	Duration/Reversibility Rating (good, fair, poor)	SLVIA Magnitude Rating Rationale	SLVIA Magnitude Rating (large, medium, small)	SLVIA Overall Impact Level Rationale	SLVIA Overall Impact Level (major, moderate, minor, negligible)
A101	The addition of the flashing warning lights on the WTGs and decks will add evidence of human development and increase visual clutter at the horizon.	Medium	Number of turbines visible - Percent visibility - %  Information not available in RWF VIA	Large	Long-term (30 years)/Reversible	Fair	Prominence and dominance of warning lights in non-developed setting	Large	The addition of aviation warning lights along the horizon within the viewshed would detract from the overall nighttime environment.	Major
A103	Project will not be conspicuous to casual observers from this KOP, and the unique rock features in the foreground will remain the focal point in this view.	Medium	Majority of turbines visible - 100 Percent visibility - 51%–75%	Medium	Long-term (30 years)/Reversible	Fair	Overall size and scale along with visibility reduces contrast and perceivability	Medium	Importance of recreation and historic resources; proximity of residential viewers, duration, and visibility from KOP	Moderate
A105	Project will be prominent in dramatic 180-degree open views and appears wild and undisturbed with open view of the ocean framed by boulders in the foreground.	Large	Number of turbines visible - 100 Percent visibility - 26%–50%	Medium	Long-term (30 years)/Reversible	Fair	Size and scale in relation to existing conditions along with percentage of visibility	Large	Importance of natural landscape and natural recreation opportunities, scenic values in a preserved seascape; prominence of turbines	Major
A106	Turbines, are noticeable but are not spatially dominant.	Medium	Number of turbines visible - 99 Percent visibility - 51%–75%	Medium	Long-term (30 years)/Reversible	Fair	Size and scale in relation to existing conditions along with percentage of visibility	Medium	Importance of recreation along intact shoreline; turbines will be visible along horizon, although will not be a dominant feature in the seascape	Moderate
A107	Existing foreground built features attract attention initially, although turbines across the horizon become a dominant focal point of the view.	Large	Number of turbines visible - 100 Percent visibility - 2%–25%	Medium	Long-term (30 years)/Reversible	Fair	Size and scale in relation to existing conditions along with percentage of visibility	Large	Importance of natural landscape and natural recreation opportunities, scenic values associated with byway; prominence of turbines	Major
B104	Highly visible and likely to attract the attention of lighthouse visitors based on lighting conditions, although not as prominent as the existing BIWF.	Medium	Majority of turbines visible - 97 Percent visibility - 26%–50%	Medium	Long-term (30 years)/Reversible	Fair	Visibility based on lighting conditions, existing BIWF visibility, duration	Medium	Importance of recreation and historic resources, duration and visibility from KOP based on lighting conditions	Moderate
B104	The addition of the flashing warning lights on the WTGs and decks will add evidence of human development and increase visual clutter at the horizon.	Large	Number of turbines visible - Percent visibility - %  Information not available in RWF VIA	Large	Long-term (30 years)/Reversible	Fair	Visibility based on lighting conditions, existing BIWF visibility, duration	Large	Importance of recreation and historic resources, duration and visibility from KOP based on lighting conditions	Major

KOP Number	Size or Scale Rationale	Size and Scale Rating (large, medium, small)	Geographic Extent Rationale (Appendix A COP VIA)	Geographic Extent Rating (large, medium, small)	Duration/Reversibility Rationale	Duration/Reversibility Rating (good, fair, poor)	SLVIA Magnitude Rating Rationale	SLVIA Magnitude Rating (large, medium, small)	SLVIA Overall Impact Level Rationale	SLVIA Overall Impact Level (major, moderate, minor, negligible)
<b>BI12</b>	Visible and likely to attract attention resulting from angle of view of WTGs	Medium	Number of turbines visible - 100 Percent visibility - 51%–75%	Medium	Long-term (30 years)/Reversible	Fair	Visibility of WTGs within viewshed along horizon line within viewshed	Medium	Importance of preservation of scenic district and uses; proximity and visibility of Project	Moderate
<b>BI13</b>	Turbines become the focus of views out to the water and the tight spacing and numerous turbines along the horizon draw the viewers' eye away from natural features.	Large	Number of turbines - 100 Percent visibility - 76%–100%	Large	Long term (35 years)/Reversible	Fair	Size and scale in relation to existing conditions along with percentage of visibility	Large	Importance of recreation and historic resources; proximity of residential viewers, duration and visibility from KOP	Moderate
<b>CI01</b>	Turbines and OSS facilities would begin to dominate the horizon and are uncharacteristic of existing conditions.	Large	Number of turbines visible - 99 Percent visibility - 76%–100%	Large	Long term (35 years)/Reversible	Fair	Prominence and dominance of turbines in non-developed setting	Large	Importance of recreation and historic resources; size, scale, and visibility from KOP	Major
<b>CO1</b>	Turbines are perceivable along horizon line, although the degree of change from existing condition would be minor.	Small	Number of turbines visible - 100 Percent visibility - 51%–75%	Medium	Long term (35 years)/Reversible	Fair	Overall size and scale along with visibility reduces contrast and perceivability	Small	Importance of recreation and historic resources; size, scale and visibility from KOP	Minor
<b>LI04</b>	Due to distance and viewer position in relation to other features in the landscape, there would be minor change in the existing condition.	Small	Number of turbines visible - 91 Percent visibility - 51%–75%	Medium	Long term (35 years)/Reversible	Fair	Project would not be perceivable along horizon due to distance and atmospheric influences	Small	Project would not be perceivable along horizon due to distance and atmospheric influences. Occasional blade tips and movement may be noticeable by the focused viewer or backlighting.	Negligible
<b>LI04</b>	Due to distance and viewer position in relation to other features in the landscape, there would be minor change in the existing condition.	Small	Number of turbines visible - Percent visibility - %  Information not available in RWF VIA	Small	Long term (35 years)/Reversible	Fair	Project would be perceivable along horizon if observer views were focused toward lighting	Small	The addition of aviation warning lights along the horizon within the viewshed would be perceivable by the focused viewer, but not a dominant element as compared to other existing warning lighting sources associated with BIWF that are in closer proximity (approximately 16 miles).	Negligible
<b>MM01</b>	Visible and likely to attract the attention resulting from angle of view of WTGs	Medium	Number of turbines visible - 100 Percent visibility - 76%–100%	Medium	Long term (35 years)/Reversible	Fair	Project blades would be perceivable along horizon	Medium	Importance of natural landscape and natural recreation opportunities, scenic values; prominence of turbines	Minor
<b>MM04</b>	Degree of change in existing conditions would be minimal due to distance and existing modifications within the foreground.	Small	Number of turbines visible - 90 Percent visibility - 51%–75%	Medium	Long term (35 years)/Reversible	Fair	Distance to project, natural and human-made features in the foreground would reduce magnitude	Small	Importance of natural landscape and recreation opportunities; distance of turbines in relation to KOP	Minor

KOP Number	Size or Scale Rationale	Size and Scale Rating (large, medium, small)	Geographic Extent Rationale (Appendix A COP VIA)	Geographic Extent Rating (large, medium, small)	Duration/Reversibility Rationale	Duration/Reversibility Rating (good, fair, poor)	SLVIA Magnitude Rating Rationale	SLVIA Magnitude Rating (large, medium, small)	SLVIA Overall Impact Level Rationale	SLVIA Overall Impact Level (major, moderate, minor, negligible)
MV02	Turbines are very visible on the horizon line and will dominate the view from the KOP.	Large	Number of turbines visible - 100 Percent visibility - 76%–100%	Large	Long term (35 years)/Reversible	Fair	Size and scale in relation to existing conditions along with percentage of visibility	Large	Importance of natural landscape and natural recreation opportunities, scenic values; prominence of turbines	Moderate
MV03	Visible and likely to attract the attention resulting from angle of view of WTGs	Medium	Number of turbines visible - 59 Percent visibility - 76%–100%	Medium	Long term (35 years)/Reversible	Fair	Visibility of WTGs within viewshed along horizon line within viewshed	Medium	Importance of natural landscape and natural recreation opportunities, scenic values; prominence of turbines	Moderate
MV03	WTGs appear dark gray against the light sky and the position of the sun serves as a focal point, drawing the viewer's eye toward part of the proposed Project.	Large	Number of turbines visible - 59 Percent visibility - 76%–100%	Medium	Long term (35 years)/Reversible	Fair	Visibility of backlit WTGs within viewshed along horizon line within viewshed	Large	Scenic values; prominence of turbines- sunset backlighting of turbines along with movement influences prominence	Major
MV05	With the proposed RWF in place, the nacelles and rotors from numerous WTGs and two OSSs will be visible from this KOP in the background along the horizon.	Large	Number of turbines visible - 100 Percent visibility - 76%–100%	Large	Long term (35 years)/Reversible	Fair	Size and scale in relation to existing conditions along with percentage of visibility	Large	Importance of natural landscape and natural recreation opportunities, scenic values; prominence of turbines	Moderate
MV05	WTGs appear dark gray against the light sky and the position of the sun serves as a focal point, drawing the viewer's eye toward part of the proposed Project.	Large	Number of turbines visible - 100 Percent visibility - 76%–100%	Large	Long term (35 years)/Reversible	Fair	Visibility of backlit WTGs within viewshed along horizon line within viewshed	Large	Scenic values; prominence of backlit turbines on the horizon	Major
MV07	OSSs become focal points along the wide horizon and the overlook is no longer just for views of the ocean but includes the turbines on the ocean.	Large	Number of turbines visible - 100 Percent visibility - 76%–100%	Large	Long term (35 years)/Reversible	Fair	Size and scale in relation to existing conditions along with percentage of visibility	Large	Prominent, dedicated viewpoint	Major
MV07	OSSs become focal points along the wide horizon and the overlook is no longer just for views of the ocean but includes the turbines on the ocean.	Large	Number of turbines visible - 100 Percent visibility - 76%–100%	Large	Long term (35 years)/Reversible	Fair	Size and scale in relation to existing conditions along with percentage of visibility	Large	Prominent, dedicated viewpoint	Major
MV07	OSSs become focal points along the wide horizon and the overlook is no longer just for views of the ocean but includes the turbines on the ocean.	Large	Number of turbines visible - Percent visibility - %  Information not available in RWF VIA	Large	Long term (35 years)/Reversible	Fair	Size and scale in relation to existing conditions along with percentage of visibility	Large	Prominent, dedicated viewpoint; warning lighting appears low on the horizon	Major

KOP Number	Size or Scale Rationale	Size and Scale Rating (large, medium, small)	Geographic Extent Rationale (Appendix A COP VIA)	Geographic Extent Rating (large, medium, small)	Duration/Reversibility Rationale	Duration/Reversibility Rating (good, fair, poor)	SLVIA Magnitude Rating Rationale	SLVIA Magnitude Rating (large, medium, small)	SLVIA Overall Impact Level Rationale	SLVIA Overall Impact Level (major, moderate, minor, negligible)
<b>MV09</b>	The two OSSs appear as dark elements on the horizon suspended above the water surface. From this superior vantage point, the entirety of the Project is visible.	Large	Number of turbines visible - 70 Percent visibility - 76%–100%	Large	Long term (35 years)/Reversible	Fair	Size and scale in relation to existing conditions along with percentage of visibility	Large	Importance of historic lighthouse, scenic values; prominence of turbines and OSSs	Major
<b>MV10</b>	Nacelles and rotors from numerous WTGs will be visible in the background along the horizon. Turbines are visible on the horizon and provide a focal point.	Large	Number of turbines visible - 100 Percent visibility - 76%–100%	Large	Long term (35 years)/Reversible	Fair	Size and scale in relation to existing conditions along with percentage of visibility	Medium	Importance of natural landscape and natural recreation opportunities; massing of turbines on horizon	Moderate
<b>MV11</b>	Nearest WTG is 24.6 miles (39.6 km) away; the towers are largely obscured due to curvature of the Earth, with their degree of exposure decreasing from left to right.	Medium	Number of turbines visible - 89 Percent visibility - 2%–25%	Moderate	Long term (35 years)/Reversible	Fair	Size and scale in relation to existing conditions along with percentage of visibility	Medium	Importance of natural landscape and natural recreation opportunities; visibility of WTGs due to distance and percentage of visibility	Minor
<b>MV12</b>	KOP on Peaked Hill represents a discrete view to the southwest that requires the viewer to be perfectly positioned.	Small	Number of turbines visible - Percent visibility - %  Information not available in RWF VIA	Small  Based on simulation graphic all are visible / vegetation and perspective influence	Long term (35 years)/Reversible	Fair	Size and scale in relation to existing conditions, vegetation and viewer perspective	Small	Importance of cultural significance and natural recreation opportunities; visibility of WTGs due to intervening vegetation and landforms	Major
<b>MV12</b>	Sunset illumination and backlighting influences change	Large	Number of turbines visible - Percent visibility - %  Information not available in RWF VIA	Large  Based on simulation graphic all are visible / vegetation and perspective influence	Long term (35 years)/Reversible	Fair	Backlighting of WTGs, increased visibility	Large	Importance of cultural significance and natural recreation opportunities; visibility of WTGs due to backlighting	Major
<b>MV13</b>	WTGs are visible; light gray towers, nacelles, and rotors are fully visible above the horizon.	Large	Number of turbines visible - 100 Percent visibility - 76%–100%	Large	Long term (35 years)/Reversible	Fair	Size and scale in relation to existing conditions along with percentage of visibility	Large	Importance of natural landscape and natural recreation opportunities; visibility of WTGs due to distance and percentage of visibility	Major
<b>NI10</b>	WTGs are barely visible along the horizon, with a small cluster of turbine blades and nacelle comprising the majority of visible features.	Small	Number of turbines visible - 26 Percent visibility - 76%–100%	Small (distance)	Long term (35 years)/Reversible	Fair	Not perceivable at distance.	Small	Importance of natural landscape and natural recreation opportunities; visibility of WTGs due to distance	Minor

KOP Number	Size or Scale Rationale	Size and Scale Rating (large, medium, small)	Geographic Extent Rationale (Appendix A COP VIA)	Geographic Extent Rating (large, medium, small)	Duration/Reversibility Rationale	Duration/Reversibility Rating (good, fair, poor)	SLVIA Magnitude Rating Rationale	SLVIA Magnitude Rating (large, medium, small)	SLVIA Overall Impact Level Rationale	SLVIA Overall Impact Level (major, moderate, minor, negligible)
NL01	WTGs appear as gray vertical lines against the yellow backdrop of the sky that look out of character with the vast extent of open water.	Large	Number of turbines visible - 100 Percent visibility - 76%–100%	Large	Long term (35 years)/Reversible	Fair	Size and scale in relation to existing conditions along with percentage of visibility	Large	Intact seascape and prominence of WTGs in close proximity, although no viewers	Major
NL01	Sunset illumination and backlighting influences change	Large	Number of turbines visible - 100 Percent visibility - 76%–100%	Large	Long term (35 years)/Reversible	Fair	Backlighting of WTGs, increased visibility	Large	Intact seascape and prominence of WTGs, although no viewers; backlighting of WTGs and OSS	Major
RI01	WTGs are barely visible from this location due largely to their distance from the viewer and the screening effects of curvature of the Earth.	Small	Number of turbines visible - 89 Percent visibility - 26%–75%	Small (Distance)	Long term (35 years)/Reversible	Fair	Not perceivable at distance.	Small	Importance of historic setting and natural recreation opportunities; visibility of WTGs due to distance	Minor
RI06	Upper portions of the WTGs are perceptible as slender gray protrusions above the horizon line.	Medium	Number of turbines visible - 99 Percent visibility - 2%–25%	Medium	Long term (35 years)/Reversible	Fair	Size and scale in relation to existing conditions along with percentage of visibility	Medium	Intact seascape and presence of WTGs along horizon	Minor
RI08	Nacelles and rotors of numerous WTGs are visible along the horizon, distance	Medium	Number of turbines visible - 99 Percent visibility - 76%–100%	Large	Long term (35 years)/Reversible	Fair	Size and scale in relation to existing conditions along with percentage of visibility	Large	Importance of recreation opportunities; visibility of WTGs due to distance and percentage of visibility	Moderate
RI09	WTGs will be visible along the horizon; distance	Medium	Number of turbines visible - 99 Percent visibility - 26%–50%	Medium	Long term (35 years)/Reversible	Fair	Size and scale in relation to existing conditions along with percentage of visibility	Medium	Importance of recreation opportunities; visibility of WTGs due to distance and percentage of visibility	Moderate

**Table G-41a. Seascape Landscape Impact Assessment for Alternative B (Proposed Action) - Seascape Character Areas**

Character Area Name	Character Area Association (SCA/LCA/OCA)	Key Observation Points with Simulations	Susceptibility Rationale	Susceptibility Rating (high, medium, low)	Value Rationale	Value Rating (high, medium, low)	SLIA Sensitivity Rating Rationale	SLIA Sensitivity Rating (high, medium, low)	Geographic Extent of Analysis Area with Visibility of Alternative B - Proposed Action  Total Land Acres within Analysis Area: 1,488.1 Square Miles	Geographic Extent Rating (large, medium, small)	Size or Scale Rating Rationale (degree of change from existing conditions)	Size and Scale Rating (large, medium, small)	Duration/ Reversibility Rationale	Duration/ Reversibility Rating (good, fair, poor)	SLIA Magnitude Rating Rationale	SLIA Magnitude Rating (large, medium, small)	SLIA Overall Impact Level Rationale	SLIA Overall Impact Level (major, moderate, minor, negligible)
Shoreline Beach	SCA	AI06, MV02, MV10, MV11, NI10, RI08, RI09	Unobstructed, expansive water-level view of the shoreline and across open water	High	Viewer activity in this area is primarily recreational, including swimming, sunbathing, walking, beachcombing, fishing, and surfing. Examples include Watch Hill, Narragansett, Horseneck, and Sachuest Beaches.	High	Iconic eastern shore beach setting with intermixed characteristic built features. Open ocean adjacency.	High	35.3/ 2.4	Small	Prominence of WTGs based on adjacency of open water to character area, with uninterrupted views to horizon and Project.	Large	Long term (35 years)/ Reversible	Fair	Overall visible land area in comparison with prominence of Project and duration of time	Medium	Predominately high sensitivity along with medium degree of magnitude	Moderate
Coastal Bluff	SCA	BI04, BI12, C01, MV07, MV13, NL01	Elevated views; Because of elevation and lack of tall vegetation, these views typically include significant lengths of shoreline and a broad expanse of open ocean as well as typical inland features. Views are generally only available from discrete public access points and trails.	Medium	Discrete, elevated views along visually variable landscape. Includes the south shore of Block Island including the Clayhead Trail in New Shoreham, at Gay Head in Aquinnah on Martha's Vineyard, along portions of the Cliff Walk in Newport, and at Montauk Point on Long Island.	High	Iconic eastern shore cliff and bluff setting with open ocean adjacency.	High	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.

Character Area Name	Character Area Association (SCA/LCA/OCA)	Key Observation Points with Simulations	Susceptibility Rationale	Susceptibility Rating (high, medium, low)	Value Rationale	Value Rating (high, medium, low)	SLIA Sensitivity Rating Rationale	SLIA Sensitivity Rating (high, medium, low)	Geographic Extent of Analysis Area with Visibility of Alternative (square miles/percentage) Alternative B - Proposed Action  Total Land Acres within Analysis Area: 1,488.1 Square Miles	Geographic Extent Rating (large, medium, small)	Size or Scale Rating Rationale (degree of change from existing conditions)	Size and Scale Rating (large, medium, small)	Duration/ Reversibility Rationale	Duration/ Reversibility Rating (good, fair, poor)	SLIA Magnitude Rating Rationale	SLIA Magnitude Rating (large, medium, small)	SLIA Overall Impact Level Rationale	SLIA Overall Impact Level (major, moderate, minor, negligible)
Developed Waterfront	SCA	N/A	Dominance of human-made features including docks, boats, and shoreline buildings/structures	Low	Fishing ports, harbors, marinas, and shoreline commercial and industrial areas	Medium	Activity in these areas is generally water-oriented but highly variable and includes commercial fishing, seafood processing, boat repair, pleasure boating, retail shopping, and restaurants.	Low	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.
Shoreline Residential	SCA	AI03, RI01	Shoreline homes are specifically situated to take advantage of water views.	High	Year-round and seasonal homes situated along the ocean shoreline. The defining characteristic of this zone is a broad, often elevated, view of the ocean from a residential setting.	High	Homes are positioned and occupied for the appeal of iconic oceanside views.	High	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.
Coastal Dunes	SCA	BI13, MV03, MV05	Views from the dunes are largely restricted to these paths and typically screened by the tight, rolling landform until	Medium	Coastal dunes are typically strictly regulated ecological communities, and access is limited to narrow,	Medium	Viewer activity in this area is almost exclusively recreational and typically focused on sightseeing	Medium	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.

			emerging at the top of the beach.		enclosed footpaths and boardwalks that cut through or over the dunes, providing public access to the beaches.			and beach access.										

**Table G-41b. Seascape Landscape Impact Assessment for Alternative B (Proposed Action) - Seascape Character Areas and Landscape Character Areas**

Character Area Name	Character Area Association (SCA/LCA/OCA)	Key Observation Points with Simulations	Susceptibility Rationale	Susceptibility Rating (high, medium, low)	Value Rationale	Value Rating (high, medium, low)	SLIA Sensitivity Rating Rationale	SLIA Sensitivity Rating (high, medium, low)	Geographic Extent of Analysis Area with Visibility of Alternative (square miles/percentage) Alternative B - Proposed Action	Geographic Extent Rating (large, medium, small)	Size or Scale Rating Rationale (degree of change from existing conditions)	Size and Scale Rating (large, medium, small)	Duration/ Reversibility Rationale	Duration/ Reversibility Rating (good, fair, poor)	SLIA Magnitude Rating Rationale	SLIA Magnitude Rating (large, medium, small)	SLIA Overall Impact Level Rationale	SLIA Overall Impact Level (major, moderate, minor, negligible)
Salt Pond/ Tidal Marsh	SCA/LCA	RI06	Views are available across the open water but are generally interrupted by adjacent dunes, barrier spits, and/or scrub vegetation that separates the ponds and the adjacent land from the ocean.	Low	Residences often occur along the edges of these ponds, as indicated by docks and boats along their shorelines. Recreational activity in the form of boating, fishing, and clamming is common in these areas.	Medium	Multi-use setting with localized views, increased distance from the open ocean.	Medium	35.3/ 2.4	Small	Intermix of vegetation, topography, and viewer position in relation to Project begins to influence the degree to which Project is perceived.	Medium	Long term (35 years)/ Reversible	Fair	Overall visible land area in comparison with prominence of Project and duration of time	Medium	Combination of high, medium, and low sensitivity (combined for and overall medium) along with medium degree of magnitude	Moderate
Inland Lakes and Ponds	SCA/ LCA	N/A	The dominant visual feature of this zone is an open expanse of flat water that is enclosed by a	Low	Given their locations and surrounding screening, views to the ocean are relatively rare.	Low	Views are constrained within immediate area with ocean views	Low	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.

Character Area Name	Character Area Association (SCA/LCA/OCA)	Key Observation Points with Simulations	Susceptibility Rationale	Susceptibility Rating (high, medium, low)	Value Rationale	Value Rating (high, medium, low)	SLIA Sensitivity Rating Rationale	SLIA Sensitivity Rating (high, medium, low)	Geographic Extent of Analysis Area with Visibility of Alternative (square miles/percentage) Alternative B - Proposed Action	Geographic Extent Rating (large, medium, small)	Size or Scale Rating Rationale (degree of change from existing conditions)	Size and Scale Rating (large, medium, small)	Duration/ Reversibility Rationale	Duration/ Reversibility Rating (good, fair, poor)	SLIA Magnitude Rating Rationale	SLIA Magnitude Rating (large, medium, small)	SLIA Overall Impact Level Rationale	SLIA Overall Impact Level (major, moderate, minor, negligible)
			vegetated shoreline. Occasionally interrupted by human-made features, such as homes and boat launches		Human activity on the lakes and along the shoreline includes boating, fishing, and swimming.		obscured by vegetation.											
Maintained Recreation Area	SCA/LCA	AI01, AI03, BI04, C01, LI04, MM04, MV09, RI01	Views of the ocean are highly variable, depending on the proximity to the shoreline. The open, maintained landscape generally allows for expansive, unobstructed views of the surrounding seascape.	High	Recreation focused with open lawns at public parks, lighthouses, USCG stations, and golf courses. Lighthouses and state parks are often associated.	High	Iconic settings, with lighthouses, open ocean views with a recreation focus	High	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.
Highway Transportation	SCA/LCA	N/A	High-volume vehicular travel corridors that traverse the landscape and are dominated by automobiles. Travel is at moderate to high speed, and outward peripheral views are fleeting.	Low	Dominated by adjacent buildings/structures and trees with limited elevated long-distance views available.	Medium	Viewer focus is associated with driving activity and with limited duration views.	Low	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above. **Table G-41c. Seascape Landscape Impact Assessment for Alternative B (Proposed Action) - Landscape Character Areas**

Character Area Name	Character Area Association (SCA/LCA/OCA)	Key Observation Points with Simulations	Susceptibility Rationale	Susceptibility Rating (high, medium, low)	Value Rationale	Value Rating (high, medium, low)	SLIA Sensitivity Rating Rationale	SLIA Sensitivity Rating (high, medium, low)	Geographic Extent of Analysis Area with Visibility of Alternative B - Proposed Action  Total Land Acres within Analysis Area: 1,488.1 Square Miles	Geographic Extent Rating (large, medium, small)	Size or Scale Rating Rationale (degree of change from existing conditions)	Size and Scale Rating (large, medium, small)	Duration/ Reversibility Rationale	Duration/ Reversibility Rating (good, fair, poor)	SLIA Magnitude Rating Rationale	SLIA Magnitude Rating (large, medium, small)	SLIA Overall Impact Level Rationale	SLIA Overall Impact Level (major, moderate, minor, negligible)
Coastal Scrub/ Shrub Forest	LCA	AI05, AI07, CI01, MM01,	Outward views are largely enclosed by surrounding vegetation and are limited to the orientation and width of the cleared corridor.	Low	Viewer activity is primarily local travel and recreational trail use.	Medium	Views are constrained within the immediate area with ocean views obscured by vegetation.	Low	35.3/ 2.4	Small	As distance from Project increases, the degree to which Project is noticeable decreases due to the influence of the built and naturally vegetated environment associated with these character areas.	Medium/ Small	Long term (35 years)/ Reversible	Fair	Overall visible land area in comparison with prominence of Project and duration of time	Medium	Overall low sensitivity with medium degree of magnitude	Minor
Agricultural/ Open Field	LCA	N/A	Open farmland provides for long-distance views in this zone; adjacent forest, coastal scrub, and buildings/structures typically frame/enclose these views and provide significant screening.	Low	Occurs primarily inland of the coast, views to the ocean are relatively rare.	Low	Setting is not influenced by views of the ocean, and pastoral/agricultural character dominates.	Low	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.

Character Area Name	Character Area Association (SCA/LCA/OCA)	Key Observation Points with Simulations	Susceptibility Rationale	Susceptibility Rating (high, medium, low)	Value Rationale	Value Rating (high, medium, low)	SLIA Sensitivity Rating Rationale	SLIA Sensitivity Rating (high, medium, low)	Geographic Extent of Analysis Area with Visibility of Alternative B - Proposed Action	Geographic Extent Rating (large, medium, small)	Size or Scale Rating Rationale (degree of change from existing conditions)	Size and Scale Rating (large, medium, small)	Duration/ Reversibility Rationale	Duration/ Reversibility Rating (good, fair, poor)	SLIA Magnitude Rating Rationale	SLIA Magnitude Rating (large, medium, small)	SLIA Overall Impact Level Rationale	SLIA Overall Impact Level (major, moderate, minor, negligible)
Forest	LCA	MV12	Long-distance views within the zone are generally either fully or partially screened by vegetation and, when present, are tightly enclosed by the surrounding trees.	Low	Variable vegetation characteristics in relation to typical ocean, seascape environment provides more enclosed setting for users.	Low	Views are constrained within the immediate area with ocean views obscured by vegetation.	Low	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.
Rural Residential	LCA	N/A	Rural residences tend to be located along narrow, tree-lined roads, with intervening vegetation. Long-distance views are largely restricted to small open fields.	Low	Typical viewer activity includes residential activity, outdoor recreation, and local travel.	Low	Views are constrained within the immediate area with ocean views obscured by vegetation.	Low	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.
Suburban Residential	LCA	N/A	Medium to high-density residential neighborhoods that typically occur on the outskirts of villages and town centers and along secondary roads and cul-de-sacs spurring off	Low	Views are generally limited by the surrounding forest vegetation, adjacent buildings/structures, and/or undulating topography that surrounds the subdivisions.	Low	Localized views and influence of built residential environment	Low	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.

Character Area Name	Character Area Association (SCA/LCA/OCA)	Key Observation Points with Simulations	Susceptibility Rationale	Susceptibility Rating (high, medium, low)	Value Rationale	Value Rating (high, medium, low)	SLIA Sensitivity Rating Rationale	SLIA Sensitivity Rating (high, medium, low)	Geographic Extent of Analysis Area with Visibility of Alternative B - Proposed Action	Geographic Extent Rating (large, medium, small)	Size or Scale Rating Rationale (degree of change from existing conditions)	Size and Scale Rating (large, medium, small)	Duration/ Reversibility Rationale	Duration/ Reversibility Rating (good, fair, poor)	SLIA Magnitude Rating Rationale	SLIA Magnitude Rating (large, medium, small)	SLIA Overall Impact Level Rationale	SLIA Overall Impact Level (major, moderate, minor, negligible)
			the main roads.															
Village/Town Center	LCA	N/A	Moderate to high-density residential and commercial development includes larger town center areas. Buildings (typically two-to three-stories tall) and other human-made features dominate the landscape.	Low	Outward views that are available will typically exist in areas on the outskirts of the villages and town centers and will generally be partially screened by existing buildings/structures and surrounding native vegetation.	Low	Localized views and influence of built environment	Low	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.
Commercial	LCA	N/A	Commercial development along a highway includes retail businesses, restaurants, convenience stores, automobile dealers, shopping centers, and malls.	Low	Views are focused along the axis of the highway and the foreground is dominated by buildings, automobiles, paved roads, and parking lots.	Low	Urbanized built environment dominates and is the primary focus.	Low	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.	Same as above.

**Table G-41d. Seascape Landscape Impact Assessment for Alternative B (Proposed Action) - Ocean Character Areas**

Character Area Name	Character Area Association (SCA/LCA/OCA)	Key Observation Points with Simulations	Susceptibility Rationale	Susceptibility Rating (high, medium, low)	Value Rationale	Value Rating (high, medium, low)	SLIA Sensitivity Rating Rationale	SLIA Sensitivity Rating (high, medium, low)	Geographic Extent of Analysis Area with Visibility of Alternative B - Proposed Action  Total OCA area within Analysis Area: 6,113.4 Square Miles	Geographic Extent Rating (large, medium, small)	Size or Scale Rating Rationale (degree of change from existing conditions)	Size and Scale Rating (large, medium, small)	Duration/ Reversibility Rationale	Duration/ Reversibility Rating (good, fair, poor)	SLIA Magnitude Rating Rationale	SLIA Magnitude Rating (large, medium, small)	SLIA Overall Impact Level Rationale	SLIA Overall Impact Level (major, moderate, minor, negligible)
Open Ocean	OCA	N/A	Presence of open water as a dominant foreground element in all directions. Human-made features in the water are limited but may include occasional jetties, buoys, and boats.	High	Human activity on the water can be extensive, especially near major ports and navigation,	High	Presence of open ocean environment with unobstructed horizon is of high importance to users and visitors.	High	5,882.2 / 96.2  Maximum ocean visibility as compared to all alternatives	Large	Predominantly intact open ocean within immediate proximity of WTGs and OSS facilities not characteristic of the OCA	Large	Long term (35 years)/ Reversible	Fair	Proximity of OCA to Project with uninterrupted ocean views surrounding Project for duration of Project. Approximately 96% of OCA total acres with visibility.	Large	Intact open ocean setting, in immediate proximity of Project components for the duration of Project.	Major

**Table G-41e. Seascape Landscape Impact Assessment for Alternative B (Proposed Action) - Specially Designated Areas**

Specially Designated Areas	Specially Designated Area Total Acres	Key Observation Points with Simulations	Susceptibility Rationale	Susceptibility Rating (high, medium, low)	Value Rationale	Value Rating (high, medium, low)	SLIA Sensitivity Rating Rationale	SLIA Sensitivity Rating (high, medium, low)	Geographic Extent of Specially Designated Area with Visibility of Alternative Proposed Action (Alternative B)	Geographic Extent Rating (large, medium, small)	Size or Scale Rating Rationale (degree of change from existing conditions)	Size and scale Rating (large, medium, small)	Duration/ Reversibility Rationale	Duration/ Reversibility Rating (good, fair, poor)	SLIA Magnitude Rating Rationale	SLIA Magnitude Rating (large, medium, small)	SLIA Overall Impact Level Rationale	SLIA Overall Impact Level (major, moderate, minor, negligible)
Historic Sites and National Landmarks	12,308.0	AI01, AI03, BI04, BI12, BI13, C01, C02, BI13, MM04, MV07, MV09, MV13, RI01	161 districts and individual properties listed or eligible for the NRHP and 13 properties or districts listed as National Historic Landmarks (NHL). These include historic districts, homes, lighthouses, churches, and government buildings.	High	Properties have historic, regional and national significance.	High	Historic properties and sites generally have high than average sensitivity based on the nature of the property and its relationship to the setting.	High	1,222.08 / 9.9	Medium	General proximity of project in relation to sensitive resource and experiences associated with historic/ culturally significant locations.	Large	Long term (35 years)/ Reversible	Fair	General proximity of project in relation to sensitive resource and experiences associated with historic/ culturally significant locations.	Large	Importance of iconic sites, settings and experiences associated with locations in contrast to introduction of project.	Major

Specialty Designated Areas	Specialty Designated Area Total Acres	Key Observation Points with Simulations	Susceptibility Rationale	Susceptibility Rating (high, medium, low)	Value Rationale	Value Rating (high, medium, low)	SLIA Sensitivity Rating Rationale	SLIA Sensitivity Rating (high, medium, low)	Geographic Extent of Specialty Designated Area with Visibility of Alternative (Acres/Percentage) Proposed Action (Alternative B)	Geographic Extent Rating (large, medium, small)	Size or Scale Rating Rationale (degree of change from existing conditions)	Size and scale Rating (large, medium, small)	Duration/ Reversibility Rationale	Duration/ Reversibility Rating (good, fair, poor)	SLIA Magnitude Rating Rationale	SLIA Magnitude Rating (large, medium, small)	SLIA Overall Impact Level Rationale	SLIA Overall Impact Level (major, moderate, minor, negligible)
National Natural Landmarks	349.7	MV07	Sites that contain outstanding biological and geological resources and encourages the conservation of these areas.	Medium	Two locations identified within analysis area. Primary importance is related to physical resources, with lesser potential importance on experiences.	Medium	Preservation of physical resources associated with landmarks.	Medium	255.5 / 73.1	Large	Proximity of Gay Head Cliffs is approximate 14-miles from project. Muskeget Island is approximately 31.6 miles.	Medium	Long term (35 years)/ Reversible	Fair	Variable distances of resource from project.	Large	two identified localized resources with variable proximity to project and localized focus on physical resources.	Moderate
State Scenic Areas	105,777.6	BI12, CI01, MV07	93 state-designated scenic areas, including 56 in Rhode Island; 34 in Massachusetts; 3 in New York	High	Importance of iconic landscapes (ex. Martha's Vineyard) that surround the lease area.	High	Often associated with iconic settings and places which most often have regional and national significance related to sense of place.	High	18,205.6 / 17.2	Small	Overall percentage of visible areas and distribution of locations often in relative proximity to project.	Large	Long term (35 years)/ Reversible	Fair	Variability of visibility in relation to resource with approximately 1/4 of acres having visibility of project.	Medium	Overall higher sensitivity to change based on nature of resource and iconic landscapes.	Major
National Wildlife Refuges	15,176.1	AI05, NL01, RI06	System of public lands and waters set aside to conserve the nation's fish, wildlife, and plants. Nine refuges occur within the analysis area.	Low	Preservation of natural resources specific to refuge.	Low	Preservation of physical resources associated with refuges.	Medium	767.7 / 5.1	Small	Percentage of visibility of project in relation to distributed areas and refuge locations	Small	Long term (35 years)/ Reversible	Fair	Minimal to no change to physical resource visually.	Small	Refuges are focused on the preservation of natural resources, with closest refuge not occupied by humans.	Minor
State/Non-Profit Wildlife Management Areas	31,967.8	AI07	18 State Wildlife Management Areas: nine in Rhode Island and nine in Massachusetts. Lands are managed to provide wildlife habitat and accommodate wildlife-related recreation (hunting, bird watching, etc.).	Low	Preservation of natural resources specific to management areas.	Low	Preservation of physical resources associated with management area. Variable uses and activities.	Medium	1,314.4 / .4	Small	Small percentage of project visibility.	Small	Long term (35 years)/ Reversible	Fair	Minimal to no change to physical resource visually.	Small	Management areas are focused on the preservation of natural resources and providing recreation resources.	Minor
National Parks	31.2	N/A	New Bedford Whaling National Historical Park,	Low	Associated with historical maritime activities,	Low	Higher sensitivity as a result of	Medium	.2 / .7	Small	Overall distance from project is approximately	Small	Long term (35 years)/ Reversible	Fair	No perceivable change	Small	Importance as a National Park, though physically	Negligible

Specialty Designated Areas	Specialty Designated Area Total Acres	Key Observation Points with Simulations	Susceptibility Rationale	Susceptibility Rating (high, medium, low)	Value Rationale	Value Rating (high, medium, low)	SLIA Sensitivity Rating Rationale	SLIA Sensitivity Rating (high, medium, low)	Geographic Extent of Specialty Designated Area with Visibility of Alternative (Acres/Percentage) Proposed Action (Alternative B)	Geographic Extent Rating (large, medium, small)	Size or Scale Rating Rationale (degree of change from existing conditions)	Size and scale Rating (large, medium, small)	Duration/ Reversibility Rationale	Duration/ Reversibility Rating (good, fair, poor)	SLIA Magnitude Rating Rationale	SLIA Magnitude Rating (large, medium, small)	SLIA Overall Impact Level Rationale	SLIA Overall Impact Level (major, moderate, minor, negligible)
			New Bedford, Massachusetts. Approximately 26-miles from project.		localized interest.		National Park designation				26 miles with one WTG visible.				related to project		distanced from project to have negligible impacts or visibility.	
State Parks	10,473.8	AI01, LI04, MV10, RI08	17 State parks and reservations that occur within the analysis area and provide recreation and sight-seeing opportunities.	Medium	Variable recreation sites and opportunities for local and national interests.	Medium	Importance of recreation destinations and associated ocean viewing opportunities.	High	2,731.7 / 26.1	Medium	Over 1/4 of area with visibility and proximity of project.	Medium	Long term (35 years)/ Reversible	Fair	Physical presence of project 16-miles to 30+ miles; with variable visibility.	Medium	Recreation and ocean focused recreation with multiple user groups and interests.	Moderate
State Nature and Historic Preserves	248.4	N/A	John H. Chafee State Nature Preserve. Open to the public and provides agricultural, educational, and scenic values, as well as natural and historical resources	Low	Preservation of local heritage and resources.	Low	Preservation of heritage resources of the region.	Medium	3.1 / 1.2	Small	Resource is approximately 24-miles from nearest WTG with minimal visibility.	Low	Long term (35 years)/ Reversible	Fair	Physical distance from project and overall visibility.	Low	Localized interests with preservation focus, limited to no visibility of project.	Negligible
State Forests	5,301.6	N/A	Manuel F. Correllus State Forest, located on the inland portion of Martha's Vineyard, Massachusetts, is the only state forest. Inland forest with vegetation and topography.	Low	Located in the center of Martha's Vineyard, multi-use recreation activities.	Low	Large local recreation resource with internally focused activities, surrounded by urban development.	Low	7.8 / .2	Small	Inland recreation resource with limited visibility of project.	Low	Long term (35 years)/ Reversible	Fair	Inland location with intervening influence of vegetation, topography and built environment.	Low	Localized recreation resource, surrounded by urban development with intervening features that limit project visibility.	Negligible
State Beaches	165.1	N/A	Nine state beaches; heavily used bathing beaches that typically include large parking areas, bathhouses, pavilions, and concession buildings.	Medium	Recreation destination for high number of users with focus of activities towards ocean environment.	High	Iconic eastern shore beach destinations with high user interest.	High	78.2/ 47.4	Medium	Approximately 1/2 of beach areas with visibility of project beyond 20-miles.	Medium	Long term (35 years)/ Reversible	Fair	Beach locations are at or beyond 20-miles from project where scale decreases but project is perceivable.	Medium	Popular beach destinations with viewer focus toward ocean and beach activities. Overall distance from project is approximately 20-miles.	Moderate

Specially Designated Areas	Specially Designated Area Total Acres	Key Observation Points with Simulations	Susceptibility Rationale	Susceptibility Rating (high, medium, low)	Value Rationale	Value Rating (high, medium, low)	SLIA Sensitivity Rating Rationale	SLIA Sensitivity Rating (high, medium, low)	Geographic Extent of Specially Designated Area with Visibility of Alternative (Acres/Percentage) Proposed Action (Alternative B)	Geographic Extent Rating (large, medium, small)	Size or Scale Rating Rationale (degree of change from existing conditions)	Size and scale Rating (large, medium, small)	Duration/ Reversibility Rationale	Duration/ Reversibility Rating (good, fair, poor)	SLIA Magnitude Rating Rationale	SLIA Magnitude Rating (large, medium, small)	SLIA Overall Impact Level Rationale	SLIA Overall Impact Level (major, moderate, minor, negligible)
Highways Designated or Eligible as Scenic	411.6	N/A	Two scenic byways are located within Rhode Island with waterfront, shoreline and coastline views.	Medium	Scenic Byway designation indicates value and importance of resources associated.	High	Protection of designation and associated iconic views.	High	43.4 / 10.5	Small	Overall low percentage of visibility in relation to linear resource.	Low	Long term (35 years)/ Reversible	Fair	Low to intermittent visibility and associated intervening features.	Medium	Importance of scenic byway designation and preservation of resource with intermittent and variable viewing conditions from motorists.	Moderate
National Historic Trails	990.1	N/A	Washington-Rochambeau Revolutionary Route - national resource with period significance related to setting.	High	Congressionally designated trail resource with historic significance.	High	Changes in visual setting related to the trail.	High	.8 / .1	Small	Small percentage of visibility related to resource.	Low	Long term (35 years)/ Reversible	Fair	Low visibility with intermix of urban and natural features with WTG distance ranging from 18 to 40-miles.	Low	National Trail designation significance (high sensitivity) with low visibility of project.	Minor
National Recreation Trails	88.6	AI03	Cliff Walk within Ochre Point Cliffs Historic District with iconic setting and views.	High	Views of the Atlantic Ocean historic mansions, wildflowers, wildlife, and shorelines.	Medium	Iconic setting with interests associated with preservation of resource and views.	High	65.1 / 73.4	Large	Large percentage of resource has visibility of project.	High	Long term (35 years)/ Reversible	Fair	Visibility of project in relation to resource within approximately 15-miles.	High	Importance of resources in relation to setting and natural environment with a large portion of the trail having visibility of project.	Major
State Fishing and Boating Access Sites	371.4	N/A	45 state-owned and/or -managed fishing and boating access sites with focus on maritime or ocean related activities.	Low	Recreational focus with inter-related views of ocean and setting.	Low	Primary focus of resources is related to recreation activities in interrelated ocean setting.	Medium	78.4 / 21.1	Medium	Approximately 1/4 of acres with visibility of project and are at least 16-miles from lease area.	Low	Long term (35 years)/ Reversible	Fair	Resources in relation to project and visibility.	Medium	Recreation resource with interrelated interest in ocean setting and views, variable distances from project beyond 16-miles.	Moderate
Lighthouses	23.0	BI04, C01, MM04, MV09, RI01	32 lighthouses; with proximity to ocean edge based on nature of resource and setting.	High	Lighthouses are characteristically associated with shoreline areas and settings with ocean focus.	High	Visitors and users of lighthouse resources as destination and iconic setting.	High	6.6 / 28.7	Medium	One lighthouse within approximately 9-miles of project. All others are associated with ocean	High	Long term (35 years)/ Reversible	Fair	Proximity of lighthouses in relation to project influences potential visibility and prominence.	High	Nature of lighthouses in relation to iconic ocean setting and proximity of project.	Major

Specially Designated Areas	Specially Designated Area Total Acres	Key Observation Points with Simulations	Susceptibility Rationale	Susceptibility Rating (high, medium, low)	Value Rationale	Value Rating (high, medium, low)	SLIA Sensitivity Rating Rationale	SLIA Sensitivity Rating (high, medium, low)	Geographic Extent of Specially Designated Area with Visibility of Alternative (Acres/Percentage) Proposed Action (Alternative B)	Geographic Extent Rating (large, medium, small)	Size or Scale Rating Rationale (degree of change from existing conditions)	Size and scale Rating (large, medium, small)	Duration/ Reversibility Rationale	Duration/ Reversibility Rating (good, fair, poor)	SLIA Magnitude Rating Rationale	SLIA Magnitude Rating (large, medium, small)	SLIA Overall Impact Level Rationale	SLIA Overall Impact Level (major, moderate, minor, negligible)
											proximity that orients them closer to project.							
Public Beaches	4,221.0	AI06, MM01, MV02, MV03, MV05, MV11, NI10, RI09	178 public beaches with recreation focus and ocean facing views, iconic settings	Medium	Iconic recreation destination for high number of users with focus towards ocean and beach activities.	Medium	Typically higher interests in ocean setting with variable activities and user focus.	Medium	11,38.8 / 27.0	Medium	Approximately 1/4 of acres with visibility of project. Viewer position along beaches is often inline with project.	Medium	Long term (35 years)/ Reversible	Fair	Closest beach is approximately 13-miles; variable viewer perspectives and positioning.	Medium	Iconic beach setting with high user interest and activity though viewer position and visibility of project can be variable.	Moderate
Ferry Routes	10,641.7	N/A	20 different ferry routes originating from multiple locations around project. Proximity of routes to project.	Medium	Dedicated ocean focused uses used for either pleasure or utility purposes.	Medium	Variability in users and interests intermixed with other seagoing vessels.	Medium	6,365.0 / 59.8	Large	Over 1.2 of ferry routes with visibility due to open ocean environment.	High	Long term (35 years)/ Reversible	Fair	Resource is ocean based and in closer proximity to project, though duration of view can be short-term and directional.	High	Variability in viewer interest and overall sensitivity within dedicated ferry lanes. Proximity of project in relation to routes influences prominence based on duration and direction.	Moderate
Seaports	90.1	N/A	Five seaports associated with working waterfront activity	Low	Industrial and seagoing areas with associated infrastructure.	Low	Variable users and interests; with primary focus related to industry.	Low	2.3 / 2.5	Small	Overall low visibility and perception of project due to intermix of other built features and distance.	Low	Long term (35 years)/ Reversible	Fair	Perceivability of project in relation to other seaport uses and activities.	Low	Primary focus of seaports related to industrial and commercial uses with surrounding infrastructure and built environment.	Negligible
Other State Land with Public Access	9,361.8	N/A	Variability of other resources associated with natural resources, recreation activities and locally sensitive uses.	Medium	Variability of uses and interests.	Medium	Variable users and interests	Medium	325.3 / 3.5	Small	Overall small percentage of visibility in relation to total acres.	Low	Long term (35 years)/ Reversible	Fair	Variability of locations, which based on visibility can be assumed to be inland focused.	Low	High variability in use, interest and sensitivity; low overall visibility as compared to total acres.	Negligible

**Table G-42. Visual Impact Assessment Impacts Matrix for Alternative C (Habitat Alternative)**

KOP Number	KOP Name	SLVIA Sensitivity Rating (high, medium, low)	Distance to Nearest Turbine (miles/nautical miles) Proposed Action	Distance to Nearest Turbine (miles/nautical miles) Alternative C1	Distance to Nearest Turbine Removed (miles/nautical miles) Alternative C1	Distance to Nearest Turbine (miles/nautical miles) Alternative C2	Distance to Nearest Turbine Removed (miles/nautical miles) Alternative C2	Alternative with greatest reduced visual impact to KOP as compared to the Proposed Action	VIA Overall Impact Level Rationale	VIA Overall Impact Level (major, moderate, minor, negligible)
CI01	Cuttyhunk Island	High	13.9/12.1	13.9/12.1	17.8/15.5	13.9/12.1	17.8/15.5	C2	The reduction of WTGs in close proximity of the KOP would not decrease visibility of the WTGs. WTG reduction would be localized to the center view of the KOP, where turbines are removed surrounding the eastern most OSS. The lease area would appear to have two separate WTG areas.	Major
MM01	Gooseberry Island	Medium	15.2/13.2	15.2/13.2	22.4/19.5	15.2/13.2	22.3/19.4	C1 and C2	The reduction of WTGs associated with each Alternative would not decrease visibility of the WTGs within 20-miles of the KOP. WTG reduction would be localized to areas beyond 20-miles and would remove turbines that have WTG blades visible along the horizon.	Minor
MV02	Philbin Beach	High	13.6/11.8	13.8/12.0	13.6/11.8	13.8/12.0	13.6/11.8	C1 and C2	The reduction of WTGs associated with each Alternative within the center of the lease area would reduce the density of the project within the viewshed, though would not decrease visibility of the WTGs left and right of center of the KOP within 15-miles. Both alternatives would visually appear as two separate projects, with a slight variation associated with Alternative 1 where 3 WTGs remain in the center of view from the KOP.	Moderate
MV05	Moshup Beach	High	13.8/12.0	13.7/11.9	13.7/11.9	13.7/11.9	13.7/11.9	C1 and C2	Alternative C1 and C2 would have similar impacts. The reduction of WTGs associated with each Alternative within the center of the lease area would reduce the density of the project within the viewshed, though would not decrease visibility of the WTGs left and right of center of the KOP within 15-miles. Both alternatives would visually appear as two separate projects, with a slight variation associated with Alternative 1 where 3 WTGs remain in the center of view from the KOP.	Major
MV05	Moshup Beach - Sunset	High	13.8/12.1	13.7/11.9	13.7/11.9	13.7/11.9	13.7/11.9	C1 and C2	Alternative C1 and C2 would have similar impacts. The reduction of WTGs associated with each Alternative within the center of the lease area would reduce the density of the project within the viewshed, though would not decrease visibility of the WTGs left and right of center of the KOP within 15-miles. Both alternatives would visually appear as two separate projects, with a slight variation associated with Alternative 1 where 3 WTGs remain in the center of view from the KOP. The backlighting resulting from sunset conditions would enhance the distinctiveness of the break in continuity of the WTG massing.	Major
MV07	Aquinnah Overlook	High	13.7/12.0	13.7/12.0	14.0/12.1	13.7/12.0	14.0/12.1	C1 and C2	The reduction of WTGs associated with each Alternative within the center of the lease area would reduce the density of the project within the viewshed, though would not decrease visibility of the WTGs left and right of center of the KOP within 15-miles. Both alternatives would visually appear as two separate projects, with a slight variation associated with Alternative 1 where 3 WTGs remain in the center of view from the KOP.	Moderate
MV07	Aquinnah Overlook - Sunset	High	13.7/12.0	13.7/12.0	14.0/12.2	13.7/12.1	14.0/12.2	C1 and C2	The reduction of WTGs associated with each Alternative within the center of the lease area would reduce the density of the project within the viewshed, though would not decrease visibility of the WTGs left and right of center of the KOP within 15-miles. Both alternatives would visually appear as two separate projects, with a slight variation associated with Alternative 1 where 3 WTGs remain in the center of view from the KOP. The backlighting resulting from sunset conditions would enhance the distinctiveness of the break in continuity of the WTG massing.	Major
MV07	Aquinnah Overlook - Night	High	13.7/12.0	13.7/12.0	14.0/12.3	13.7/12.2	14.0/12.3	C2	Alternative C2 would have slightly fewer nighttime impacts with the reduction of 3 WTGs within the center of view. The reduction of WTGs within the center of the lease area would reduce the density of the project within the viewshed at night, though would not decrease visibility of the WTGs left and right of center of the KOP. The Alternative would visually appear as two separate projects based on visible lighting, with a slight variation associated with Alternative 1 where 3 WTGs remain in the center of view from the KOP. WTG lighting would be visible right and left of center of the KOP.	Major
MV09	Gay Head Lighthouse	High	13.9/12.1	13.9/12.1	14.1/12.3	13.9/12.1	14.1/12.3	C1 and C2	The reduction of WTGs associated with each Alternative within the center of the lease area would reduce the density of the project within the viewshed, though would not decrease visibility of the WTGs left and right of center of the KOP within 15-miles. Both alternatives would visually appear as two separate projects, with a slight variation associated with Alternative 1 where 3 WTGs remain in the center of view from the KOP.	Moderate

KOP Number	KOP Name	SLVIA Sensitivity Rating (high, medium, low)	Distance to Nearest Turbine (miles/nautical miles) Proposed Action	Distance to Nearest Turbine (miles/nautical miles) Alternative C1	Distance to Nearest Turbine Removed (miles/nautical miles) Alternative C1	Distance to Nearest Turbine (miles/nautical miles) Alternative C2	Distance to Nearest Turbine Removed (miles/nautical miles) Alternative C2	Alternative with greatest reduced visual impact to KOP as compared to the Proposed Action	VIA Overall Impact Level Rationale	VIA Overall Impact Level (major, moderate, minor, negligible)
MV10	South Beach State Park	High	22.0/19.1	22.0/19.1	25.3/22.0	22.0/19.1	25.3/22.0	C1 and C2	The reduction of WTGs associated with each Alternative within the center of the lease area would reduce the density of the project along the center of the horizon of the viewshed, though would not decrease predominant visibility of the WTGs left of center of the KOP.	Major
MV11	Wasque Point	Low	24.8/21.5	24.8/21.5	28.5/24.8	24.8/21.5	28.5/24.8	C1 and C2	he reduction of WTGs associated with each Alternative within the center of the lease area would reduce the visibility of WTG blades visible along the right of center of KOP along the horizon, though would not decrease visibility of the WTGs center and left of center of the KOP.	Minor
MV12	Peaked Hill Reservation	High	16.3/14.2	16.3/14.2	17.3/15.1	16.3/14.2	17.3/15.1	C1 and C2	The reduction of WTGs associated with each Alternative within the center of the lease area would reduce the density of the project within the viewshed, though would not decrease visibility of the WTGs left and right of center of the KOP. Both alternatives would visually appear as two separate projects, with a slight variation associated with Alternative 1 where 3 WTGs remain in the center of view from the KOP.	Major
MV12	Peaked Hill Reservation - Sunset	High	16.3/14.2	16.3/14.2	17.3/15.1	16.3/14.2	17.3/15.1	C1 and C2	The reduction of WTGs associated with each Alternative within the center of the lease area would reduce the density of the project within the viewshed, though would not decrease visibility of the WTGs left and right of center of the KOP. Both alternatives would visually appear as two separate projects, with a slight variation associated with Alternative 1 where 3 WTGs remain in the center of view from the KOP.	Major
MV13	Edwin DeVries Vanderhoop Homestead	Medium	13.8/12.0	13.8/12.0	14.0/12.1	13.8/12.0	14.0/12.1	C1 and C2	Alternative C1 and C2 would have similar impacts. The reduction of WTGs associated with each Alternative within the center of the lease area would reduce the density of the project within the viewshed, though would not decrease visibility of the WTGs left and right of center of the KOP within 15-miles. Both alternatives would visually appear as two separate projects, with a slight variation associated with Alternative 1 where 3 WTGs remain in the center of view from the KOP.	Moderate
NI10	Madaket Beach	Medium	34.6/30.0	34.6/30.0	39.0/34.0	34.6/30.0	39.7/34.5	C1 and C2	No change from Proposed Action. Views of eastern portion of the lease area from the KOP would be the same as the Proposed Action. A small portion of the turbine blades would be visible on the distance horizon under clear viewing conditions.	Minor
NL01	Nomans Land Island NWR (not occupied)	Medium	8.7/7.5	8.7/7.5	9.0/7.8	8.7/7.5	9.0/7.8	C1 and C2	The reduction of WTGs associated with each Alternative within the center of the lease area would reduce the density of the project within the viewshed, though would not decrease visibility of the WTGs left and right of center of the KOP within 8 to 12-miles. Both alternatives would visually appear as two separate projects, with a slight variation associated with Alternative 1 where 3 WTGs remain in the center of view from the KOP.	Moderate
NL01	Nomans Land Island NWR - Sunset (not occupied)	Medium	8.7/7.5	8.7/7.5	9.0/7.9	8.7/7.6	9.0/7.9	C1 and C2	The reduction of WTGs associated with each Alternative within the center of the lease area would reduce the density of the project within the viewshed, though would not decrease visibility of the WTGs left and right of center of the KOP. Both alternatives would visually appear as two separate projects, with a slight variation associated with Alternative 1 where 3 WTGs remain in the center of view from the KOP. The backlighting resulting from sunset conditions would enhance the distinctiveness of the break in continuity of the WTG massing.	Major

Table G-43a. Seascape Landscape Impact Assessment for Alternative C (Habitat Alternative) - Character Areas

Character Area Name	Character Area Association (SCA/LCA/OCA)	Key Observation Points with Simulations	Geographic Extent of Analysis Area with Visibility of Alternative (square miles/percentage) Alternative B - Proposed Action  Total SCA/LCA area within Analysis Area: 1,488.1 Square Miles	Geographic Extent of Analysis Area with Visibility of Alternative (square miles/percentage) Alternative C1  Total SCA/LCA area within Analysis Area: 1,488.1 Square Miles	Geographic Extent of Analysis Area with Visibility of Alternative (square miles/percentage) Alternative C2  Total SCA/LCA area within Analysis Area: 1,488.1 Square Miles	SLIA Overall Impact Level Rationale for the Alternative with the reduced level of impacts as compared to the Proposed Action	SLIA Overall Impact Level (major, moderate, minor, negligible)
Shoreline Beach	SCA	AI06, MV02, MV10, MV11, NI10, RI08, RI09	35.3/ 2.4	35.0/ 2.4	34.7/ 2.3	Alternatives C2 would have negligible reduction in visible acres across all SCAs	SCA - Moderate

Table G-46. Visual Impact Assessment Impacts Matrix - Alternative E (Viewshed Alternative)

KOP Number	KOP Name	SLVIA Sensitivity Rating (high, medium, low)	Distance to Nearest Turbine (miles/nautical miles) Proposed Action	Distance to Nearest Turbine (miles/nautical miles) Alternative E1	Distance to Nearest Turbine Removed (miles/nautical miles) Alternative E1	Distance to Nearest Turbine (miles/nautical miles) Alternative E2	Distance to Nearest Turbine Removed (miles/nautical miles) Alternative E2	Alternative(s) with greatest reduced visual impact to KOP as compared to the Proposed Action	VIA Overall Impact Level Rationale	VIA Overall Impact Level (major, moderate, minor, negligible)
AI01	Brenton Point State Park	Medium	16.7/14.5	18.6/16.2	16.7/14.5	20.7/18.0	16.7/14.5	E2	Alternative E2 would increase the distance between the KOP and nearest WTGs by approximately 4-miles which reduces the overall visibility of the WTGs along the horizon.	Negligible
AI01	Brenton Point State Park - Night	Medium	16.7/14.5	18.6/16.3	16.7/14.6	20.7/18.1	16.7/14.5	E2	Alternative E2 would increase the distance between the KOP and nearest WTGs by approximately 4-miles. When viewed at night, single aviation warning lights on nacelle may be visible intermittently along horizon where nighttime lighting does not currently exist.	Moderate
AI03	Newport Cliff Walk	High	15.3/13.3	17.8/15.5	15.3/13.3	19.4/16.9	15.3/13.3	E2	Alternative E2 would increase the distance between the KOP and nearest WTGs by approximately 4-miles which reduces the overall visibility of the WTGs along the horizon.	Negligible
AI05	Sachuest Point National Wildlife Refuge	High	14.8/12.9	18.4/16.0	14.8/12.9	18.9/16.4	14.8/12.9	E1 and E2	Alternatives E1 and E2 would increase the distance between the KOP and nearest turbine by approximately 4-miles which reduces the overall visibility of the WTGs along the horizon.	Negligible
AI06	Sachuest Beach (Second Beach)	Medium	16.0/13.9	19.5/17.0	16.0/13.9	20.1/17.4	16.0/13.9	E2	Alternative E2 would increase the distance between the KOP and nearest turbine by approximately 4-miles which reduces the overall visibility of the WTGs along the horizon.	Negligible
AI07	Hanging Rock (Norman Bird Sanctuary)	High	16.2/14.1	19.8/17.2	16.2/14.1	20.3/17.7	16.2/14.1	E2	Alternative E2 would increase the distance between the KOP and nearest WTGs by approximately 4-miles which reduces the overall visibility of the WTGs along the horizon.	Negligible
BI04	Southeast Lighthouse	High	15.3/13.3	15.3/13.3	19.9/17.3	15.5/13.4	15.3/13.3	E2	Alternative E2 would increase the distance between the KOP and nearest WTGs by approximately 4-miles which reduces the overall visibility of the WTGs along the horizon.	Moderate

KOP Number	KOP Name	SLVIA Sensitivity Rating (high, medium, low)	Distance to Nearest Turbine (miles/nautical miles) Proposed Action	Distance to Nearest Turbine (miles/nautical miles) Alternative E1	Distance to Nearest Turbine Removed (miles/nautical miles) Alternative E1	Distance to Nearest Turbine (miles/nautical miles) Alternative E2	Distance to Nearest Turbine Removed (miles/nautical miles) Alternative E2	Alternative(s) with greatest reduced visual impact to KOP as compared to the Proposed Action	VIA Overall Impact Level Rationale	VIA Overall Impact Level (major, moderate, minor, negligible)
BI04	Southeast Lighthouse - Night	High	15.3/13.4	15.3/13.3	19.9/17.3	15.5/13.4	15.3/13.3	E2	Alternative E2 would increase the distance between the KOP and nearest WTGs by approximately 4-miles which reduces the overall visibility of the WTGs along the horizon.	Moderate
BI12	Clayhead Trail	High	15.9/13.8	15.9/13.8	19.9/17.3	16.7/14.5	15.9/13.8	E2	Alternative E2 would increase the distance between the KOP and nearest WTGs by approximately 4-miles which reduces the overall visibility of the WTGs along the horizon.	Minor
BI13	North Light	High	17.2/15.0	17.2/15.0	21.0/18.2	18.0/15.7	17.2/15.0	E2	Alternative E2 would increase the distance between the KOP and nearest WTGs by approximately 4-miles which reduces the overall visibility of the WTGs along the horizon.	Minor
CI01	Cuttyhunk Island	High	13.9/12.1	19.2/16.7	13.9/12.1	14.9/12.9	13.9/12.1	E1	Alternative E2 would increase the distance between the KOP and nearest WTGs by approximately 4-miles which reduces the overall visibility of the WTGs along the horizon.	Moderate
MM01	Gooseberry Island	Medium	15.2/13.2	20.7/18.0	15.1/13.2	17.8/15.5	15.1/13.2	E1	Alternative E2 would increase the distance between the KOP and nearest turbine by approximately 4-miles which reduces the overall visibility of the WTGs along the horizon.	Negligible
MM04	Nobska Lighthouse	Medium	28.2/24.5	28.2/24.5	28.3/24.6	28.2/24.5	28.3/24.6	E1	Alternative E2 would increase the distance between the KOP and nearest WTGs by approximately 4-miles which reduces the overall visibility of the WTGs along the horizon.	Negligible
MV02	Philbin Beach	High	13.6/11.8	14.2/12.3	13.6/11.8	13.6/11.8	13.8/12.0	E1	Alternative E1 would increase the distance between the KOP and nearest WTGs by approximately .5-miles though a greater reduction of WTGs when viewed from center to right of center of the KOP would be reduced along the horizon. WTGs would continue to be visible left of center of the KOP beyond Nomans Land Island.	Moderate
MV03	Lucy Vincent Beach	High	15.5/13.6	15.5/13.4	16.9/14.7	15.5/13.5	18.7/16.3	E1	Alternative E1 would increase the distance between the KOP and turbines far right of center of the KOP along the horizon of the landform removing visibility, where WTGs are visible as part of the Proposed Action. WTGs would continue to be visible left of center of the KOP, similar to the Proposed Action.	Moderate
MV03	Lucy Vincent Beach - Sunset	Medium	15.5/13.7	15.5/13.5	16.9/14.8	15.5/13.5	18.7/16.3	E1	Alternative E1 would increase the distance between the KOP and turbines far right of center of the KOP along the horizon of the landform removing visibility, where WTGs are visible as part of the Proposed Action. WTGs would continue to be visible left of center of the KOP, similar to the Proposed Action.	Major
MV05	Moshup Beach	High	13.8/12.0	14.5/12.6	13.7/11.9	13.7/11.9	13.7/11.9	E1	Alternative E1 would increase the distance between the KOP and nearest WTGs by approximately 1-mile though a greater reduction of WTGs when viewed from center to right of center of the KOP would be reduced along the horizon. WTGs would continue to be visible center and left of center of the KOP.	Moderate
MV05	Moshup Beach - Sunset	High	13.8/12.1	14.5/12.7	13.7/11.9	13.7/11.9	13.7/11.9	E1	Alternative E1 would increase the distance between the KOP and nearest WTGs by approximately 1 -mile though a greater reduction of WTGs when viewed from center to right of center of the KOP would be reduced along the horizon. WTGs would continue to be visible center and left of center of the KOP where backlighting creates contrast.	Moderate
MV07	Aquinnah Overlook	High	13.7/12.0	14.9/12.9	13.7/11.9	14.0/12.2	13.7/11.9	E1	Alternative E1 would increase the distance between the KOP and nearest WTGs by approximately 1-mile though a greater reduction of WTGs when viewed from center to right of center of the KOP would be reduced along the horizon, particularly with atmospheric conditions. WTGs would continue to be visible center and left of center of the KOP.	Moderate
MV07	Aquinnah Overlook - Sunset	High	13.7/12.0	14.9/12.9	13.7/11.9	14.0/12.2	13.7/11.9	E1	Alternative E1 would increase the distance between the KOP and nearest WTGs by approximately 1-mile though a greater reduction of WTGs when viewed from center to right of center of the KOP would be reduced along the horizon. WTGs would continue to be visible center and left of center of the KOP.	Moderate
MV07	Aquinnah Overlook - Night	High	13.7/12.0	14.9/12.9	13.7/11.9	14.0/12.2	13.7/11.9	E1	Alternative E1 would increase the distance between the KOP and nearest WTG (lighting) by approximately 1-mile though a greater reduction of WTG lighting	Moderate

KOP Number	KOP Name	SLVIA Sensitivity Rating (high, medium, low)	Distance to Nearest Turbine (miles/nautical miles) Proposed Action	Distance to Nearest Turbine miles/nautical miles) Alternative E1	Distance to Nearest Turbine Removed (miles/nautical miles) Alternative E1	Distance to Nearest Turbine (miles/nautical miles) Alternative E2	Distance to Nearest Turbine Removed (miles/nautical miles) Alternative E2	Alternative(s) with greatest reduced visual impact to KOP as compared to the Proposed Action	VIA Overall Impact Level Rationale	VIA Overall Impact Level (major, moderate, minor, negligible)
									when viewed from center to right of center of the KOP would be reduced along the horizon. WTG lighting would continue to be visible center and left of center of the KOP.	
MV09	Gay Head Lighthouse	High	13.9/12.1	15.0/13.0	13.9/12.1	14.1/12.3	13.9/12.1	E1	Alternative E1 would increase the distance between the KOP and nearest WTGs by approximately 2-miles. Though a greater reduction of WTGs when viewed from left of center of the KOP would be reduced to the far horizon (approximately 16-20-miles). WTGs would continue to be visible right of center KOP to include the OSS.	Moderate
MV10	South Beach State Park	High	22.0/19.1	22.0/19.1	25.3/22.0	22.0/19.1	28.6/24.9	E1 and E2	WTGs along eastern portion of lease area would remain for both Alternatives as compared to the Proposed Action with no visible change.	Moderate
MV11	Wasque Point	Low	24.8/21.5	24.8/21.5	28.5/24.8	24.8/21.5	32.1/28.0	E1 and E2	WTGs along eastern portion of lease area would remain for both Alternatives as compared to the Proposed Action with no visible change.	Minor
MV12	Peaked Hill Reservation	Medium	16.3/14.2	16.3/14.2	17.3/15.1	16.3/14.2	18.7/16.2	E1	Alternative E1 would increase the distance (approximately 10-miles) between the KOP and turbines at the far right of center of the KOP along the horizon. WTGs would continue to be visible center and left of center of the KOP, similar to the Proposed Action.	Moderate
MV12	Peaked Hill Reservation - Sunset	High	16.3/14.2	16.3/14.3	17.3/15.1	16.3/14.2	18.7/16.2	E1	Alternative E1 would increase the distance (approximately 10-miles) between the KOP and turbines at the far right of center of the KOP along the horizon. WTGs would continue to be visible center and left of center of the KOP, similar to the Proposed Action where backlighting creates contrast.	Major
MV13	Edwin DeVries Vanderhoop Homestead	Medium	13.8/12.0	14.8/12.9	13.8/12.0	14.0/12.1	13.8/12.0	E1	Alternative E1 would increase the distance (approximately 20-miles) between the KOP and turbines at the far right of center of the KOP, though topography blocks right of KOP views. WTGs would continue to be visible center and left of center of the KOP, similar to the Proposed Action.	Major
NI10	Madaket Beach	Medium	34.6/30.0	34.6/30.0	39.7/34.5	34.6/30.0	45.0/39.0	E1 and E2	Alternatives E1 and E2 would have similar views of WTGs along the far horizon, with turbine blade tips visible within a narrow view, during clear viewing conditions. Due to distance, WTGs would be predominately obscured.	Minor
NL01	Nomans Land Island NWR (not occupied)	Low	8.7/7.5	8.7/7.5	9.0/7.8	8.7/7.5	12.1/10.5	E1	Alternative E1 would increase the distance (approximately 16 to 19-miles) between the KOP and turbines at the far right of center of the KOP. WTGs would continue to be visible center and left of center of the KOP, similar to the Proposed Action.	Moderate
NL01	Nomans Land Island NWR - Sunset (not occupied)	Medium	8.7/7.5	8.7/7.6	9.0/7.8	8.7/7.5	12.1/10.5	E1	Alternative E1 would increase the distance (approximately 16 to 19-miles) between the KOP and turbines at the far right of center of the KOP. WTGs would continue to be visible center and left of center of the KOP, similar to the Proposed Action.	Major
RI06	Trustom Pond NWR	Medium	22.6/19.6	22.6/19.6	23.8/20.7	23.5/20.4	22.6/19.6	E2	The reduction of WTGs would remove visibility of the WTGs along the horizon within the lease area. an occasional blade tip may be perceivable but not an influencing factor in overall impact.	Negligible
RI08	Scarborough Beach State Park	Medium	19.1/16.6	19.1/16.6	19.3/16.7	20.2/17.5	19.1/16.6	E2	E2 would have slightly less impacts as compared to E1. The reduction of WTGs in close proximity of the KOP would not decrease visibility of the WTGs along the horizon. WTG reduction would be localized to the far left of center of the KOP, with the majority of the WTGs remaining within the center of view.	Moderate
RI09	Narragansett Beach	Medium	20.0/17.4	20.7/18.0	20.0/17.4	22.3/19.4	20.0/17.4	E2	Alternative E2 would increase the distance between the KOP and nearest WTGs by approximately 2-miles. WTG reduction would be localized to the center of the KOP, with the majority of the WTGs remaining to the right of center of the KOP.	Moderate

**Table G-47a. Seascape Landscape Impact Assessment for Alternative E (Viewshed Alternative) - Character Areas**

Character Area Name	Character Area Association (SCA/LCA/OCA)	Key Observation Points with Simulations	Geographic Extent of Analysis Area with Visibility of Alternative (square miles/percentage) Alternative B - Proposed Action  Total SCA and LCA area within Analysis Area: 1,488.1 Square Miles	Geographic Extent of Analysis Area with Visibility of Alternative (square miles/percentage) Alternative E1  Total SCA and LCA area within Analysis Area: 1,488.1 Square Miles	Geographic Extent of Analysis Area with Visibility of Alternative (square miles/percentage) Alternative E2  Total SCA and LCA area within Analysis Area: 1,488.1 Square Miles	SLIA Overall Impact Level Rationale for the Alternative with the reduced level of impacts as compared to the Proposed Action	SLIA Overall Impact Level (major, moderate, minor, negligible)

**Table G-48. Visual Impact Assessment Impacts Matrix for Cumulative Impacts**

KOP Number	KOP Name	Representative Character Area (SCA, LCA, OCA)	Viewing Direction	Elevation (feet)	Cumulative Simulation	Visibility Threshold	Distance to Nearest Turbine (miles/nautical miles)	Horizontal Field of View Occupied	Size or Scale Rationale	Size and Scale Rating (large, medium, small)	Lease Area within Viewshed in Addition to Proposed Action	Geographic Extent Rating (large, medium, small)	SLVIA Magnitude Rating Rationale	SLVIA Magnitude Rating (large, medium, small)	SLVIA Overall Impact Level Rationale	SLVIA Overall Impact Level (major, moderate, minor, negligible)
BI04	Southeast Lighthouse	SCA	East	161.1	Yes	VTL2	15.3/13.3	180	Highly visible and likely to attract the attention of lighthouse visitors based on lighting conditions, although not as prominent as the existing BIWF.	Medium	OCS-A 0517 OCS-A 0487	Medium	Visibility based on lighting conditions, existing BIWF visibility, duration	Medium	Importance of recreation and historic resources, duration and visibility from KOP based on lighting conditions	Moderate
BI04	Southeast Lighthouse - Night	SCA	East	161.1	Yes	VTL 4	15.3/13.4	180	The addition of the flashing warning lights on the WTGs and decks will add evidence of human development and increase visual clutter at the horizon.	Large	OCS-A 0517 OCS-A 0487	Large	Visibility based on lighting conditions, existing BIWF visibility, duration	Large	Importance of recreation and historic resources, duration and visibility from KOP based on lighting conditions	Major
BI12	Clayhead Trail	SCA	East	78.8	No	VTL1	15.9/13.8	180	Visible and likely to attract attention resulting from angle of view of WTGs	Medium	OCS-A 0517 OCS-A 0487	Medium	Visibility of WTGs within viewshed along horizon line within viewshed	Medium	Importance of preservation of scenic district and uses; proximity and visibility of Project	Moderate
BI13	North Light	SCA	East	27.5	No	VTL4	17.2/15.0	160	Turbines become the focus of views out to the water and the tight spacing and numerous turbines along the horizon draw the viewers' eye away from natural features.	Large	OCS-A 0517 OCS-A 0487	Large	Size and scale in relation to existing conditions along with percentage of visibility	Large	Importance of recreation and historic resources; proximity of residential viewers, duration and visibility from KOP	Moderate
LI04	Montauk Point State Park	SCA/LCA	East	48.0	Yes	VTL1	31.5/27.4	180	Due to distance and viewer position in relation to other features in the landscape, the right field of view would have some visibility of WTG blades associated with OCS-A 0487.	Small	OCS-A 0517 OCS-A 0487	Large	Projects would become perceivable along horizon, though will be variable due to distance and atmospheric influences	Medium	Project would not be perceivable along horizon due to distance and atmospheric influences. Occasional blade tips and movement may be noticeable by the focused viewer or backlighting.	Minor
LI04	Montauk Point State Park - Night	SCA/LCA	East	48.0	Yes	VTL2	31.5/27.4	180	Due to distance and viewer position in relation to other features in the landscape, there would be a negligible change.	Small	OCS-A 0517 OCS-A 0487	Small	Additional projects would not be perceivable along horizon if observer views were focused toward lighting. Light house illumination is most prominent.	Small	Additional lighting is negligible on horizon right of KOP viewshed. Lighthouse illumination is the focus.	Negligible
MV02	Philbin Beach	SCA	South-Southwest to West-Southwest	10.5	No	VTL5	13.6/11.8	180	Turbines are very visible on the horizon line and will dominate the view from the KOP.	Large	OCS-A 0487 OCS-A 0500	Large	Additional WTGs visible to left of KOP at approximately same distance as eastern portion of Proposed Action.	Large	Importance of natural landscape and natural recreation opportunities, scenic values; prominence of turbines within viewshed	Moderate
MV03	Lucy Vincent Beach	SCA	South-Southwest to Southwest	27.7	No	VTL 3	15.5/13.5	180	More direct views of additional lease areas. Visible and likely to attract the attention resulting from angle of view of WTGs.	Medium	OCS-A 0487 OCS-A 0500	Medium	Visibility of WTGs within viewshed along horizon line within viewshed, through further visibility is beyond horizon	Medium	Importance of natural landscape and natural recreation opportunities, scenic values; prominence of turbines	Moderate

KOP Number	KOP Name	Representative Character Area (SCA, LCA, OCA)	Viewing Direction	Elevation (feet)	Cumulative Simulation	Visibility Threshold	Distance to Nearest Turbine (miles/nautical miles)	Horizontal Field of View Occupied	Size or Scale Rationale	Size and Scale Rating (large, medium, small)	Lease Area within Viewshed in Addition to Proposed Action	Geographic Extent Rating (large, medium, small)	SLVIA Magnitude Rating Rationale	SLVIA Magnitude Rating (large, medium, small)	SLVIA Overall Impact Level Rationale	SLVIA Overall Impact Level (major, moderate, minor, negligible)
MV03	Lucy Vincent Beach - Sunset	SCA	South-Southwest to Southwest	27.7	No	VTL 4	15.5/13.6	180	WTGs appear dark gray against the light sky and the position of the sun serves as a focal point, drawing the viewer's eye toward part of the proposed Project.	Large	OCS-A 0487 OCS-A 0500	Medium	Visibility of backlit WTGs within viewshed along horizon line within viewshed	Large	Scenic values; prominence of turbines- sunset backlighting of turbines along with movement influences prominence	Major
MV05	Moshup Beach	SCA	South-Southwest to West-Southwest	23.1	No	VTL 5	13.7/11.9	180	With the proposed RWF in place, the nacelles and rotors from numerous WTGs and two OSSs will be visible from this KOP in the background along the horizon.	Large	OCS-A 0487 OCS-A 0500	Large	Size and scale in relation to existing conditions along with percentage of visibility	Large	Importance of natural landscape and natural recreation opportunities, scenic values; prominence of turbines	Moderate
MV05	Moshup Beach - Sunset	SCA	South-Southwest to West-Southwest	23.1	No	VTL 5	13.7/11.10	180	WTGs appear dark gray against the light sky and the position of the sun serves as a focal point, drawing the viewer's eye toward part of the proposed Project.	Large	OCS-A 0487 OCS-A 0500	Large	Visibility of backlit WTGs within viewshed along horizon line within viewshed	Large	Scenic values; prominence of backlit turbines on the horizon	Major
MV07	Aquinnah Overlook	SCA	South to Southwest	145.5	Yes	VTL 3	13.7/11.9	180	OSSs become focal points along the wide horizon and the overlook is no longer just for views of the ocean but includes the turbines on the ocean.	Large	OCS-A 0487 OCS-A 0500	Large	Size and scale in relation to existing conditions along with percentage of visibility	Large	Prominent, dedicated viewpoint	Major
MV07	Aquinnah Overlook - Sunset	SCA	South to Southwest	145.5	Yes	VTL 5	13.7/11.10	180	OSSs become focal points along the wide horizon and the overlook is no longer just for views of the ocean but includes the turbines on the ocean.	Large	OCS-A 0487 OCS-A 0500	Large	Size and scale in relation to existing conditions along with percentage of visibility	Large	Prominent, dedicated viewpoint	Major
MV07	Aquinnah Overlook - Night	SCA	South to Southwest	145.5	Yes	VTL 3	13.7/11.11	180	OSSs become focal points along the wide horizon and the overlook is no longer just for views of the ocean but includes the turbines on the ocean.	Large	OCS-A 0487 OCS-A 0500	Large	Size and scale in relation to existing conditions along with percentage of visibility	Large	Prominent, dedicated viewpoint; warning lighting appears low on the horizon	Major
MV09	Gay Head Lighthouse	SCA	South to West-Southwest	162.1	No	VTL 4	13.9/12.1	180	The two OSSs appear as dark elements on the horizon suspended above the water surface. From this superior vantage point, the entirety of the Project is visible.	Large	OCS-A 0487 OCS-A 0500	Large	Size and scale in relation to existing conditions along with percentage of visibility	Large	Importance of historic lighthouse, scenic values; prominence of turbines and OSSs	Major
MV10	South Beach State Park	SCA	Southwest to West-Southwest	17.0	No	VTL3	15.0/13.0	180	Nacelles and rotors from numerous WTGs will be visible in the background along the horizon. Turbines are visible on the horizon and provide a focal point.	Large	OCS-A 0487 OCS-A 0500 OCS-A 501	Large	Size and scale in relation to existing conditions along with percentage of visibility	Large	Importance of natural landscape and natural recreation opportunities; massing of turbines on horizon within full viewshed.	Major

KOP Number	KOP Name	Representative Character Area (SCA, LCA, OCA)	Viewing Direction	Elevation (feet)	Cumulative Simulation	Visibility Threshold	Distance to Nearest Turbine (miles/nautical miles)	Horizontal Field of View Occupied	Size or Scale Rationale	Size and Scale Rating (large, medium, small)	Lease Area within Viewshed in Addition to Proposed Action	Geographic Extent Rating (large, medium, small)	SLVIA Magnitude Rating Rationale	SLVIA Magnitude Rating (large, medium, small)	SLVIA Overall Impact Level Rationale	SLVIA Overall Impact Level (major, moderate, minor, negligible)
MV11	Wasque Point	SCA	West-Southwest	13.6	Yes	VTL 2	15.0/13.0	180	Nearest WTG is approximately 15 miles away; the towers are largely obscured due to curvature of the Earth, with their degree of exposure decreasing from left to right.	Large	OCS-A 0487 OCS-A 0500 OCS-A 501	Large	Size and scale in relation to existing conditions along with percentage of visibility	Large	Importance of natural landscape and natural recreation opportunities; massing of turbines on horizon within full viewshed.	Major
MV12	Peaked Hill Reservation	LCA	South-Southwest to Southwest	305.1	No	VTL 1	16.3/14.2	180	KOP on Peaked Hill represents a discrete view to the southwest that requires the viewer to be perfectly positioned.	Small	OCS-A 0487 OCS-A 0500	Small Based on simulation graphic all are visible / vegetation and perspective influence	Size and scale in relation to existing conditions, vegetation and viewer perspective	Small	Importance of cultural significance and natural recreation opportunities; visibility of WTGs due to intervening vegetation and landforms	Major
MV12	Peaked Hill Reservation - Sunset	LCA	South-Southwest to Southwest	305.1	No	VTL4	16.3/14.2	180	Sunset illumination and backlighting influences change	Large	OCS-A 0487 OCS-A 0500	Large Based on simulation graphic all are visible / vegetation and perspective influence	Backlighting of WTGs, increased visibility	Large	Importance of cultural significance and natural recreation opportunities; visibility of WTGs due to backlighting	Major
MV13	Edwin DeVries Vanderhoop Homestead	SCA	South to Southwest	17.0	No	VTL5	13.8/12.0	180	WTGs are visible; light gray towers, nacelles, and rotors are fully visible above the horizon.	Large	OCS-A 0487 OCS-A 0500	Large	Size and scale in relation to existing conditions along with percentage of visibility	Large	Importance of natural landscape and natural recreation opportunities; visibility of WTGs due to distance and percentage of visibility	Major
NI10	Madaket Beach	SCA	West	20.6	Yes	VTL1	17.0/ 14.8	180	WTGs are barely visible along the horizon, with a small cluster of turbine blades and nacelle comprising the majority of visible features.	Small	OCS-A 0500 OCS-A 501 OCS-A 520 OCS-A 521 OCS-A 522	Small although numerous Lease Areas are within viewshed	Variable lighting and atmospheric conditions influence visibility	Small	Numerous lease areas are within viewshed, though perceivability of WTGs from KOP is highly influenced on visibility conditions.	Major
NL01	Nomans Land Island NWR (not occupied)	SCA	West-Southwest	42.1	Yes	VTL5	8.7/7.5	180	WTGs appear as gray vertical lines against the yellow backdrop of the sky that look out of character with the vast extent of open water.	Large	OCS-A 0487 OCS-A 0500	Large	Size and scale in relation to existing conditions along with percentage of visibility	Large	Intact seascape and prominence of WTGs in close proximity, although no viewers	Major
NL01	Nomans Land Island NWR - Sunset (not occupied)	SCA	West-Southwest	42.1	Yes	VTL6	8.7/7.6	180	Sunset illumination and backlighting influences change	Large	OCS-A 0487 OCS-A 0500	Large	Backlighting of WTGs, increased visibility	Large	Intact seascape and prominence of WTGs, although no viewers; backlighting of WTGs and OSS	Major
