

A photograph of a wind turbine in the ocean, viewed from a low angle. The turbine is white and stands on a dark base. The sky is blue with some clouds, and the water is a deep blue. The image is partially obscured by a dark blue geometric shape that forms the background for the text.

# Appendix F

Assessment of  
Resources with  
Minor  
(or Lower) Impacts

## Appendix F: Assessment of Resources with Minor (or Lower) Impacts

---

### PLACEHOLDER

As described in Section 3.3.1, *Impact Terminology*, resources with potential impact ratings greater than **minor** (i.e., **moderate** and **major**) are included in Chapter 3, *Affected Environment and Environmental Consequences*. Appendix F, *Assessment of Resources with Minor (or Lower) Impacts*, will be included in the Final EIS to present the analysis of resources with adverse impacts from the Proposed Action that are rated **negligible** to **minor**. This approach allows the main body of this Draft EIS to focus on the impacts of most concern. Information on resources with Proposed Action adverse impacts that are rated minor or lower can be found in Chapter 2, *Alternatives*, Table 2-7, *Summary and comparison of impacts by action alternative with no mitigation measures*.
