

DELIVERING OFFSHORE WIND TO CALIFORNIA

VINEYARD OFFSHORE IN CALIFORNIA

Vineyard Offshore, America's most experienced offshore wind developer, was awarded BOEM Lease Area 0562 west of Humboldt Bay. We look forward to supporting the ambitious offshore wind power goals of the State of California and doing our part to create jobs that will benefit the entire state.

Vineyard Offshore is backed by CIP, one of the largest renewable energy infrastructure funds in the world, which has a global portfolio of more than 5,000MW of floating offshore wind. In California, Vineyard Offshore's floating offshore wind project will deliver clean, reliable power to keep the lights on and help the state meet its climate targets.

COMMUNITY-FIRST APPROACH

In August 2023, Vineyard Offshore signed a Memorandum of Agreement with Humboldt County. We will work to maximize economic growth and minimize unwanted impacts, by ensuring:

- Sustainable and equitable development in the North Coast region
- Economic growth and workforce development in partnership with the county
- Partnership with Tribal Nations, local governments, and the North Coast community

"This agreement propels us towards enhanced collaboration, focused communication, and vital financial support. This is a big step forward in forging a path to amplify economic development, workforce planning, and community engagement, fostering a prosperous future for all."

HUMBOLDT COUNTY WORKFORCE DEVELOPMENT BOARD CHAIR

BUILDING AN OFFSHORE WIND WORKFORCE

Vineyard Offshore is committed to building a West Coast offshore wind workforce. We support the development of career training hubs at two local institutions, Cal Poly Humboldt and the College of the Redwoods, and have given \$500k to Cal Poly Humboldt for education and workforce initiatives.

RESPECT FOR TRIBAL SOVEREIGNTY AND CULTURAL HERITAGE

Vineyard Offshore respects the sovereignty of the Tribes associated with its projects and is committed to the industry's most robust Tribal engagement process, with attention to economic, cultural, environmental, and capacity issues, among others, in the interest of environmental justice, equity, and partnership.

PORT DEVELOPMENT

We are working with our partners to build out the Offshore Wind Marine Terminal at the Port of Humboldt. A floating offshore wind farm will provide long-term employment opportunities, including ongoing monitoring, repair, and maintenance for the 30-year lifespans of these facilities.

AN EXPERIENCED TEAM

Vineyard Wind

New Bedford, Massachusetts
800MW

Vineyard Offshore is building the first large-scale offshore wind project in the U.S. The project, now under construction, will power 400,000 homes in Massachusetts.

Pentland Floating

Caithness, Scotland
100 MW (floating)

Pentland is a floating offshore wind demonstration project that will become the largest floating project in the world once complete. The project will power 70,000 homes, utilizing 10MW turbines.
